

# Lessard-Sams Outdoor Heritage Council

## Laws of Minnesota 2014 Accomplishment Plan

**Date:** October 22, 2013

**Program or Project Title:** DNR Grassland Phase 6-Keep

**Funds Recommended:** \$ 1,530,000

**Manager's Name:** Mike Tenney

**Title:**

**Organization:** DNR Wildlife

**Street Address:** 500 Lafayette Rd

**City:** St. Paul, MN 55155

**Telephone:** 651-259-5230

**E-Mail:** michael.tenney@state.mn.us

**Organization Web Site:**

**Legislative Citation:**

**Appropriation Language:**

**County Locations:** Anoka, Becker, Beltrami, Big Stone, Blue Earth, Brown, Carver, Clay, Clearwater, Dakota, Douglas, Fillmore, Goodhue, Grant, Houston, Hubbard, Kandiyohi, Kittson, Lac qui Parle, Lyon, Mahnommen, Marshall, Meeker, Mille Lacs, Morrison, Nicollet, Norman, Olmsted, Otter Tail, Polk, Pope, Red Lake, Redwood, Roseau, Scott, Sherburne, Stevens, Swift, Todd, Traverse, Wabasha, Washington, Wilkin, Winona, and Yellow Medicine.

**Ecological Planning Regions:**

- Forest / Prairie Transition
- Metro / Urban
- Prairie
- Southeast Forest

**Activity Type:**

- Enhance
- Restore

**Priority Resources Addressed by Activity:**

- Prairie

### Abstract:

Restoration and Enhancement of Prairie on WMA's, SNA's, AMA's and Native Prairie Banks in Minnesota.  
Restoration and Enhancement of Bluff Prairies on State Forest Land in Southeast Minnesota.

### Design and Scope of Work:

Minnesota's Wildlife Management Area system, started in 1951, has over 60 years of support . Over 1.3 million acres of habitat in over 1,400 WMAs are protected by the DNR. Restoration and enhancement of habitat on WMA's are core management principles. These networks provide diverse year-round food and cover for local wildlife, as well as resources for migratory wildlife. The Minnesota Prairie Conservation Plan stresses strategic habitat complexes that provide multiple benefits including water quality improvements, seed sources and local economic

diversity.

Minnesota's Aquatic Management Area system was instigated in 1992. Over 800 miles of important shoreline fish and wildlife habitat have been protected, restored and enhanced. This proposal includes an additional 2000 acres of grassland enhancement projects on AMA's

Minnesota's Scientific and Natural Area program, created by the 1969 Minnesota Legislature, currently a practices being applied with this proposal have been proven to provide desired outcomes on existing state managed lands. Through this funding, the state will be able to accelerate restoration and enhancement habitat improvements on state land and lands protected by permanent easement thereby providing for improved critical wildlife habitat and a more functional prairie landscape. Habitat improvement actions enhance existing degraded habitat to directly increase the productivity of nesting habitat for pheasants, waterfowl and a variety of non-game grassland species such as meadowlarks, longspurs, Species of Greatest Conservation Need and a suite of critical pollinator species.

Although Minnesota DNR has the training and know-how to restore high quality prairie vegetation current funding has been insufficient to meet all needs. Many sites on state lands are currently not being actively managed to full potential. Furthermore exotic and/or invasive plants are encroaching into them. Woody cover encroachment is an especially troublesome problem. Enhancement and restoration of prairie requires periodic disturbance such as prescribed burning, conservation grazing, haying, inter-seeding grasslands with native species, and up to five years post-seeding management. Newly acquired areas and state-owned marginal croplands also need to be seeded and treated. Harvesting and using high quality seed from established prairie sites to plant at other locations has proven to be highly cost-effective.

WMA Habitat Work (2080 acres over 4 years) - Total \$489,500

Grassland restoration and enhancement work will be through techniques such as brush and tree removal, bareground seeding, grassland conversion, chemical treatment, mowing, inter-seeding, conservation grazing and burning. Seed will be obtained via harvesting of local native or restored prairie when possible and purchase of seed from vendors when necessary (following Operational Order 124). DNR will contract much of this work. Seed mixes used for prairie restoration and enhancement will be adequately diverse to provide pollinator habitat throughout the growing season. All other work will be done using Best Management Practices to ensure pollinator habitat consistent with MN Statute 84.973. This portion of the plan contains \$24,000 for 4.7 miles of perimeter fence facilitating conservation grazing enhancements to Wildlife Management Areas in Big Stone and Swift Counties.

AMA Habitat Work (1040 acres over 4 Years)-Total \$138,815

Grassland enhancement will be through techniques such as grassland conversion, interseeding, chemical treatment, mowing and invasives control. As above, seed source and diversity will be via DNR Operational Order 124 and will address MN Statute 84.973.

Ecological and Water Resources Habitat Work (approximately 3790 acres over 4 years) - Total \$901,600

Restoration of prairie will occur on 15 acres of severely altered lands by reconstructing native plant communities. These restorations are either in-holdings within a native prairie, or lands surrounding a native prairie. Seed will be collected from native prairies adjacent to the restorations or purchased from vendors with local seed sources. Seed mixes will be adequately diverse to provide pollinator habitat throughout the growing season. These restorations will expand existing prairie habitat and buffer native prairies from the impacts of adjacent land uses. Funding requested for restoration projects will cover all costs and activities associated with reconstructing a prairie including project design, seedbed preparation, seed harvest, seed installation, and first year weed control. Prairie enhancement activities will be implemented on 3790 acres of existing SNA's, State Forest Land and Prairie Bank Easement sites. Funding requested for enhancement projects will cover all project costs and activities including project design, contract administration, staff time, equipment and supplies. These enhancement activities will focus on native prairies, but may include some restored prairies within the project sites. Many of these native prairie sites harbor rare and unique features, or are located on steep terrain, which require low impact management techniques (e.g. hand cutting of woody encroachment). These specialized prairie management techniques, and the skilled crews that implement them, can incur higher costs than similar lower diversity grassland projects.

Restoration and enhancement practices will be designed and administered by DNR staff, while implementation will use a combination of DNR staff and contracted services. There is a backlog of management needs on DNR administered lands and implementation of restoration and enhancement can begin immediately upon receipt of

funds. Restoration and enhancement projects would be completed by the end of FY 18.

## Planning:

### **MN State-wide Conservation Plan Priorities:**

- H5 Restore land, wetlands and wetland-associated watersheds
- H7 Keep water on the landscape

### **Plans Addressed:**

- Driftless Area Restoration Effort
- Grassland Conservation Plan for Prairie Grouse
- Long Range Duck Recovery Plan
- Long Range Plan for the Ring-Necked Pheasant in MN
- Minnesota DNR Nongame Wildlife Plans
- Minnesota DNR Scientific and Natural Area's Long Range Plan
- Minnesota DNR Strategic Conservation Agenda
- Minnesota Prairie Conservation Plan
- Outdoor Heritage Fund: A 25 Year Framework
- Partners in Flight Grassland Bird Plan
- Tomorrow's Habitat for the Wild and Rare
- U.S. Prairie Pothole Joint Venture Plan

### **LSOHC Statewide Priorities:**

- Address Minnesota landscapes that have historical value to fish and wildlife, wildlife species of greatest conservation need, Minnesota County Biological Survey data, and rare, threatened and endangered species inventories in land and water decisions, as well as long-term or permanent solutions to aquatic invasive species
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work; provides the most cost-effective use of financial resources; and where possible takes into consideration the value of local outreach, education, and community engagement to sustain project outcomes
- Produce multiple enduring conservation benefits
- Restore or enhance habitat on permanently protected land

### **LSOHC Forest Prairie Transition Section Priorities:**

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife
- Protect, enhance, and restore rare native remnant prairie
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

### **LSOHC Metro Urban Section Priorities:**

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna with an emphasis on areas with high biological diversity

### **LSOHC Prairie Section Priorities:**

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna
- Restore or enhance habitat on public lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase

migratory and breeding success

### **LSOHC Southeast Forest Section Priorities:**

- Protect, enhance, and restore remnant goat prairies

### **Relationship to Other Constitutional Funds:**

- No Relationships Listed

### **Accelerates or Supplements Current Efforts:**

This restoration and enhancement proposal plans for work on Wildlife Management Areas and Aquatic Management Areas that is supplemental to normal work load. WMA Conservation grazing contracts (Cooperative Farming Agreements or Agricultural Leases) will add needed disturbance regimes and will build and strengthen community relationships. SNA and Prairie Bank restoration and enhancement will improve structural and species diversity for this extremely important and rare prairie habitat.

### **Sustainability and Maintenance:**

WMA and AMA

Routine maintenance will be accomplished by Area and Fisheries and Wildlife staff as part of their public land management responsibilities within future operating budgets. Cooperative Farming Agreement barter will allow for some maintenance to perimeter grazing fences. Periodic enhancements such as invasive species removal, prescribed burning, or supplemental vegetation planting will be accomplished through annual funding requests from a variety of funding sources including but not limited to Game and Fish Fund, Bonding, Gifts, Federal Sources, Environmental Trust Fund, and Outdoor Heritage Fund.

SNAs

The Division of Ecological and Water Resources and its protection, restoration, and enhancement activities are supported largely by special project funds. The ongoing maintenance of SNA administered lands requires the program to continually seek additional funds to perform its mission. In the future the SNA program will continue to seek Outdoor Heritage Funds as well as other project appropriations to protect, restore, and enhance natural areas.

### **Permanent Protection:**

*Is the activity on permanently protected land and/or public waters per MS 103G.005, Subd. 15? - **Yes (WMA, SNA, AMA, Private Land, State Forests)***

### **Accomplishment Timeline**

<b>Activity</b>	<b>Approximate Date Completed</b>
WMA Restoration and Enhancement Habitat Work	6/30/18
SNA and Prairie Bank Easement Restoration and Enhancement and SE Bluff Prairie Enhancement.	6/30/18
AMA Enhancement Habitat Work	6/30/18

## Outcomes

### Programs in forest-prairie transition region:

- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need *Grassland monitoring project by DNR Fish and Wildlife and Ecological and Water Resources, waterfowl and farmland wildlife surveys*
- Remnant native prairies are part of large complexes of restored prairies, grasslands, and large and small wetlands *Remnant prairie protection is the primary goal of the Prairie Plan and will be monitored yearly.*

### Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need *The relative location of, and habitat enhancement success on public land in the Metropolitan Urbanizing region will be reported upon completion.*

### Programs in southeast forest region:

- Remnant bluff prairies will be enhanced and expanded through the elimination of competing woody invasive species. EWR staff will monitor the progress of enhancement contracts.

### Programs in prairie region:

- Improved condition of habitat on public lands *FAW and EWR restoration and enhancement project completion reports prepared annually*
- Protected, restored, and enhanced habitat for migratory and unique Minnesota species *Habitat enhancement projects in the threatened Prairie region of the state will provide added species diversity and added structural diversity to benefit multiple grassland plant and animal species.*

# Budget Spreadsheet

*Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan*

**Total Amount of Request: \$ 1530000**

## Parcel List

*For restoration and enhancement programs ONLY: Managers may add, delete, and substitute projects on this parcel list based upon need, readiness, cost, opportunity, and/or urgency so long as the substitute parcel/project forwards the constitutional objectives of this program in the Project Scope table of this accomplishment plan. The final accomplishment plan report will include the final parcel list.*
