

Main Request for Funding Form

Lessard-Sams Outdoor Heritage Council Fiscal Year 2014 / ML 2013 Proposal

Program or Project Title: Shallow Lake & Wetland Protection Program - Phase III

Funds Requested: \$5,000,000

Manager's Name: Jon Schneider

Title: Manager, Minnesota Conservation Programs

Organization: Ducks Unlimited

Street Address: 311 East Lake Geneva Road

City: Alexandria, MN 56308

Telephone: 320-762-9916

E-Mail: jschneider@ducks.org

Organization Web Site: www.ducks.org

County Locations: Becker, Beltrami, Big Stone, Blue Earth, Brown, Chippewa, Clay, Clearwater, Cottonwood, Douglas, Faribault, Freeborn, Grant, Jackson, Kandiyohi, Kittson, Lac Qui Parle, Le Sueur, Lincoln, Lyon, Mahnomon, Marshall, Martin, Mc Leod, Meeker, Morrison, Murray, Nicollet, Nobles, Norman, Otter Tail, Pennington, Polk, Pope, Red Lake, Redwood, Renville, Rice, Roseau, Sibley, Stearns, Steele, Stevens, Swift, Todd, Traverse, Waseca, Watonwan, and Yellow Medicine.

Ecological Planning Regions:

- Forest / Prairie Transition
- Prairie

Activity Type:

- Restore
- Protect in Fee

Priority Resources Addressed by Activity:

- Wetlands
- Prairie

Abstract

Ducks Unlimited will purchase and restore 500 acres primarily for Minnesota DNR or U.S. Fish & Wildlife Service on shallow lakes and on state Wildlife Management Areas containing shallow lakes and large wetlands of importance to waterfowl and other wildlife.

Activity Detail

Design and Scope of Work

This proposal contributes to implementation of the Minnesota Prairie Conservation Plan. In the Prairie Section of Minnesota, 90% of our prairie wetlands have been drained and most native prairie uplands lost to agriculture. The wetland basins that remain are often large, deep wetlands or shallow lakes that now receive the runoff and drainage from the intensively cultivated landscape that surrounds them. As of 2012, 47 of these shallow lakes have been legally designated for active wildlife management purposes (water level draw-downs and surface use restrictions) by Minnesota DNR, whereas others are actively managed via flowage easements. Hundreds of other basins are surrounded in whole or part by state Wildlife Management Areas (WMA) or federal Waterfowl Production Areas (WPA).

Drainage and intensive cultivation of the prairie landscape has degraded our remaining wetlands and shallow lakes into turbid waters that now provide only limited habitat benefit to migratory waterfowl and other wetland-dependent wildlife. Altered landscape hydrology, increased nutrient and sediment loading, and invasive fish such as common carp now greatly and negatively impact the aquatic ecology of our remaining wetland basins. This has especially negatively affected the prairie wetland habitat quality for both migrating and brood-rearing waterfowl, and the quality of outdoor recreational opportunities for Minnesota duck hunters.

To remedy, Minnesota DNR and U.S. Fish & Wildlife Service managers actively manage shallow lakes and wetlands through temporary water level draw-downs to consolidate sediments and nutrients, reduce and remove invasive fish, improve water clarity, and enhance the aquatic ecology in some shallow lake and large wetland basins under their control. DU is actively involved in delivering these efforts by providing bio-engineering technical assistance supported by Outdoor Heritage Fund appropriations.

In addition, it is also important to buffer our remaining shallow lakes and wetlands with native prairie grass, and restore and protect the lands immediately surrounding them as agriculture intensifies and pressures to convert idle land into row-crop production grow. Many private lands adjacent to our remaining wetlands and shallow lakes contain unbroken patches of native prairie or are restored cropland enrolled in the USDA's short-term Conservation Reserve Program (CRP), but remain vulnerable to conversion back to agriculture due to rising row-crop and land prices and therefore need permanent protection. Other lands are intensively cultivated right up to the edge of shallow lakes and wetlands, or state WMAs containing such, and need to be restored and permanently protected.

Thus, public land acquisition and restoration is a critical component of shallow lake and wetland conservation in Minnesota, especially in the prairie portion of the state where wetland complexes are critical for both breeding and migrating ducks. Many basins are only protected by a narrow band of public land (state WMA or federal WPA lands) that may not adequately protect their aquatic ecology from landscape runoff or provide adequate upland nesting cover for birds, making it important to purchase and restore additional lands around them to protect public water investments. Finally, many shallow lake and large wetland basins with management potential (and those partially drained with restoration potential) have only limited or no public land on them, which limits the ability of Minnesota DNR to actively manage them – thus public land acquisition is needed to give wildlife agencies land control on basins in need of improvement for wildlife and to provide public access. Active management and protection of shallow lakes and wetlands is identified as a priority action in all major conservation plans in Minnesota.

This proposal is Phase 3 of a public land acquisition effort by Ducks Unlimited to acquire and restore lands on shallow lakes and state WMAs (or federal WPAs) containing large wetland basins for public ownership and

land management to buffer shallow lakes and help create wetland complexes, restore and preserve prairie uplands and small wetlands around shallow lakes and WMAs or WPAs, protect investments in shallow lake management, and make new shallow lake enhancement or wetland restoration projects possible. DU proposes to acquire (and restore where needed) approximately 500 acres of land on shallow lakes and WMAs (or WPAs) containing large wetlands and shallow lakes in the Prairie and Forest-Prairie Sections.

DU field staff will work with DNR area wildlife managers and private landowners to identify possible tracts of land for sale on shallow lakes and on public lands containing large wetlands, and DU will obtain written approval that DNR will accept a tract before lands are purchased for the state. Some lands may be transferred to the U.S. Fish & Wildlife Service instead (with preapproval from the Service) if federal ownership is more appropriate, however, our primary intent is to purchase lands for eventual transfer to the DNR for incorporation into the state WMA system. Sensitive shoreland and tracts that provide public access to shallow lakes, and those that make wetland restorations and shallow lake enhancements possible, will be prioritized for acquisition and inclusion in the state WMA system. Tracts acquired will be prioritized by DNR Section of Wildlife in consultation with DU.

In cases where temporary short-term DU land management is possible and where weed control, taxes, and other land ownership costs can be paid with proceeds from CRP rental contracts or limited haying/grazing leases, DU may elect to hold and manage some land acquired for up to 20 years before transferring to the DNR or Service to allow for public use and demonstration of habitat accomplishments achieved with LSOHC-recommended funding from the Outdoor Heritage Fund (public and private tours, youth hunting events, media events, etc). During this time, DU would restore the land, manage the land for wildlife habitat, pay in full all local, county and state taxes, and ensure the land is open for public hunting, fishing, and other forms of outdoor recreation.

Grant funds will pay for land, appraisals, surveys, closing costs, restoration, and DU staff and in-state travel costs to conduct outreach to landowners, research, identify, purchase, and restore, land. Budget reallocations up to 10% will not require an amendment to the pending Accomplishment Plan as per guidance from LSOHC and DNR OMB staff.

Planning

MN State-wide Conservation Plan Priorities

- H1 Protect priority land habitats
- H2 Protect critical shoreland of streams and lakes
- H3 Improve connectivity and access to recreation
- H4 Restore and protect shallow lakes
- H5 Restore land, wetlands and wetland-associated watersheds
- H6 Protect and restore critical in-water habitat of lakes and streams
- H7 Keep water on the landscape

Plans Addressed

- A Vision for Wildlife and Its Use -- Goals and Outcomes 2006-2012
- Ducks Unlimited Living Lakes Initiative
- Grassland Bird Conservation Area
- Long Range Duck Recovery Plan
- Long Range Plan for the Ring-Necked Pheasant in MN

- Managing Minnesota's Shallow Lakes for Waterfowl and Wildlife
- Minnesota DNR Nongame Wildlife Plans
- Minnesota Prairie Conservation Plan
- Minnesota's Wildlife Management Area Acquisition - The Next 50 Years
- North American Waterbird Conservation Plan
- North American Waterfowl Management Plan
- Northern Plains Prairie Potholes Regional Shorebird Conservation Plan
- Northern Tallgrass Prairie Habitat Preservation Area (HPA) Final Environmental Impact Statement
- Outdoor Heritage Fund: A 25 Year Framework
- Partners in Flight Conservation Plans for States and Physiographic Regions
- Partners in Flight Grassland Bird Plan
- State Comprehensive Outdoor Recreation Plan
- Tomorrow's Habitat for the Wild and Rare
- U.S. Fish and Wildlife Service Strategic Habitat Conservation Model
- U.S. Prairie Pothole Joint Venture Plan
- Upper Mississippi River and Great Lakes Region Projects Joint Ventures Plan

LSOHC Statewide Priorities

- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Produce multiple enduring conservation benefits
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Allow public access. This comes into play when all other things about the request are approximately equal
- Address conservation opportunities that will be lost if not immediately acted on
- Restore or enhance habitat on state-owned WMAs, AMAs, SNAs, and state forests
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model
- Address wildlife species of greatest conservation need, Minnesota County Biological Survey data, and rare, threatened and endangered species inventories in land and water decisions, as well as permanent solutions to aquatic invasive species
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Target unique Minnesota landscapes that have historical value to fish and wildlife

LSOHC Prairie Section Priorities

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna
- Convert agricultural land to wetland/upland to protect, enhance, or restore existing habitat complexes, such as WMAs
- Restore or enhance habitat on public lands
- Protect, restore, and enhance shallow lakes
- Protect expiring CRP lands

- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

LSOHC Forest Prairie Transition Section Priorities

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife
- Protect, enhance, and restore rare native remnant prairie
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

Relationship to Other Constitutional Funds

- Environmental and Natural Resource Trust Fund
- Clean Water Fund

Interest in Minnesota's wetland and shallow lake habitats has resulted in numerous initiatives with a variety of funding sources, including the Environmental and Natural Resource Trust Fund and Clean Water Fund. The work from this proposal will complement the goals of other funds, although project selection in this effort will be based primarily on wildlife habitat benefits.

Accelerates or Supplements Current Efforts

This proposal represents Phase 3 of Ducks Unlimited's ongoing land protection efforts to purchase and restore land on shallow lakes and WMAs containing large wetlands to protect the state's prairie wetland resources and protect native and restored prairie (including CRP lands) in the Prairie and Transition Sections. DU received and spent \$450,000 from OHF on prairie land acquisition on shallow lakes in 2009, and is currently spending \$2.6 million on several prairie land acquisitions from a 2010 OHF appropriation to be completed by June 2013. Thus, DU will be in need of prairie land acquisition funding in July 2013 when this request would commence. This request accelerates our current efforts with a more aggressive budget that will make more shallow lake protections and wetland restorations possible, and help initiate more shallow lake enhancement projects by providing Minnesota DNR with public land investments on key shallow lakes. Funding of this request will allow DU to proactively find willing seller landowners for DNR to consider, and work with them to appraise and purchase land on key shallow lakes and wetlands with acquisition funding in hand so land deals can be closed in a timely manner and be restored during the grant period.

Sustainability and Maintenance

The state's Duck Plan calls for the improvement and protection of 1,800 shallow lakes. Lands purchased through this grant will be restored and eventually transferred to the Minnesota DNR or U.S. Fish & Wildlife Service for long-term public land ownership and management. Lands purchased and held short-term by DU will be managed for wildlife habitat and open to compatible public uses such as hunting and bird-watching. DU will pay all taxes owed in full on properties acquired while in DU ownership, and will continue to do so if we hold one or more tracts for short-term (10-20 years). Cost of short-term DU ownership and management of lands will be paid through CRP rental payments or short-term grazing and haying leases, and lands may become part of state WMA land management system despite DU retaining short-term ownership. This will allow DU to showcase the excellent wildlife habitat accomplishments achieved through the support of the Outdoor Heritage Fund and Lessard-Sams Outdoor Heritage Council made possible by the Legacy Amendment, highlight outdoor recreation and public hunting opportunities these lands provide, and promote the public benefits of public prairie land acquisitions while paying local taxes in full during the period of DU ownership.

Will local government approval be sought prior to acquisition? - **No**

County Board notification of land acquired by DU will be made after land has been acquired by DU, including our intent to pay taxes in full during DU ownership and our intent to eventually transfer land acquired to Minnesota DNR or U.S. FWS. As per our policy, DU will pay all taxes owed during short-term DU ownership of lands we purchase.

Is the land you plan to acquire free of any other permanent protection? - **Yes**

Is this land open for hunting and fishing? - **Yes**

Any land acquired by DU with OHF funds will be open to public use and recreation, including hunting and fishing.

Is the activity on permanently protected land and/or public waters per MS 103G.005, Subd. 15? - **Yes (WMA, WPA)**

Accomplishment Timeline

Activity	Approximate Date Completed
Acquire 500 acres in fee-title.	June 30, 2017
Restore portions of the acres purchased, as necessary.	June 30, 2017

Outcomes

Programs in forest-prairie transition region

- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands
- Water is kept on the land

Programs in prairie region

- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna
- Expiring CRP lands are permanently protected
- Improved condition of habitat on public lands
- Increased participation of private landowners in habitat projects
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands
- Remnant native prairies and wetlands are permanently protected and are part of large complexes of restored prairie, grasslands, and large and small wetlands
- Water is kept on the land

No parcels with an activity type protect and has buildings.

Section 3 - Other Parcel Activity

No parcels with an other activity type.

Minnesota Department of Natural Resources

500 Lafayette Road • St. Paul, MN • 55155-40

June 29, 2012

Mr. Jon Schneider, Manager
MN Conservation Programs
Ducks Unlimited
311 East Lake Geneva Road
Alexandria, Minnesota 56308-8906
jschneider@ducks.org

Dear Mr. Schneider:

I am writing this letter in support of your proposal for Minnesota Laws 2013 Lessard-Sams Outdoor Heritage Council funding consideration. Ducks Unlimited has a strong history of success and cooperation with many partners, including the Minnesota Department of Natural Resources (DNR), protecting and restoring high quality fish and wildlife habitats across the state. I look forward to your continued work with Division of Fish and Wildlife staff on DNR approved and prioritized lands for acquisition by Ducks Unlimited and eventual conveyance to the state of Minnesota for management as wildlife management areas (WMAs).

I wish you continued success in conservation efforts and with this proposal.

Sincerely,

COPY

Edward K. Boggess, Director
Division of Fish and Wildlife
DNR Building – 500 Lafayette Road
Saint Paul, Minnesota 5155-4020
651-259-5180
