

Fiscal Year 2015 Outdoor Heritage Fund Recommendations Bill Summary

The tables and figures that follow summarize the expected impacts of the appropriations recommended by the Lessard-Sams Outdoor Heritage Council for fiscal year 2015, the sixth year of outdoor heritage funding. The council recommended 42 proposals for funding, totaling \$109.32 million. * The data omit the expected impacts of the Conservation Partners Legacy grant programs, which are recommended for funding at \$8,550,000.

WHAT:

- The majority of activity 63% (34,183 out of 54,341 acres) is in enhancement and restoration, which incurs no PILT liability.
- The majority of funding (\$71,906,000 or 72%) is in acquisition. Of this amount, approximately 66% is fee acquisition and 33% in easement acquisition.
- PILT obligations from fee acquisition are estimated to be \$239,880.*
- Four entities (BWSR, DNR, MLT, and Dakota County) will hold almost \$1 million in easement stewardship funds for on-going monitoring and enforcement of conservation easements.
- A pilot program on best management practices to contain the spread of aquatic invasive species is recommended for \$4.04 million.
- 41.41 FTE (7% of total) will be funded with the appropriations. Of that figure, 16.09 FTE will be in state government, 21.34 in NGO, and 3.98 in local units of government.
- Outcomes associated with programs include
 - o improved aquatic indicators;
 - o remnant native prairies and wetlands are perpetually protected;
 - o protected, restored, and enhanced habitat for migratory waterfowl, upland birds, and species of greatest conservation need;
 - o forestlands are protected from development and fragmentation;
 - wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands; and
 - o core areas protected with highly biologically diverse wetland and plant communities, including native prairie, Big Woods, and oak savanna.

Acres by Activity - detailed tables on page 4

Funds by Activity - detailed tables on page 4

WHERE:

- The majority of activity (58%) and funding (54%) recommended will be focused on the prairie and prairie transition areas of the state and supports the goals and objectives of the Minnesota Prairie Plan.
- Almost 2,000 acres of native prairie is anticipated to be acquired and 7,000 acres of native prairie will be restored and enhanced with these recommendations.
- Forests in the northern and southeastern regions of the state are anticipated to see 42% of the activity with 29% of the recommended funds dedicated to this activity.
- 12% of the activity will be in the metro/urbanizing area, constituting 17% of funding recommended. (This figure does not include the Conservation Partners Legacy Metro area grant program, recommended for \$4 million.)
- 140 miles of shoreline will be restored, enhanced and/or protected.

Acres by ecological section

Funds by ecological section

WHO:

- Organizations recommended to receive funding include three park units, three watershed districts, one conservation district, four counties, one tribe, two state agencies, and thirteen non-governmental organizations.
- The continued investment in robust on-going programs constitutes 73% of the recommendations, including Metro Big Rivers, Ph. V, Living Shallow Lakes and Wetlands Initiative, Ph. IV, and Minnesota Prairie Recovery Project, Ph. V.*

- Over 25% of recommended programs involve two or more entities working in partnership to leverage resources to accomplish conservation objectives.
- Investments in public and private conservation partnerships involve 11 programs, which brings over \$35 million of leverage into play.
