## Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2011 <u>Final Report</u>

Date: November 07, 2016

Program or Project Title: WMA, SNA, Prairie Bank Easement Acquisition, Phase 3

Funds Recommended: \$3,931,000

Manager's Name: Jay Johnson Organization: DNR Address: 500 Lafayette Road City: St. Paul, 55155 Office Number: 651-259-5248 Email: jay.johnson@state.mn.us

#### Legislative Citation: ML 2011, First Sp. Session, Ch. 6, Art. 1, Sec. 2, Subd. 2(a)

**Appropriation Language:** \$3,931,000 the first year is to the commissioner of natural resources to:(1) acquire land in fee for wildlife management area purposes under Minnesota Statutes, sections 86A.05, subdivision 8, and 97A.145; (2) acquire land in fee for scientific and natural area purposes under Minnesota Statutes, sections 84.033 and 86A.05, subdivision 5; and(3) acquire native prairie bank easements under Minnesota Statutes, section 84.96. A list of proposed land or permanent conservation easement acquisitions must be provided as part of the required accomplishment plan. The accomplishment plan must include an easement monitoring and enforcement plan. Up to \$14,000 is for establishing a monitoring and enforcement fund as approved in the accomplishment plan, and subject to subdivision 15. An annual financial report is required for any monitoring and enforcement fund established, including expenditures from the fund.

County Locations: Anoka, Big Stone, Carlton, Cottonwood, Dakota, Hubbard, Jackson, Wabasha, and Wilkin.

#### Regions in which work was completed:

- Northern Forest
- Southeast Forest
- Prairie
- Metro / Urban

#### Activity types:

- Protect in Easement
- Protect in Fee

### Priority resources addressed by activity:

- Forest
- Prairie

### Summary of Accomplishments:

This program acquired priority lands and developed them as Wildlife Management Areas (WMA) - six parcels protected totaling over 600 acres, Scientific and Natural Areas (SNA) - one parcel of 900 acres (287 acres credited to this funding), and Native Prairie Bank (NPB) easements - two parcels totaling almost 200 acres. These lands protect habitat and some provide public hunting, trapping and compatible outdoor uses.

### **Process & Methods:**

MN DNR protected lands in the prairie, northern forest, metro urbanizing, and SE bluffland ecological sections with this appropriation, and has or will restore grassland by planting native prairie. DNR prioritized acquisitions at sites where there is an existing habitat base to address fragmentation and to maximize habitat benefits. Potential acquisitions are scored and ranked on numerous ecological and

management criteria. DNR seeks out willing landowners and conducts all transactions in accordance with state law and departmental policy.

Nine properties totaling over 1,100 acres are now permanently protected as a result of acquisitions funded by this program. We were able to meet our original goal for forest acre protection, but failed to meet our prairie protection goal for reasons described below. Two acquisitions that failed to close by 6/30/14, did eventually close, but not in time to be funded from this appropriation and be counted as acres protected in this summary. The funding that would have been used from this appropriation was returned to the Outdoor Heritage Fund.

### **Explain Partners, Supporters, & Opposition:**

Collaborative partnerships are critical to acquire key lands. Conservation partners including Pheasants Forever, Ducks Unlimited, Trust for Public Land, and The Nature Conservancy coordinate closely with DNR to ensure that the missions of all partners were met as much as possible. Resolutions of approval were obtained from County Boards of Commissioners for all WMA acquisitions.

### **Additional Comments:**

### Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

During the life span of this appropriation, crop prices and land values were quickly climbing. This made it especially challenging to get sellers of agricultural lands to accept the states appraised value. The appraised value is based on analysis of comparable sales in the recent past. The reliance on past sales in an escalating market resulted in appraised values lower than many sellers expectations because the sellers expectations were based on what they observed in the current market. We were unable to achieve our acreage goal for prairie protection.

Another challenge that resulted in an under achievement in terms of acres and spending was two acquisitions did not close by the 6/30/14 spending deadline. Both properties were under binding purchase agreement (and eventually were acquired), but because of flaws in the sellers' titles, the transactions did not close prior to 6/30/14.

### **Other Funds Received:**

- Environmental and Natural Resource Trust Fund
- Reinvest In Minnesota (RIM)

#### How were the funds used to advanced the program:

Past acquisitions for WMAs and SNAs have been funded in part by the Environment and Natural Resources Trust Fund.

One Native Prairie Bank (NPB) easement acquisition acquired with this appropriation was partially funded with LCCMR. The SNA feetitle acquisition was partially funded by LCCMR & RIM.

One of the WMA parcels acquired with this appropriation was partially funded with Reinvest In Minnesota dollars.

# What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

All sites funded through this proposal are or will be state lands, and are part of the state outdoor recreation system. Ongoing maintenance will be accomplished through routine management activities accomplished by our network of DNR offices. Periodic enhancements will be accomplished by existing staff, MCC crews, temporary project staffing or through vendor contract using traditional habitat project funding, bonding, and future requests for funding from dedicated funding sources.

### **Outcomes:**

### The original accomplishment plan stated the program would

### Programs in the northern forest region:

• Forestlands are protected from development and fragmentation

### How will the outcomes be measured and evaluated?

The outcome of protection from development and fragmentation will be evaluated through periodic analyses conducted by DNR and conservation organizations seeking to describe the extent of fragmentation in this part of the state. The large SNA tract in Hubbard County will have significant benefit.

#### Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna

### How will the outcomes be measured and evaluated?

The outcome of a network of connected habitat corridors will be evaluated through periodic analyses conducted by DNR and conservation organizations. Analyses of these types are common in the metropolitan/urbanizing part of the state. Examples are the multi-partner Metro Conservation Corridors effort and the former Metro Greenways effort.

### Programs in southeast forest region:

- High priority riparian lands, forestlands, and savannas are protected from parcelization and fragmentation
- Rivers, streams, and surrounding vegetation provide corridors of habitat

### How will the outcomes be measured and evaluated?

The outcome of riparian, forest, and savanna lands being protected from fragmentation will be evaluated through periodic analyses conducted by DNR and conservation organizations. Tools such as the Watershed Health Assessment Framework and remote sensing are currently being used to measure connectivity and and fragmentation.

### Programs in prairie region:

- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands

### How will the outcomes be measured and evaluated?

These protection, restoration, and enhancement outcomes will be evaluated through periodic analyses conducted by DNR and conservation organizations. The multi-partner Minnesota Prairie Recovery Project is the focal point for efforts to measure losses and gains in prairie/grassland habitat. The Pheasant Summit Action Plan being led by MN DNR is another effort that will have wide ranging benefit in preserving and restoring prairie habitat.

## **Budget Spreadsheet**

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

### Total Amount: \$3,931,000

### Budget and Cash Leverage
