

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2015 Accomplishment Plan

Date: October 14, 2014

Program or Project Title: Cannon River Watershed Habitat Complex - Phase V

Funds Recommended: \$ 1,380,000

Manager's Name: Danielle Salus

Title: Project Manager

Organization: The Trust for Public Land

Address: 2610 University Avenue, W

Address 2: Suite 300

City: Saint Paul, MN 55127

Office Number: 651-999-5325

Email: danielle.salus@tpl.org

Website: www.tpl.org

Legislative Citation:

Appropriation Language:

County Locations: Le Sueur, and Rice.

Regions in which work will take place:

- Prairie

Activity types:

- Protect in Fee

Priority resources addressed by activity:

- Forest
- Habitat
- Prairie
- Wetlands

Abstract:

Protect approximately 276 acres in and near the Cannon River Watershed, including wetlands, prairies, Big Woods forest, and river and shallow lake shoreline to reverse habitat loss, improve watershed function and provide access.

Design and scope of work:

The Cannon River Watershed Habitat Complex Phase V effort will prevent degradation and loss of quality and diversity of habitat in the prairie section of the State as well as degradation of water quality in the Cannon River watershed. In addition, it will increase the amount of available public lands for hunting and angling opportunities, especially within an easy drive for over half of the state's population.

Located south of the Twin Cities metro in an area that has seen development pressure due to the I-35 corridor and the Cannon Lakes, much of this area has already suffered fragmentation and habitat loss. Historically inhabited by Big Woods, the landscape is now dominated by agricultural fields and, to a lesser extent, development. Agricultural practices and shoreline development are also the major contributors to the impaired status of stretches of the Cannon River and its associated lakes and streams.

This conservation effort is part of a multi-year effort that includes acquisition, protection, and restoration of core parcels of land that will contribute to a large complex of restored prairies, grasslands, wetlands, lakeshore, and river shoreline.

The DNR's Southern Region Conservation Focus Area assessment tool ranked the Cannon River area as having the highest level of inter-divisional conservation priority when examined at the landscape level. Acquisitions are targeted toward existing large wetland/upland complexes, rare communities (Big Woods forest, tamarack swamp), shallow lakes, river shoreline, and lands adjacent to existing protected areas. Restoration work will be focused on the degraded portions of the lands acquired (approximately 65 acres) and will include restoration of agricultural fields near wetlands, lakes, rivers and existing protected areas to native habitat. There is an effort underway which involves several partners (including The Cannon River Watershed Partnership and MN DNR) to procure funding for landscape planning in the Cannon River watershed. This effort may be able to help the Partnership further identify priority conservation opportunities and protection strategies for high biodiversity areas.

Protection and restoration of these significant parcels will provide critical habitat for game species, including migratory waterfowl (mallards, canvasback, wood ducks, hooded mergansers, pintails, and lesser scaup), upland birds (dove, turkey, pheasant, and woodcock), deer, and fish (northern pike, black crappies, bluegills, and walleye). Protection will also provide access for a diversity of recreational experiences including duck, pheasant, turkey and deer hunting as well as river, stream, and lake fishing. A host of non-game wildlife, including Species in Greatest Conservation Need, likely to benefit from this protection and restoration work includes Bald Eagle, Bell's Vireo, Cerulean Warbler, Loggerhead Shrike, Sandhill Crane, Red-headed Woodpecker, Greater Yellowlegs, Buff-breasted Sandpiper, Short billed Dowitcher, Blanding's Turtle, Mudpuppies, and the Giant Floater, a species of freshwater mussel.

Protecting and restoring vegetative cover within basins and the riparian areas of the lakes, rivers and streams in this focus area will also help protect water quality by reducing surface water runoff and by providing ecological services such as infiltration through natural buffers to our waterways. All wildlife-and humans –will benefit from improved water quality.

Work will be completed in phases depending on funding availability and landowner willingness to sell. Properties targeted for acquisition and restoration as part of this Phase V request to LSOHC (FY16) include the following:

Dora Lake WMA tracts 2 & 5 (Le Sueur County)

These lands build on the 510-acre Dora Lake WMA property that was created with FY 12 Outdoor Heritage Funds. This large upland-wetland complex with a mosaic of native plant types contains Minnesota County Biological Survey (MCBS)-identified native habitat including a portion of remnant Big Woods, some southern-most occurrence of tamarack swamp in the state, and over 2 miles of naturally flowing Cannon River, directly upstream from a concentration of rare freshwater mussels.

Boyd Sartell WMA – tract 3 (Rice County)

This tract contains diverse marsh habitats and uplands consisting of oak islands and grassy knolls, Big Woods and tamarack forests, and over ¼ mile of the headwaters of the Cannon River. It will add additional habitat for a variety of wildlife and provide greater connectivity to the tract 5 parcel that this program acquired with OHF funding last fall.

Le Tamaracque WMA (addition) – tract 28 (Rice County)

These 200 acres of rolling terrain with grasslands, forest and wetlands riparian to the Cannon River are located within a 1000-acre complex of MCBS identified habitat with high biodiversity significance. Rare communities include Big Woods, some of the southern-most occurrence of Tamarack Swamp in the state, and mixed emergent marsh and prairie.

Caron Lake WMA (new) – tracts 4,5,6,7 and 8 (Rice County)

These 260 acres of croplands, grasslands, forest and wetlands include lands riparian to the shallow Caron Lake and an unditched tributary, Devil's Creek, which is rare in this area of the state. The property is adjacent to the Caron Lake Aquatic Management Area, and contains approximately ½ mile frontage on Caron Lake.

Kelley Dudley WMA/AMA (new)

This land encompasses approximately 240 acres between French Lake and Kelley Dudley Lake in Rice County, with 1400 feet of shoreline along Kelley-Dudley Lake. Kelley-Dudley Lake is a deep and clear lake, with a relatively undisturbed shoreline and forested riparian zone. Wild rice in the lake provides important feeding ground for waterfowl. Acquisition of this parcel presents an opportunity to protect a pristine lake and quality fishery.

The Cannon River Headwaters Habitat Complex effort is supported by the Cannon River Watershed Partnership, the Dark House Anglers Southern Chapter, the Izaak Walton League Owatonna Chapter, Minnesota Deer Hunters Association South Central Prairieland Bucks Chapter (Le Sueur, Rice, Waseca, and Steele Counties), Minnesota Waterfowl Association – Scott-Le Sueur Chapter, Montgomery Sportsmen's Club, the Minnesota Department of Natural Resources, Pheasants Forever – Le Sueur County Chapter, the Tri-Lake Sports Club, Waterville Sportsman's Club, and the United States Fish and Wildlife Service.

Crops:

Will there be planting of corn or any crop on OHF land purchased or restored in this program - **No**

How does the request address MN habitats that have: historical value to fish and wildlife, wildlife species of greatest conservation need, MN County Biological Survey data, and/or rare, threatened and endangered species inventories:

All of the areas targeted by the Trust for Public Land have been identified and prioritized through state, regional and local natural resource plans due to their high biodiversity and connectivity. The Cannon River watershed includes Big Woods, oak savannas, wetlands and sensitive shorelines, which provide habitat for a variety of Species of Greatest Conservation Need.

What is the nature of urgency and why it is necessary to spend public money for this work as soon as possible:

Sensitive land in the Cannon River Watershed continues to be converted to rural residential development and agricultural production. Protection and proper stewardship of high natural resource land is important for maintaining what is left of the region's unimpaired waters. Protecting this land is critical before it becomes degraded.

Describe the science based planning and evaluation model used:

The project uses the Minnesota Biological Survey, and GIS mapping to identify priority lands for protection and restoration. We are optimistic that if watershed wide landscape planning efforts are successful, we will be able to dialogue with partner organizations and further identify lands in need of protection.

Which sections of the Minnesota Statewide Conservation and Preservation Plan are applicable to this project:

- H1 Protect priority land habitats
- H2 Protect critical shoreland of streams and lakes

Which other plans are addressed in this proposal:

- Minnesota's Wildlife Management Area Acquisition - The Next 50 Years
- Outdoor Heritage Fund: A 25 Year Framework

Which LSOHC section priorities are addressed in this proposal:

Prairie:

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes

Relationship to other funds:

- Not Listed

This effort is seeking the significant portion of funding for acquisition and restoration work from the Outdoor Heritage Fund. Past matching funds have been provided from the Environmental and Natural Resources Trust Fund as part of the Statewide Habitat Corridors Partnership. The Cannon River Watershed Habitat Complex partners will continue to try to seek additional restoration funds from the Clean Water Fund.

How does this proposal accelerate or supplement your current efforts in this area:

LSOHC funding would provide capital for the land acquisition and funding for the restoration work included in this proposal. These costs are not included in the Trust for Public Land's organizational budget. Additionally, TPL staff time, legal costs and costs for appraisals, title, environmental investigation, and survey work is not included in this request. Acquisition associated costs incurred by the DNR as part of accepting ownership of these lands are not included in the request. The LSOHC funding will not substitute for any traditional funding sources.

Describe the source and amount of non-OHF money spent for this work in the past:

Appropriation Year	Source	Amount
2009	ENTRF	350,000
2010	ENTRF	200,000
2010	RIM	105,000
2011	RIM	200,000
2012	N/A	N/A

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Once the Cannon River Watershed Habitat Complex lands have been acquired and conveyed to the DNR to be managed as a WMA and/or AMA, initial site development and restoration of these lands will begin. Estimated costs for the restoration work are included in this proposal. The Trust for Public Land will work with DNR to complete a restoration plan and implementation of that plan will be completed in the following years. The property will be managed for the long term as a WMA and/or AMA and will be maintained by the Minnesota DNR according to their WMA and AMA guidelines.

Explain the things you will do in the future to maintain project outcomes:

Year	Source of Funds	Step 1	Step 2	Step 3
2016	OHF and DNR Fish and Wildlife	Post property as DNR WMA or AMA	Develop restoration/management plan for property	
2017	DNR Fish and Wildlife	Develop restoration/management plan for property	Restore and steward property for habitat and public recreation	
2018	DNR Fish and Wildlife	Restore and steward property for habitat and public recreation		

Activity Details:

If funded, this proposal will meet all applicable criteria set forth in MS 97A.056 - **Yes**

Will local government approval be sought prior to acquisition - **No**

Notification will be made unless otherwise required

Is the land you plan to acquire free of any other permanent protection - **Yes**

Is this land currently open for hunting and fishing - **No**

Will the land be open for hunting and fishing after completion - **Yes**

N/A

Accomplishment Timeline:

Activity	Approximate Date Completed
Landowner negotiations, agreements and due diligence	June 30, 2017
Land acquired	June 30, 2017
Initial site development/restoration	Fall 2018

Date of Final Report Submission: 2/1/2018

Federal Funding:

Do you anticipate federal funds as a match for this program - **No**

Outcomes:

Programs in prairie region:

- Key core parcels are protected for fish, game and other wildlife *Core parcels are identified in partnership with the DNR as well as the partners of the Cannon River Watershed Habitat Complex. Protected lands will be measured in acres.*

Budget Spreadsheet

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan

How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount
