

# Lessard-Sams Outdoor Heritage Council

## Laws of Minnesota 2013 Accomplishment Plan

**Date:** April 20, 2017

**Program or Project Title:** MN Prairie Recovery Project Phase 4

**Funds Recommended:** \$ 5,310,000

**Manager's Name:** Neal Feeken  
**Title:** Prairie Recovery Coordinator  
**Organization:** The Nature Conservancy  
**Address:** 1101 W River Parkway  
**Address 2:** Suite 200  
**City:** Minneapolis, MN 55415  
**Office Number:** 612-331-0738  
**Email:** nfeeken@tnc.org  
**Website:** nature.org

**Legislative Citation:** ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 2(d)

**Appropriation Language:** \$5,310,000 in the first year is to the commissioner of natural resources for an agreement with The Nature Conservancy to acquire native prairie, wetland, and savanna and restore and enhance grasslands, wetlands, and savanna. A list of proposed land acquisitions must be provided as part of the required accomplishment plan. Annual income statements and balance sheets for income and expenses from land acquired with this appropriation must be submitted to the Lessard-Sams Outdoor Heritage Council no later than 180 days following the close of The Nature Conservancy's fiscal year.

**County Locations:** Becker, Big Stone, Chippewa, Clay, Cottonwood, Jackson, Kandiyohi, Kittson, Lac qui Parle, Lincoln, Lyon, Mahnomon, Marshall, Murray, Nobles, Norman, Pennington, Pipestone, Polk, Pope, Pope , Red Lake, Rock, Roseau, Stearns, Swift, Wilkin, and Yellow Medicine.

**Regions in which work will take place:**

- Forest / Prairie Transition
- Prairie

**Activity types:**

- Enhance
- Protect in Fee
- Restore

**Priority resources addressed by activity:**

- Prairie
- Wetlands

### Abstract:

This proposal contributes to the implementation of the MN Prairie Conservation Plan by protecting 1000 acres of native prairie/wetland/savanna; restoring 250 acres prairie/wetland; enhancing 8,000 acres grassland/savanna; and continuing a prairie conservation model that demonstrates new economic models for sustainable conservation.

### Design and scope of work:

**Problems to be addressed:** The conservation problems facing Minnesota's prairies, prairie potholes, grasslands and savannas include: continued losses of native and restored grasslands through conversion to other uses; degradation of existing grasslands and wetlands due to

encroachment by woody vegetation and other invasive species; and insufficient capacity of responsible agencies to optimally manage grasslands under their care. Social and economic pressures exacerbate these problems including: Perceived loss of local taxes and local incomes when land is acquired by public entities; state budget implications for long-term management of public lands and payment-in-lieu-of-taxes; and limited capacity for public agencies to coordinate work among multiple stakeholders to maximize efficiencies and results across landscapes.

**Scope of work:** “Phase 4” will build on the success of the MN Prairie Recovery Project Phase 1 & 2 by continuing to target and acquire native prairie habitats and accelerating conservation on permanently protected grasslands. The project is a direct implementation strategy of the MN Prairie Conservation Plan and activities and geographies reflect the collective prioritization developed within the Plan. An estimated 1000 acres of existing and restorable grassland, prairie pothole complex, and/or savanna will be permanently protected within 5 prairie core landscapes as identified in the MN Prairie Conservation Plan 2010. Lands will be held by The Nature Conservancy, subject to a recorded notice of funding restrictions pursuant to the grant with the MN DNR. Lands will be open to public hunting and fishing as provided in the Constitution, and basic developments will be implemented (boundary signage, habitat improvement, wetland restoration). Protection efforts will be coordinated with other partner protection programs (e.g., DNR Wildlife Management Area and Prairie Bank programs). A separate and discrete internal fund has been established by The Nature Conservancy to cover ongoing land-management costs. Income generated by agricultural leases (grazing, haying, native seed harvest, and/or cropping), public contributions and donations will be held in this account and used to pay for property taxes and ongoing management costs. An estimated 250 acres of cropland will be restored to diverse, local-ecotype grassland or grassland/wetland complex (part of the above protected acres) as a supplement to existing efforts. Preference will be given to local producers and contractors for provision of seed and establishment of prairies to promote creation of local conservation-oriented businesses.

An estimated 8,000 acres of grassland complex will be enhanced on permanently protected lands, including land purchased with OHF funds and held by the Conservancy to increase native species diversity and improve critical wildlife habitat. Management techniques will include prescribed fire, conservation grazing and/or haying, removal of woody vegetation, control of exotic species, and related restoration activities. Much of this work will be accomplished by contract. Maximum use will be made of Conservation Corps of Minnesota (CCM), private local businesses and other organizations as needed and appropriate. On-the-ground staff provided by this grant will form and lead local coordination and implementation teams; identify protection, restoration and enhancement needs and opportunities within the focus area; work with DNR and FWS staff to delineate conservation projects on public and other permanently protected lands; coordinate contracts and staff resources to protected conservation lands; work with private landowners to coordinate agricultural activities/leases on appropriate protected conservation lands (e.g., haying, grazing, seed harvest, cropping); educate lessees on appropriate conservation grazing/haying practices; supervise management of lands acquired above; plan and conduct prescribed burns; secure other funding for conservation practices; and other activities related to prairie conservation in the focus areas.

A total of four biologists (“prairie managers”) will coordinate activities in the focus areas. Biologists will be employed by the Conservancy and will be located in a DNR or FWS office. This will foster better coordination and collaboration among partners, while accelerating enhancement work on public lands. Contracts will be let to provide a high level of enhancement activities to new and existing protected conservation lands. These activities will improve the habitat value of public lands that are not currently receiving adequate management treatment, while simultaneously providing jobs for CCM and local businesses. To ensure goals and outcomes are consistently achieved across all project areas a project coordinator will oversee implementation of the above activities and provide administrative support for budget monitoring and reporting. Marketing and media outreach will be provided by the Conservancy to highlight the goals and accomplishments of the project to local and statewide constituents, as well as elected officials. Temporary seasonal crews will be retained by the Conservancy or other partners to provide additional capacity for land management during critical periods like spring burn season. These crews will create flexibility for enhancement projects and will maximize the ability of specialized skilled personnel like burn bosses to increase the number of acres annually treated.

Specific tracts for acquisition and protection are not yet identified. We will work with the Council and staff to formalize these prior to purchase negotiations. Parcels for restoration and enhancement will be identified in partnership with DNR, FWS, and other partners.

**Results to date:** Phase 1 & 2 of the Project have received a combined \$8 million in Outdoor Heritage Fund support. With this funding we

have protected 1,738 acres of prairies, wetlands and grasslands and enhanced approximately 10,000 acres of publicly owned grasslands. In short, we have accomplished half of the stated goals for the combined Phases in roughly one-third of the time allotted. We continue to make steady progress and expect to exceed our goals within the timelines of the grants. Enhancement work has included a focus on increased use of prescribed fire, extensive woody vegetation removal, building infrastructure for conservation grazing on public lands, and identification and treatment of invasive plants. Much of the work has been achieved by working with private local contractors, Conservation Corps of MN, and through employment of temporary seasonal work crews. Phase 3 has been funded at \$4.6 million and work is expected to begin in fall 2012. With our proven track record we are confident that we can meet or exceed the goals stated here.

Initial results suggest that revenue generating activities, particularly grazing, can play a role in supporting long-term costs. We plan to continue exploring and building on this model as additional parcels are acquired and restored.

At their October 7, 2014 meeting, the Council requested that The Nature Conservancy add the following language about salary and fringe benefit reimbursement to the Accomplishment Plan:

As provided under the subdivisions titled "Payment Conditions and Capital Equipment Expenditures" (ML 2010, Ch. 361, Art. 1, Sec. 2, Subd. 10; ML 2011, First Special Session, Ch. 6, Art. 1, Sec. 2, Subd. 10; ML 2012, Ch. 264, Art. 1, Sec. 2, Subd. 8; ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 8; ML 2014, Ch. 256, Art. 1, Sec. 2, Subd. 8) The Nature Conservancy (the Conservancy) may be reimbursed for salary and fringe benefits based on a provisional fringe benefits rate consistent with OMB Circular A-122 and negotiated annually with the Conservancy's cognizant agency. Within 120 days of the end of each Nature Conservancy fiscal year, the Conservancy will provide MN DNR with the actual fringe benefits rate for the prior year and reconcile any overpayment made by the State.

### **Which sections of the Minnesota Statewide Conservation and Preservation Plan are applicable to this program:**

- H1 Protect priority land habitats
- H3 Improve connectivity and access to recreation
- H5 Restore land, wetlands and wetland-associated watersheds
- H7 Keep water on the landscape

### **Which other plans are addressed in this program:**

- Grassland Conservation Plan for Prairie Grouse
- Long Range Duck Recovery Plan
- Long Range Plan for the Ring-Necked Pheasant in MN
- Minnesota DNR Nongame Wildlife Plans
- Minnesota Prairie Conservation Plan
- Outdoor Heritage Fund: A 25 Year Framework

### **Which LSOHC state-wide priorities are addressed in this program:**

- Address conservation opportunities that will be lost if not immediately acted on
- Address wildlife species of greatest conservation need, Minnesota County Biological Survey data, and rare, threatened and endangered species inventories in land and water decisions, as well as permanent solutions to aquatic invasive species
- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Restore or enhance habitat on state-owned WMAs, AMAs, SNAs, and state forests

- Target unique Minnesota landscapes that have historical value to fish and wildlife
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

## Which LSOHC section priorities are addressed in this program:

### Forest / Prairie Transition:

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife
- Protect, enhance, and restore rare native remnant prairie
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

### Prairie:

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna
- Convert agricultural land to wetland/upland to protect, enhance, or restore existing habitat complexes, such as WMAs
- Restore or enhance habitat on public lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

## Relationship to other funds:

- Environmental and Natural Resource Trust Fund

### Describe the relationship of the funds:

Project activities are being coordinated with a number of existing and proposed OHF projects that collectively strive to implement recommendations found in the MN Prairie Conservation Plan 2010. The Prairie Recovery Project Phase 4 builds on a current LCCMR project "Reconnecting Prairie Landscapes" that is working to identify financial drivers for increasing grassland conservation on public and private lands in core prairie geographies.

## How does this program accelerate or supplement your current efforts in this area:

The Nature Conservancy has been active in prairie protection and management in Minnesota for over 50 years. Funds available through this program provide critical new resources for protecting the less than 1% of original prairie remaining in the state. Given current high commodity crop prices, development of new technologies for drought resistant crops and intensified subsurface drainage it is imperative that willing sellers of native prairie be given the chance to protect these increasingly rare systems. The Prairie Recovery Project represents one on the best tools the Conservancy currently has to offer such protection.

Further, many of the lands in public ownership are in dire need of increased management to ensure healthy grassland systems. Investment in removing woody species, controlling invasives and implementing prescribed fire regimes is akin to infrastructure development in that upfront costs are high but ongoing maintenance becomes more sustainable once those investments have been made. This project, and others that support the MN Prairie Conservation Plan are critical to ensuring the health and viability of Minnesota's prairie landscapes.

## How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Protection, restoration and enhancement implementation are each critical tools for the viability of Minnesota's prairie/wetland ecosystems. Prairie landscapes are sustained through the regular application of appropriate disturbance, including fire, grazing and haying. A chronic problem for land managers is securing adequate funding to do these conservation practices as frequently as needed (e.g., every 1-4 years). A primary purpose of this proposal is to establish a collaborative and coordinated partnership that can accelerate the application of these management techniques across multiple landscapes. For new lands acquired under this proposal, we will continue to test a new long-term funding model by attempting to secure management funds by generating conservation compatible income from acquired lands. In addition to the conservation value of planned haying and grazing, the income generated by these agricultural leases can help pay for management activities and property taxes. This model has been used on other Conservancy lands, and this project will evaluate whether it is feasible on these types of public/private protected conservation lands.

## Activity Details:

Will there be planting of corn or any crop on OHF land purchased or restored in this program - **Not Listed**

Will local government approval be sought prior to acquisition - **No**

The Nature Conservancy intends to retain and manage any acquired properties in nongovernmental ownership. Further, we are committed to paying property taxes on all properties acquired. We work closely with local officials to ensure knowledge of our activities but typically do not ask for local approval.

Is the land you plan to acquire free of any other permanent protection - **Yes**

Is this land open for hunting and fishing - **Yes**

All acquired lands are open to public access for activities including hunting and fishing. Access to properties purchased with Outdoor Heritage Funds are managed in a fashion and with rules approximating Wildlife Management Areas.

Is the activity on permanently protected land per 97A.056, subd 13(f) and/or public waters per MS 103G.005, Subd. 15 - **Yes (WMA, WPA, SNA, Private Land, Refuge Lands)**

### Accomplishment Timeline:

Activity	Approximate Date Completed
Protection - 1st 200 acres acquired	March 2014
Protection - 2nd 200 acres acquired	June 2014
Protection - 3rd 200 acres acquired	September 2014
Protection - 4th 200 acres acquired	March 2015
Protection - 5th 200 acres acquired	June 2015
Restorations initiated	September 2015
Restorations completed	March 2016
250 acres woody vegetation removal	December 2013
500 acres fenced for conservation grazing	December 2013
250 acres invasives treated	August 2014
6000 acres prescribe fire	June 2015
500 acres fenced for conservation grazing	December 2014
500 acres woody vegetation removed	December 2014
500 acres invasives treated	August 2015
4000 acres prescribed fire	October 2015

Date of Final Report Submission: 7/30/2018

### Federal Funding:

Do you anticipate federal funds as a match for this program - **Not Listed**

### Outcomes:

#### Programs in forest-prairie transition region:

- Improved aquatic habitat indicators
- Increased availability and improved condition of riparian forests and other habitat corridors
- Protected, restored, and enhanced aspen parklands and riparian areas
- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands
- Water is kept on the land

#### Programs in prairie region:

- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna
- Expiring CRP lands are permanently protected
- Improved condition of habitat on public lands
- Increased participation of private landowners in habitat projects

- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands
- Remnant native prairies and wetlands are permanently protected and are part of large complexes of restored prairie, grasslands, and large and small wetlands
- Water is kept on the land

# Budget Spreadsheet

*Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan*

**How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount**
