

# Lessard-Sams Outdoor Heritage Council

## Laws of Minnesota 2015 Accomplishment Plan

**Date:** October 20, 2014

**Program or Project Title:** Northern Tallgrass Prairie National Wildlife Refuge Land Acquisition - Phase VI

**Funds Recommended:** \$ 3,430,000

**Manager's Name:** Richard Johnson  
**Organization:** The Nature Conservancy  
**Address:** 1101 W. River Parkway  
**Address 2:** Suite 200  
**City:** Minneapolis, MN 55415  
**Office Number:** 612-331-0790  
**Fax Number:** 612-331-0770  
**Email:** rich\_johnson@tnc.org  
**Website:** nature.org

**Legislative Citation:**

**Appropriation Language:**

**County Locations:** Becker, Beltrami, Big Stone, Blue Earth, Brown, Chippewa, Clay, Clearwater, Cottonwood, Douglas, Fairbault, Freeborn, Grant, Jackson, Kandiyohi, Kittson, Lac qui Parle, Le Sueur, Lincoln, Lyon, Mahnomen, Marshall, Martin, McLeod, Meeker, Murray, Nicollet, Nobles, Norman, Otter Tail, Pennington, Pipestone, Polk, Pope, Red Lake, Redwood, Renville, Rock, Roseau, Sibley, Stearns, Steele, Stevens, Swift, Traverse, Waseca, Watonwan, Wilkin, and Yellow Medicine.

**Regions in which work will take place:**

- Prairie

**Activity types:**

- Protect in Easement
- Protect in Fee

**Priority resources addressed by activity:**

- Prairie

### Abstract:

The Nature Conservancy and US Fish and Wildlife Service will cooperate to permanently protect native prairie and associated complexes of wetlands and other native habitats in western Minnesota by purchasing 1,090 acres of fee title properties and/or habitat easements.

### Design and scope of work:

The Council's 25-Year Framework identifies the protection of Minnesota's remaining native prairies as a critical priority. Only a small portion of this once vast prairie still exists. The Minnesota Biological Survey identified approximately 235,000 acres of remaining native grasslands. Of these, about half are without permanent protection and are still in danger of conversion. Waterfowl, grassland birds and the other wildlife depend on these lands and the surrounding shallow lakes, wetlands, and grasslands. It's vital that we protect and buffer these remnant native prairies before they are lost.

The Northern Tallgrass Prairie National Wildlife Refuge (Refuge) was established in 2000 to help meet this need. The Refuge's mission is to preserve, restore, and manage a portion of the remaining northern tallgrass prairie and associated habitats at widespread locations

through the western Minnesota and northwestern Iowa historic range. The number of acres purchased, however, has been limited by shortfalls in acquisition funding since the establishment of this refuge. The current land acquisition budget cannot keep up with landowner interest in this program.

Funding from the Outdoor Heritage Fund will allow the US Fish and Wildlife Service (USFWS or Service) and The Nature Conservancy (TNC) to significantly accelerate this work. The Service and TNC will cooperate on purchasing approximately 1,090 acres of native prairie and associated habitat in the 49 Minnesota counties included in the refuge boundary. Approximately 545 acres will be fee title acquisitions and 545 acres will be protected with permanent habitat easements. When available, high quality fee title tracts will be the top priority for acquisition. Funding, however, may also be used to purchase habitat easements.

The majority of the lands protected will consist of native prairie and associated native habitats including lakes, streams, wetlands, and other native habitat. Because of the nature of parcel ownership, some of the acreage will likely include smaller areas of converted or degraded lands needing grassland or wetland restoration. Restoration of these lands will be completed where needed.

The Service and TNC biologists and analysts use the following criteria when setting project priorities: 1) Native prairie on all or most of the tract, or adjacency to existing native prairie, 2) Within core areas or critical corridors identified in the Minnesota Prairie Conservation Plan, 3) Near existing complexes of protected land, 4) Land with greater habitat and species diversity, or hosting unique species, 5) Suitability for public recreation, 6) Avoiding existing structures. The presence of native prairie is the most significant factor considered. The others are weighed in roughly the order shown.

The development of the Northern Tallgrass Prairie Refuge is guided by the Northern Tallgrass Prairie Habitat Protected Area Environmental Impact Statement listed below. The process of putting this statement together involved 75 meetings with more than 2,000 participants. These meetings included 10 open houses attended by 360 people. Over the past 15 years, the Refuge has become a familiar and accepted part of the landscape in western Minnesota. Widespread landowner interest in being part of this program is evidence of this.

The success of earlier phases of this program demonstrates that we can make a significant impact. This program purchased its first property less than 15 months ago. Since then, progress has been rapid. 1,356 acres have been added to the Refuge – 570 acres of fee purchases, and 786 acres of habitat easements. Of this, 870 acres are classified as native prairie. This has been achieved at an average cost of approximately \$1,820 per acre. The Service and TNC are working with landowners to finish acquiring 1,310 additional acres with 714 acres of native prairie. We are talking with 20 additional landowners owning more than 3,000 acres and 1,750 acres of native prairie. With sufficient funding, this program has the potential to significantly increase the percentage of Minnesota's remaining native prairies that are permanently protected.

## Crops:

Will there be planting of corn or any crop on OHF land purchased or restored in this program - **Yes**

Explain

No food plots will be established on OHF acquired properties. Short-term use of agricultural crops is an accepted Best Practice for prepping a site for prairie restoration. Occasional use of corn or soybeans could be used for restorations in order to control weed seedbeds prior to prairie plantings. We would not expect agricultural crop use to exceed 3 years on any given OHF acquired property. If needed, GMO treated crops may be used. No neonicotinoid-treated seed will be planted.

Are any of the crop types planted GMO treated - **Yes**

## How does the request address MN habitats that have: historical value to fish and wildlife, wildlife species of greatest conservation need, MN County Biological Survey data, and/or rare, threatened and endangered species inventories:

The Outdoor Heritage Fund's 25-Year Framework identifies the perpetual protection of remnant native prairie as a key priority for the Prairie areas of the state. This program directly addresses that need. The presence of native prairie is the most important criteria for deciding which properties will be protected. Over 64% of the acres acquired in earlier phases of this program are native prairie. The majority of the acres protected in this phase will be native prairie and associated native habitats such as wetlands. In addition, the Framework emphasizes the importance of buffering these prairies in larger complexes of grasslands and wetlands. This program's second and third criteria for project selection are: 1) Working in the cores and critical corridors identified in the Minnesota Prairie Conservation Plan and 2) Proximity to other protected lands.

## What is the nature of urgency and why it is necessary to spend public money for this work as soon as possible:

Approximately 235,000 acres of Minnesota's native prairie remain and only about half are permanently protected. These lands continue to be threatened by conversion to other uses like row-crop production, gravel mining, and development. This funding will allow us to protect more of these lands before they are lost.

### Describe the science based planning and evaluation model used:

This program's overall priorities are guided by the listed conservation plans. Individual properties are reviewed by Service and TNC biologists using the parcel selection criteria above. Their analysis includes: native prairie, location in a prairie core or corridor, nearby protected lands, and the presence of other rare habitats and species.

### Which sections of the Minnesota Statewide Conservation and Preservation Plan are applicable to this project:

- H1 Protect priority land habitats
- H5 Restore land, wetlands and wetland-associated watersheds

### Which other plans are addressed in this proposal:

- Minnesota Prairie Conservation Plan
- Northern Tallgrass Prairie Habitat Preservation Area (HPA) Final Environmental Impact Statement

### Which LSOHC section priorities are addressed in this proposal:

#### Prairie:

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna

### Relationship to other funds:

- Not Listed

### How does this proposal accelerate or supplement your current efforts in this area:

This program significantly accelerates conservation work in Minnesota's prairie region. Since the establishment of the Northern Tallgrass Prairie Refuge in 2000, USFWS has received \$6,320,000 in acquisition funding from Federal Land and Water Conservation Funds. These appropriations have averaged \$500,000 annually with no funding available in some years. Over 15 years, this level of funding has allowed the Service to purchase fee title and easement interests in approximately 5,300 acres. Outdoor Heritage funding for earlier phases of this Land Acquisition program have already allowed protection of 1,356 acres with an additional 2,200 acres pending – an increase of over 65% in the area protected. If approved, this phase will allow us to increase this by an additional 1,090 acres.

### Describe the source and amount of non-OHF money spent for this work in the past:

Appropriation Year	Source	Amount
ML 2010	TNC	33500
ML 2010	USFWS	308000
ML 2011	TNC	7500
ML 2011	USFWS	7500
ML 2012	TNC	2500
ML 2012	USFWS	25500

### How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Outdoor Heritage Funds will be used to purchase the land in fee title or to purchase perpetual habitat easements. The land and easements purchased will be transferred to the Service to become units of the Northern Tallgrass Prairie NWR. Long term costs for restoration, management, and wildlife and habitat monitoring will be funded through annual Service operations funding. Habitat easements are perpetual and Service managers will work with landowners to maintain and, where needed, restore the native prairie on each tract of land.

## Explain the things you will do in the future to maintain project outcomes:

Year	Source of Funds	Step 1	Step 2	Step 3
Annually	USFWS - Annual Service Operating Funds	Monitoring and management by Service managers, biologists, field and realty staffs to ensure the long-term health of these habitats. Activities may include burning, mechanical, biological, and sometimes chemical treatments.		

## Activity Details:

If funded, this proposal will meet all applicable criteria set forth in MS 97A.056 - **Yes**

Will local government approval be sought prior to acquisition - **No**

Local government approval will not be sought on each individual tract of land. Acquisition goals have gone through a public review process which occurred during the development of the final Environmental Impact Statement by the US Fish and Wildlife Service as required by the National Environmental Policy Act during refuge establishment.

Is the land you plan to acquire free of any other permanent protection - **Yes**

Is this land currently open for hunting and fishing - **No**

Will the land be open for hunting and fishing after completion - **Yes**

Lands acquired in fee will be open to the public taking of fish and game during the open season according to the National Wildlife Refuge System Improvement Act, United States Code, title 16, section 668dd, et seq.

Will the eased land be open for public use - **No**

Is the land you plan to acquire free of any other permanent protection - **Yes**

## Accomplishment Timeline:

Activity	Approximate Date Completed
Identify priority acquisitions (fee and easement)	June 30, 2018
Appraisals, environmental assessments, and surveys completed	June 30, 2018
Purchase agreements finalized	June 30, 2018
Acquisitions completed	June 30, 2018
Grassland/wetland restoration and enhancement	June 30, 2018

**Date of Final Report Submission:** 9/30/2019

## Federal Funding:

Do you anticipate federal funds as a match for this program - **Yes**

Are the funds confirmed - **Yes**

[Documentation](#)

What are the types of funds?

**In-Kind Match** - \$142000

## Outcomes:

### Programs in prairie region:

- Remnant native prairies are part of large complexes of restored prairies, grasslands, and large and small wetlands *This program's top priority is protecting native prairie. The majority of lands acquired will be native prairie and associated native habitats such as wetlands. The*

*parcel selection criteria described above also favor properties located within prairie/grassland/wetland complexes identified in the Minnesota Prairie Conservation Plan and near existing protected land. The goal is to sustainably protect and buffer native prairies and associated habitats within a context of protected grasslands, wetlands, and other habitats. Results will be reported for the number of acres of native prairie, wetlands, and other native habitats protected and how these properties are connected to other protected lands.*

# Budget Spreadsheet

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan

**How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount**

Because this is an ongoing program, outcomes will be reduced proportionally to the difference between the requested and recommended amounts. The original goal for acres was 2,000. This is now reduced to 1,090.

**Total Amount of Request: \$ 3430000**

## Parcel List

For restoration and enhancement programs ONLY: Managers may add, delete, and substitute projects on this parcel list based upon need, readiness, cost, opportunity, and/or urgency so long as the substitute parcel/project forwards the constitutional objectives of this program in the Project Scope table of this accomplishment plan. The final accomplishment plan report will include the final parcel list.

### Section 1 - Restore / Enhance Parcel List

No parcels with an activity type restore or enhance.

### Section 2 - Protect Parcel List
