

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2020 Accomplishment Plan

Date: December 18, 2019

Program or Project Title: Northern Tallgrass Prairie National Wildlife Refuge, Phase XI

Funds Recommended: \$ 2,677,000

Manager's Name: Ruth Thornton
Organization: The Nature Conservancy
Address: 1101 West River Parkway
Address 2: Suite 200
City: Minneapolis, MN 55415
Office Number: 6123310790
Email: ruth.thornton@tnc.org

Legislative Citation: ML 2020, Ch. X, Art. 1, Sec. 2, subd XX

Appropriation Language:

County Locations: Becker, Big Stone, Brown, Chippewa, Clay, Cottonwood, Grant, Jackson, Kandiyohi, Kittson, Lac qui Parle, Lincoln, Lyon, Mahnomen, Marshall, Murray, Nicollet, Nobles, Norman, Otter Tail, Pennington, Pipestone, Polk, Pope, Red Lake, Redwood, Renville, Rock, Roseau, Stearns, Stevens, Swift, Traverse, Wilkin, and Yellow Medicine.

Eco regions in which work will take place:

- Forest / Prairie Transition
- Prairie

Activity types:

- Protect in Easement
- Protect in Fee

Priority resources addressed by activity:

- Prairie

Abstract:

The Nature Conservancy and US Fish and Wildlife Service will work together to permanently protect native prairie and associated complexes of wetlands and native habitats in western and central Minnesota by purchasing approximately 725 acres of fee title properties and/or permanent habitat easements. Approximately 388 acres will be native prairie. Work will be focused in areas identified as having significant biodiversity by the Minnesota Biological Survey and/or the US Fish and Wildlife Service and located in priority areas in the Minnesota Prairie Conservation Plan.

Design and scope of work:

The Northern Tallgrass Prairie National Wildlife Refuge (Refuge) was established in 2000 to address the loss of America's grasslands and the decline of grassland wildlife. The Refuge was created to permanently preserve and restore a portion of our disappearing tallgrass prairie. The Refuge is authorized to work in the prairie landscapes of western Minnesota and northwestern Iowa.

To date, the Refuge has protected 11,400 acres in Minnesota. Funding from the Outdoor Heritage Fund (OHF) will allow The Nature Conservancy (TNC) and US Fish and Wildlife Service (USFWS), working in partnership, to significantly accelerate this progress. TNC and USFWS will cooperate on protecting approximately 725 acres of native prairie and associated habitat in the 49 Minnesota counties within the Refuge boundary. We expect to protect approximately 290 acres in fee title and approximately 435 acres with permanent

habitat easements.

This program's work is targeted at protecting high-quality native habitat in areas with existing concentrations of native prairie, wetlands, and protected lands. The lands protected will consist of native prairie and associated habitats including wetlands, streams, coulees, and lakes.

Potential acquisitions are reviewed using the following criteria:

- 1) Is there untilled native prairie on the tract? If not, is it adjacent to untilled native prairie?
- 2) Is the property in a priority area (core/corridor/complex) identified in the Minnesota Prairie Conservation Plan (Prairie Plan)?
- 3) Is it adjacent to an existing complex of protected land?
- 4) Was it identified by Minnesota Biological Survey (Biological Survey) or FWS biologists as having concentrations of threatened and endangered species and communities?
- 5) Is it suitable for public recreation?

Because of the nature of parcel ownership, some properties acquired through this program will likely include small areas of converted or degraded habitat needing restoration or enhancement work. Restoration and enhancement will be completed where needed. With this program's focus on native habitat, only a limited amount of cropland restoration has been required. The funds budgeted for this work are primarily for enhancement activities, including tree and brush removal, to prepare these properties for long-term, sustainable management.

Previous OHF support has allowed the partners to make significant progress towards our shared goal of protecting and buffering the remaining native prairie. The first property was acquired in March, 2013. Since then, 5,787 acres have been added to the Refuge with OHF funding. Of these, 3,400 acres (nearly 60%) are classified as untilled native prairie. Additional habitat includes more than 500 acres of wetlands, more than 10 miles of stream front, and more than 2 miles of lakefront. Offers have been extended to landowners for the protection of 215 additional acres. Talks are ongoing with a long list of interested landowners.

With additional support from the Outdoor Heritage Fund, this program will continue to make real and lasting progress towards protecting Minnesota's native prairies and the wildlife that depend on those lands.

How does the request address MN habitats that have: historical value to fish and wildlife, wildlife species of greatest conservation need, MN County Biological Survey data, and/or rare, threatened and endangered species inventories:

The NTP NWR program takes the approach that specific species are best protected by conserving high-quality habitat in the most critical prairie areas.

This focus on habitat quality has produced results. Of the 5,787 acres protected, 2,772 have been identified as having significant biodiversity by the Biological Survey. These high-quality lands provide habitat for a wide range of species, from game species to those that are endangered, threatened, or in greatest conservation need.

Biological Survey field work has identified populations of 28 rare species located wholly or partially on NTP NWR properties protected with OHF-funding. Benefited species include:

Birds – Henslow's sparrow (endangered), Wilson's phalarope (threatened), greater prairie-chicken, marbled godwit, short-eared owl, bald eagle, and yellow rail
Butterflies – Dakota skipper (endangered), Poweshiek skipperling (endangered), arogos skipper, Pawnee skipper, and regal fritillary
Fish - Topeka shiner (endangered)
Reptiles - Blanding's turtle (threatened)
Plants – sterile sedge (threatened), hair-like beak rush (threatened), blanket flower, buffalo grass, few-flowered spikerush, Hall's sedge, least moonwort, Missouri milk-vetch, mudwort, prairie mimosa, slender milk-vetch, slender plantain, small white lady's slipper, and western white prairie clover

Highlights this past year included the protection of a parcel with 1.8 miles feet of frontage on a stream identified as critical habitat for the Topeka Shiner (OHF-funding for this program has now protected almost 6 miles of habitat for this federally-listed species), a parcel with oxbow wetlands and a fen, and protection of more than 180 acres of untilled native prairie.

Future acquisition work will be guided by this same focus on high-quality, diverse habitat, benefiting a wide range of species.

Describe the science based planning and evaluation model used:

Biological Survey data is a critical part of this review. In addition to an evaluation based on the Minnesota Prairie Plan and location in a Prairie Core, Corridor, or Complex, every proposed project is evaluated using Survey information on: 1) native prairie sites, 2) rare,

threatened and endangered species locations, and 3) areas of biodiversity significance.

The selection criteria also recognize the importance of building on existing complexes and reducing fragmentation. If a prairie is small or isolated, the animal and plant species that live there are at risk. The best approach is conserving larger areas, like the Prairie Plan's cores/complexes/corridors, that have the scale, species diversity, and connectivity to support functioning prairie systems over the long-term.

The numbers shared above demonstrate this program's success at identifying and protecting biologically significant lands located in areas with existing complexes of habitat and protected lands.

Which sections of the Minnesota Statewide Conservation and Preservation Plan are applicable to this program:

- H1 Protect priority land habitats
- H5 Restore land, wetlands and wetland-associated watersheds

Which other plans are addressed in this program:

- Minnesota Prairie Conservation Plan
- Northern Tallgrass Prairie Habitat Preservation Area (HPA) Final Environmental Impact Statement

Which LSOHC section priorities are addressed in this program:

Forest / Prairie Transition:

- Protect, enhance, and restore rare native remnant prairie

Prairie:

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna

Relationship to other funds:

- Not Listed

Does this program include leverage in funds:

Yes

This proposal includes \$224,000 in leverage. The USFWS has committed \$78,000 of in-kind staff support from USFWS field staff. A letter has been provided from the USFWS confirming these funds. This phase also includes \$86,000 of support from TNC, covering the unrecovered portion of Direct Support Services (DSS) with private funds. Finally, this round includes \$60,000 in leverage from a Pheasants Forever (PF) North American Wetlands Conservation Act (NAWCA) grant for fee and easement acquisition in western Minnesota. For the four completed rounds of this program, we have exceeded our original leverage estimates by over 20%. We hope to continue that success in this round.

Per MS 97A.056, Subd. 24, Any state agency or organization requesting a direct appropriation from the OHF must inform the LSOHC at the time of the request for funding is made, whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose:

This project does not substitute or supplant any previous funding. The work described in this proposal would not be funded or completed without this appropriation.

Describe the source and amount of non-OHF money spent for this work in the past:

Appropriation Year	Source	Amount
2010	USFWS In-kind Contributions	\$308,000
2015	TNC Private Contributions	\$53,354
2016	TNC Private Contributions	\$74,253
2017	TNC Private Contributions	\$917
2016	USFWS In-kind Contributions	\$150,013
2011	USFWS In-kind Contributions	\$144,000
2011	TNC Private Contributions	\$23,200
2010	TNC Private Contributions	\$37,700
2012	USFWS In-kind Contributions	\$139,400
2012	TNC Private Contributions	\$36,100
2014	USFWS In-kind Contributions	\$105,603
2014	TNC Private Contributions	\$64,400
2015	USFWS In-kind Contributions	\$302,316

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Outdoor Heritage Funds will be used to purchase the land in fee title or to purchase perpetual habitat easements. The land and easements purchased will be transferred to the USFWS to become units of the Northern Tallgrass Prairie National Wildlife Refuge. Long term costs for restoration, management, and wildlife/habitat/easement monitoring will be funded through annual USFWS operations funding.

Explain the things you will do in the future to maintain project outcomes:

Year	Source of Funds	Step 1	Step 2	Step 3
Annually	USFWS Annual Service Operating Funds	Monitoring and management by USFWS managers, biologists, field staff, and realty staff to ensure the long-term health of these habitats. Activities may include burning and mechanical, biological, and chemical treatments.		

Activity Details:

If funded, this program will meet all applicable criteria set forth in MS 97A.056 - **Yes**

Will there be planting of corn or any crop on OHF land purchased or restored in this program - **Yes**

Explain

No food plots will be established on OHF-acquired properties. Short-term planting of agricultural crops is an accepted Best Management Practice for preparing a site for prairie restoration. For example, short-term use of soybeans could be used to prepare seedbeds prior to prairie plantings, which has been proven effective in decreasing the need for subsequent invasives control activities, and can shorten the amount of time that additional weed control is needed on the site. In some cases this may necessitate the use of GMO products to facilitate herbicide use to control invasives. Neonicotinoid treated seeds will not be used. We anticipate that the use of agricultural crops would not exceed 3 years on any given OHF-acquired property, and in most cases will be considerably shorter.

Will county board or other local government approval be formally sought prior to acquisition, per 97A.056 subd 13(j) - **No**

We will follow the county/township board notification processes as directed by current statutory language.

Is the land you plan to acquire (fee title) free of any other permanent protection - **Yes**

Is this land currently open for hunting and fishing - **No**

Will the land be open for hunting and fishing after completion - **Yes**

Lands acquired by fee title will be open to public hunting and fishing during the open season according to the National Wildlife Refuge System Improvement Act, United States Code, Title 16, Section 668dd, et seq.

Who will eventually own the fee title land?

Federal

Land acquired in fee will be designated as a:

National Wildlife Refuge

What is the anticipated number of closed acquisitions (range is fine) you plan to accomplish with this appropriation?

It is anticipated that this program will acquire approximately 290 acres in fee title in 1 - 3 closed acquisition projects.

Will the eased land be open for public use - **No**

Is the land you plan to acquire (easement) free of any other permanent protection - **Yes**

Who will manage the easement?

USFWS staff will manage all easements acquired under this program.

Who will be the easement holder?

The USFWS will be the easement holder on all easements acquired.

What is the anticipated number of easements (range is fine) you plan to accomplish with this appropriation?

It is anticipated that this program will acquire approximately 435 acres in 2 - 5 easements.

Are there currently trails or roads on any of the acquisitions on the parcel list - **No**

Will new trails or roads be developed or improved as a result of the OHF acquisition - **No**

Will the acquired parcels be restored or enhanced within this appropriation? - **Yes**

Restoration/enhancement activities will be completed where needed. While the focus of this program will be on native prairie and associated complexes of wetlands and native habitats, small areas of acquired parcels will likely consist of converted or degraded habitat with restoration and/or enhancement needs. The majority of restoration/enhancement funds allocated within this appropriation will likely be used for enhancement, including invasive species control and tree/brush removal.

Accomplishment Timeline:

Activity	Approximate Date Completed
Purchase agreements/options secured for approximately 290 acres of fee and approximately 435 acres of easement parcels	June 30, 2023
Grassland and wetland restoration and enhancement activities on all acquired parcels are completed	June 30, 2028

Date of Final Report Submission: 11/1/2025

Federal Funding:

Do you anticipate federal funds as a match for this program - **Yes**

Are the funds confirmed - **Yes**

Documentation

What are the types of funds?

Cash Match - \$60000

In-Kind Match - \$78000

Other -

Outcomes:

Programs in forest-prairie transition region:

- *Remnant native prairies are part of large complexes of restored prairies, grasslands, and large and small wetlands. The percent of native remnant prairie, as determined by the Minnesota Biological Survey and/or FWS biologists, will be documented on each parcel, as will the proximity to other protected land and neighboring habitat types, including oak savanna, wetlands, and Big Woods forest. These factors are considered in the ranking criteria for each parcel.*

Programs in prairie region:

- *Remnant native prairies and wetlands are perpetually protected and adequately buffered. The percent of native remnant prairie, as determined by the Minnesota Biological Survey and/or FWS biologists, will be documented on each parcel. Surrounding natural habitat types and cropped areas will be evaluated as part of the ranking criteria for submitted parcels.*

Budget Spreadsheet

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan

How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount

The budget and accomplishments were reduced roughly in proportion to the difference between the original request and appropriation recommendation, which was approximately 25% of the request. The proposed accomplishments were reduced to 24% of the request to account for economies of scale compared to a larger program.

Total Amount of Request: \$ 2677000

Budget and Cash Leverage

BudgetName	LSOHC Request	Anticipated Leverage	Leverage Source	Total
Personnel	\$297,200	\$78,000	USFWS	\$375,200

Total	\$2,677,000	\$224,000		\$2,901,000

Personnel

Position	FTE	Over # of years	LSOHC Request	Anticipated Leverage	Leverage Source	Total
TNC Staff	1.00	3.00	\$297,200	\$0		\$297,200
USFWS In-kind/Volunteer Contributions	0.00	0.00	\$0	\$78,000	USFWS	\$78,000
Total	1.00	3.00	\$297,200	\$78,000		\$375,200

Amount of Request: \$2,677,000

Amount of Leverage: \$224,000

Leverage as a percent of the Request: 8.37%

DSS + Personnel: \$335,500

As a % of the total request: 12.53%

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program:

DSS is based on The Nature Conservancy's Federally Negotiated Rate (FNR) as proposed and subsequently approved by the US Dept. of Interior on an annual basis. In this proposal we are requesting reimbursement of 7.5% of eligible base costs as determined by our annual FNR and based on suggestions from the Council in last year's hearings. The unrecovered portion of the approved rates through the life of the grant is offered as leverage. Examples of expenses included in the FNR include in-house legal counsel; finance, HR and administrative functions; and IT support. The FNR does not include land acquisition or capital equipment costs over \$50,000.

What is included in the contacts line?

These funds are entirely for restoration and enhancement work. While this program targets primarily high-quality habitats, small areas included in the acquisition projects may need enhancement and/or restoration. It is anticipated that the majority of the contract work will consist of invasive species removal and tree/brush removal activities.

Does the amount in the travel line include equipment/vehicle rental? - Yes

Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging:

Rental car expense is also included.

Describe and explain leverage source and confirmation of funds:

The Personnel line includes USFWS in-kind support. Fee acquisition w/o PILT and easement acquisition include leverage from a Pheasants Forever NAWCA fee and easement acquisition grant. The leverage offered on the DSS line reflects the unrecovered portion of the Conservancy's federally approved indirect rate. These funds are privately raised.
