Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2020 Accomplishment Plan

Date: December 17, 2019

Program or Project Title: Accelerating the Waterfowl Production Area Program - Phase XII

Funds Recommended: \$4,268,000

Manager's Name: Eran Sandquist Title: State Coordinator - MN Organization: Pheasants Forever, Inc. Address: 410 Lincoln Ave S Address 2: Box 91 City: South Haven, MN 55382 Office Number: 320-236-7755 Mobile Number: 763-242-1273 Email: esandquist@pheasantsforever.org Website: www.pheasantsforever.org

Legislative Citation: ML 2020, Ch. X, Art. 1, Sec. 2, subd XX

Appropriation Language:

County Locations: Becker, Big Stone, Blue Earth, Brown, Carver, Clay, Cottonwood, Douglas, Fairbault, Faribault, Freeborn, Grant, Jackson, Kandiyohi, Lincoln, Lyon, McLeod, Meeker, Murray, Nobles, Otter Tail, Pope, Renville, Rice, Stearns, Stevens, Swift, and Wright.

Eco regions in which work will take place:

- Forest / Prairie Transition
- Metro / Urban
- Prairie

Activity types:

• Protect in Fee

Priority resources addressed by activity:

- Prairie
- Wetlands

Abstract:

This proposal accelerates the strategic permanent protection of 714 acres (170 acres of wetlands and 544 acres of grassland habitat) of Waterfowl Production Areas (WPAs) open to public hunting in Minnesota. Pheasants Forever (PF) will strategically acquire parcels that are adjacent to existing public land or create corridors between complexes. All acquisitions will occur in the prairie, prairie/forest transition, or metro regions.

Design and scope of work:

The loss of grassland and wetland habitats in Minnesota is well documented. In the agricultural region of Minnesota, over 90% of our wetlands and 99% of our prairie grasslands have been converted for other uses. This proposal aims to slow or reverse this downward trend by strategically acquiring and restoring previously converted wetland and grassland habitats to be permanently protected as WPAs. The United States Fish and Wildlife Service (USFWS) and their partners have been employing this strategy for over 50 years through the Small Wetlands Acquisition Program (SWAP). This twelfth phase of the WPA acceleration program builds upon past work of the USFWS SWAP as well as the previous eleven phases of this effort by strategically acquiring 714 acres (170 acres of wetlands and 544

acres of grassland habitat) for the benefit of upland species and recreational opportunities of the public.

Strategic properties will be identified by using landscape level planning tools [e.g. Thunderstorm Maps produced by the USFWS's Habitat and Population Evaluation Team (HAPET)]. Based on HAPET evaluation strategies, modeling predictions can be made on the numbers of nesting waterfowl, grassland nesting birds, and other wildlife impacted by this grant application. In addition to wildlife benefits, the lands acquired and restored through this grant will provide improved water quality, groundwater recharge, and flood abatement benefits. These strategies are well tested and are supported by the greater conservation community in Minnesota. Hunting and fishing stakeholders are very interested in increasing public access for hunting and fishing. To address concerns related to county tax revenues due to acquiring public land, the USFWS and PF will notify counties prior to the acquisition of lands. Once acquired, the USFWS will make a one-time payment (called a Trust Fund payment) to the county where the property is located. In addition, the USFWS will make annual refuge revenue sharing payments for all fee lands within the respective counties.

All wetlands, on the properties acquired, will be restored by either surface ditch "plugs," breaking sub-surface tile lines, or other best practices for wetland restoration. Grasslands will be restored by planting site-appropriate native grasses and forbs following known best practices for the establishment. Grassland restoration on individual tracts may take three to five years, involving one to two years of post-acquisition farming to prepare the site for seeding (e.g. weed management issues, chemical carryover, other site-specific issues). Other restoration activities could include invasive tree removal, building site-cleanup, prescribed fire, etc. as necessary to provide high-quality habitat and public access to the citizens of Minnesota.

How does the request address MN habitats that have: historical value to fish and wildlife, wildlife species of greatest conservation need, MN County Biological Survey data, and/or rare, threatened and endangered species inventories:

PF is actively engaged in conservation priority planning meetings with local, state and government agencies, SWCDs, nonprofits, and other stake holders to determine what areas are the highest priority for adding permanently protected lands in the prairie, prairie/forest transition, and metro planning areas. Priority is given to parcels for numerous reasons. One of the reasons is an urgency to permanently protect habitat that include factors such as rare, threatened, & endangered species. We can strategically build onto existing wildlife habitat while also protecting water resources, such as wellhead protection areas. PF also looks to protect and restore marginal farmlands that have highly erodible land and drained wetlands which creates a net acre increase in protected grassland and wetland acres. Sellers often talk about how these lands should have never been farmed, citing that in many years, farming was not profitable for them. Lastly, building new habitat around existing permanently protected complexes also reverses habitat fragmentation, which is the number one threat to all of Minnesota's wildlife species.

When selecting projects for this proposal, PF uses the latest GIS layers and works with DNR staff to identify species of greatest conservation need. Species of greatest conservation need are considered and can influence restoration plans after the land is permanently protected. By increasing the amount, functionality and productivity of grassland landscapes for these species, we aim to maximize quality habitat for important wildlife species. Restoration of wetland and high diversity grassland complexes will provide habitat for a myriad of species including waterfowl, black terns, bobolinks, meadowlarks, ring-necked pheasants, pollinators, and monarchs. Other species of concern benefiting from this project include the prairie chicken, short-eared owl, marsh hawk, and yellow rails.

Describe the science based planning and evaluation model used:

This proposal utilizes the best science and modeling available to build and/or expand corridors and complexes. The HAPET provides landscape level planning and decision support tools (e.g. Thunderstorm maps) which are used to identify the most important wetland and grassland habitats remaining in the PPR of Minnesota. To scale this large programmatic grant to local landscape level priorities, PF works in close collaboration with the local area managers of USFWS, MNDNR, and other Minnesota partners to build on existing grassland and wetland conservation efforts. This proposal will continue to leverage spatial data and the power of GIS to identify acquisitions based on landscape level priority areas. Preference is given to project sites that help deliver the goals of other recognized conservation initiatives and plans. Data layers (i.e. MN Biological Survey, Natural Heritage Database, MN Prairie Plan, Wellhead Protection Areas, HAPET Scores, Pheasant Action Plan, MN Wildlife Action Plan, existing protected land, etc.) will be used to help identify projects and focus areas as well as to inform decisions when allocating scarce dollars for habitat protection. If species of concern are located on or adjacent to project tracts as identified in the MBS layer, we take an extra consideration when developing projects and this ultimately may change the way we look at and prioritize project tracts. In addition, if there are rare or sensitive species on sites, we will be able to identify those, communicate with the appropriate long-term land managers, and ensure we are having a positive impact on these species.

Which sections of the Minnesota Statewide Conservation and Preservation Plan are applicable to this program:

- H1 Protect priority land habitats
- H5 Restore land, wetlands and wetland-associated watersheds

Which other plans are addressed in this program:

- Long Range Duck Recovery Plan
- North American Waterfowl Management Plan

Which LSOHC section priorities are addressed in this program:

Forest / Prairie Transition:

• Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

Metro / Urban:

• Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna with an emphasis on areas with high biological diversity

Prairie:

• Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes

Relationship to other funds:

• Not Listed

Does this program include leverage in funds:

Yes

WPAs are acquired with funds derived from the sale of Federal Duck Stamps and managed for wildlife and conservation benefits as part of the National Wildlife Refuge System. Land acquisition and restoration have not kept pace with habitat restoration needs or the backlog of willing sellers. The USFWS's Midwest Region receives on average \$5 million from duck stamp proceeds to purchase fee-title lands or easements in Minnesota. If funded, this proposal will accelerate the protection and restoration of Minnesota's valuable wetland and grassland habitats and provide additional public hunting and fishing areas.

Per MS 97A.056, Subd. 24, Any state agency or organization requesting a direct appropriation from the OHF must inform the LSOHC at the time of the request for funding is made, whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose:

This proposal supplements past investments and is aimed at accelerating the protection and restoration of strategic parcels.

Describe the source and amount of non-OHF money spent for this work in the past:

Appropriation Year	Source	Amount
Annual	PF	100,000

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

All grant funds received for this project will result in fee title transfers of additional land into the National Wildlife Refuge System. The long-term protection and management of these habitats will be the responsibility of the USFWS, an agency that employs professional managers, biologists, field staff, realty staff, and enforcement officers. The USFWS has an annual operating budget designated specifically for the management of refuge resources. Wetlands and their contributing watersheds will be protected and prairie habitats monitored and managed. The USFWS has an active, professional prescribed burning program and utilizes fire to reduce woody invasion of prairies, enhance diversity, and rejuvenate uplands. Biological, mechanical, and sometimes chemical treatments are used as needed in an integrated management approach to provide high quality migration and breeding habitats. Acquisitions are targeted within areas

that have existing USFWS ownership to reduce management and administrative costs. In addition, great care is given to the creation and acquisition of possible new Waterfowl Production Areas outside existing ownership areas.

Explain the things you will do in the future to maintain project outcomes:

Year	Year Source of Funds Step 1		Step 2	Step 3	
Post Transfer	Federal	Monitoring	Maintenance	Habitat Management	

Activity Details:

If funded, this program will meet all applicable criteria set forth in MS 97A.056 - Yes

Will there be planting of corn or any crop on OHF land purchased or restored in this program - Yes

Explain

This proposal may include initial development plans or restoration plans to utilize farming to prepare previously farmed sites for native plant seeding. This is a standard practice across the Midwest to prepare the seedbed for native seed planting. In these restorations, PF's policy is to use non-neonicotinoid treated seed and no herbicides other than glyphosate.

Will county board or other local government approval be formally sought prior to acquisition, per 97A.056 subd 13(j) - No

At minimum we will notify local government in writing of the intent to acquire and donate lands to the USFWS and follow up with questions prior to acquisition. In cases where there is interest, we will also indicate our willingness to attend or ask to attend county or township meetings to communicate our interest in the projects and seek support.

Is the land you plan to acquire (fee title) free of any other permanent protection - No

A limited number of the parcels may have a federal or state easement on a portion of the tract which provides permanent protection for wetlands or grasslands. If a parcel has one of these encumbrances, and is still deemed a high priority by our agency partners, we will follow guidance established by the Outdoor Heritage Fund to proceed, or use non-state funding to acquire the residual value of the protected portion of the property.

Is this land currently open for hunting and fishing - No

Will the land be open for hunting and fishing after completion - Yes

All acquired lands will be open to the public taking of fish and game during the open season according to the National Wildlife Refuge System Improvement Act, United States Code, title 16, section 668dd, et seq.

Who will eventually own the fee title land?

Federal

Land acquired in fee will be designated as a:

WPA

What is the anticipated number of closed acquisitions (range is fine) you plan to accomplish with this appropriation?

We anticipate closing on five to seven tracts through this appropriation.

Are there currently trails or roads on any of the acquisitions on the parcel list - No

Will new trails or roads be developed or improved as a result of the OHF acquisition - No

Will the acquired parcels be restored or enhanced within this appropriation? - Yes

Yes. We may also seek additional leverage (i.e. PF chapters, federal, etc.) to supplement the restoration budget contained within this proposal.

Accomplishment Timeline:

Activity	Approximate Date Completed
Identify priority acquisitions	0 7/0 1/20 20
Contract appraisals ordered	09/01/2021
Purchase agreements	0 2/0 1/20 21
Re-evaluate tract priority	02/14/2021
Contract appraisals ordered	0 4/0 1/20 2 1
Purchase agreements	09/01/2021
Close on tracts	0 1/0 1/20 23
Restoration completed	0 6/30 /20 25

Date of Final Report Submission: 11/1/2025

Federal Funding:

Do you anticipate federal funds as a match for this program - Yes

Are the funds confirmed - Yes

Documentation

What are the types of funds? Cash Match - \$1000000 In-Kind Match - \$800000 Other -

Outcomes:

Programs in forest-prairie transition region:

• Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need Strategic parcels that increase the functionality of existing habitat will be acquired and restored to functioning wetlands with diverse upland prairie to serve as habitat for resident and migratory waterfowl. Lands will be transferred to the USFWS as a WPA to provide accelerated wildlife habitat and public access, monitored by the USFWS. Protected and restored acres will be measured against goals outlined in each WMD Comprehensive Plan which rolls up to the North American Waterfowl Management Plan.

Programs in metropolitan urbanizing region:

• Protected habitats will hold wetlands and shallow lakes open to public recreation and hunting Strategic parcels that increase the functionality of existing habitat will be acquired and restored to functioning wetlands with diverse upland prairie to serve as habitat for resident and migratory waterfowl. Lands will be transferred to the USFWS as a WPA to provide accelerated wildlife habitat and public access, monitored by the USFWS. Protected and restored acres will be measured against goals outlined in each WMD Comprehensive Plan which rolls up to the North American Waterfowl Management Plan.

Programs in prairie region:

• Protected, restored, and enhanced habitat for migratory and unique Minnesota species Strategic parcels that increase the functionality of existing habitat will be acquired and restored to functioning wetlands with diverse upland prairie to serve as habitat for resident and migratory waterfowl. Lands will be transferred to the USFWS as a WPA to provide accelerated wildlife habitat and public access, monitored by the USFWS. Protected and restored acres will be measured against goals outlined in each WMD Comprehensive Plan which rolls up to the North American Waterfowl Management Plan.

Budget Spreadsheet

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan

How will this program accommodate the reduced appropriation recoomendation from the original proposed requested amount

We have reduced accomplishments/costs proportionately across the overall program to accommodate the reduced appropriation. As a result of the reduction, we will be able to protect fewer acres. As in past appropriations, we will focus on the most strategic, highest priority tracts.

Total Amount of Request: \$4268000

Leverage as a percent of the Request:	23.43%
DSS + Personnel:	\$44,100
As a % of the total request:	1.03%

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program:

PF utilizes the Total Modified Direct Cost method. This methodology is annually approved by the U.S. Department of Interior's National Business Center as the basis for the organization's Indirect Cost Rate agreement. PF's allowable direct support services cost is 4.12%. In this proposal, PF has discounted its rate to 2% of the sum of personnel, contracts, professional services, and travel. We are donating the difference-in-kind.

What is included in the contacts line?

We anticipate that all of the contract funding will be used for restoration, enhancement and initial development of the protected acres. This could include but is not limited to wetland/grassland restoration, tree removal, prescribed fire, building removal, posts, signs, and other development activities

Does the amount in the travel line include equipment/vehicle rental? - No

Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging:

n/a

Describe and explain leverage source and confirmation of funds:

Leverage is expected from multiple sources including but not limited to federal sources, land value donations, contractor donations and PF. Not every source is 100% confirmed at this point. However, PF has an exemplary track record of delivery and over-achievement of match commitments that further stretch OHF funding.
