

# Lessard-Sams Outdoor Heritage Council

## Laws of Minnesota 2012 Final Report

**Date:** November 08, 2017

**Program or Project Title:** Accelerated Shallow Lakes and Wetlands Enhancement , Phase IV

**Funds Recommended:** \$3,870,000

**Manager's Name:** Ricky Lien

**Title:** Wetland Habitat Team Supervisor

**Organization:** MN DNR Div. of Fish and Wildlife

**Office Number:** 651-259-5227

**Email:** ricky.lien@state.mn.us

**Legislative Citation:** ML 2012, Ch. 264, Art. 1, Sec. 2, Subd. 4(e)

**Appropriation Language:** \$3,870,000 in the second year is to the commissioner of natural resources to develop engineering designs and complete construction to enhance shallow lakes and wetlands. A list of proposed restorations and enhancements must be provided as part of the required accomplishment plan. Work must be completed within three years of the effective date of this article.

**County Locations:** Aitkin, Becker, Becker , Beltrami, Benton, Big Stone, Clay, Clearwater, Douglas, Faribault, Freeborn, Grant, Hubbard, Isanti, Itasca, Kandiyohi, Kittson, Lac qui Parle, Lake of the Woods, Le Sueur, Lincoln, Lyon, Mahnommen, Marshall, Martin, McLeod, Mille Lacs, Murray, Nicollet, Norman, Pennington, Polk, Pope, Red Lake, Rice, Roseau, Stevens, Swift, Todd, Wadena, Waseca, Wilkin, and Yellow Medicine.

### Regions in which work was completed:

- Northern Forest
- Forest / Prairie Transition
- Prairie

### Activity types:

- Enhance

### Priority resources addressed by activity:

- Wetlands

## Summary of Accomplishments:

This proposal impacts shallow lakes and wetlands in Minnesota through the design and construction of projects, enhancement work done by DNR roving habitat crews, and shallow lakes work identified and initiated through the DNR Shallow Lakes program. Ten thousand acres of wetlands were enhanced by these activities.

## Process & Methods:

This OHF-funded project utilized three components - individual project design and construction of wetland and shallow lake infrastructure, habitat enhancement work by DNR Roving Habitat Crews, and an expansion of the DNR Shallow Lakes program.

Design and Construction - Twenty-one projects were designed or designed and constructed. Design only projects are surveyed and receive preliminary design plans and support from Minnesota DNR engineers. This initial work is critical to identify project issues, determine realistic cost estimates, and ensure that future construction can proceed with minimal delays. No acres are reported for design-only projects; that occurs only after construction. Eight projects were design-only. Thirteen projects were design and construct. These 13 projects involved the construction or renovation of water control structures, fish barriers and/or dikes. This work enhanced almost 1200 acres, 913 of which were in the Prairie Ecological Section.

Roving Habitat Crews - Minnesota DNR Roving Habitat Crews are highly trained, equipped and motivated staff working together to enhance Wildlife Management Areas. Begun in 2010, 2 6-person crews were established to work on prairie grasslands, with one crew based in Mentor, MN and one based at Lac Qui Parle. Beginning with this Accelerated Shallow Lakes and Wetland Enhancements, Phase IV, OHF appropriation, funding was provided to the 2 crews to allow them to expand to do wetland enhancement work. Each crew was provided 2 additional staff and they were able to spend 25% of their time and resources on wetland and shallow lake activities. This work included wetland prescribed burns, removal of woody vegetation from wetlands, the ability to work on wetland drawdowns, cattail spraying and mowing, and other wetland activities. The wetland acreage impacted by these crews has exceeded expectations, with 8,900 wetland acres enhanced. Three thousand-four hundred of these acres were enhanced in the Prairie Ecological Section. The most wetland acres were enhanced in Forest/Prairie Ecological Section, which is a function of the large habitat blocks that are available to manage in northwest Minnesota.

Shallow Lakes Program - The Minnesota DNR Shallow Lakes Program consists of a supervisor and 8 shallow lakes specialists. Three of these shallow lake specialist positions were created and funded with the Accelerated Shallow Lakes and Wetland Enhancements, Phase IV, OHF appropriation. Interns are used to augment shallow lake assessment work done during the summer field season. The Shallow Lakes Program can be described as having two major goals - assessment of shallow lakes through a standardized set of measures and initiating management of shallow lakes to enhance their value to wildlife. Management actions may include drawdowns, removal of unwanted fish, control of invasive species, and placement of major infrastructure. Acres are not reported for this component of the grant, though the work done by the Shallow Lakes Program is critical to acres subsequently reported by the DNR or Ducks Unlimited when OHF funds are used to implement management. A measure of the work accomplished by OHF-funded shallow lakes specialists is the number of shallow lake assessments they undertake during the grant period. For the period during which funding was provided by this OHF grant, the three funded specialists and interns accomplished 491 assessments on shallow lakes covering 160,268 acres.

## Explain Partners, Supporters, & Opposition:

Work done by shallow lake specialists and interns funded through this OHF appropriation are of benefit to our valuable partner, Ducks Unlimited. Shallow lake assessments identify those lakes that need management action. Ducks Unlimited and the DNR coordinate to ensure that we obtain the needed resources to implement the needed management. Subsequent assessments by shallow lake specialists ensure that the intended results are obtained and to guide future management by DU and the DNR. Ducks Unlimited continues to be one of our strongest partners in providing wetland habitat in Minnesota.

## Additional Comments:

### *Exceptional challenges, expectations, failures, opportunities, or unique aspects of program*

The Accelerated Shallow Lakes and Wetland Enhancements, Phase IV, OHF appropriation was our first opportunity to utilize DNR roving habitat crews for wetland enhancement work. We were conservative in our estimate of how many acres they might be able to impact, but as evidenced by the 8900 acres of wetland they enhanced using this appropriation, they have exceeded our expectations. Opportunities remain for roving crews to impact prairie wetlands in meaningful ways, especially in light of reports showing that only 30% of prairie wetlands are in good condition. A challenge is to work with DNR Area Wildlife Managers to give them the tools they need to assess small wetlands, identify the management needed to fix poor quality wetlands, and the resources to implement that management.

It was a challenge, to say the least, as a new manager to pick-up this project 'midstream' given the complex nature of programmatic OHF projects.

## Other Funds Received:

- Not Listed

## How were the funds used to advanced the program:

Not Listed

## What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Engineers from the DNR make "warranty" visits to completed projects at set times after construction to ensure that the project is functioning as designed and to implement any needed corrections. Area Wildlife Managers are responsible to provide needed oversight of completed project over time to ensure management and maintenance needs are met and that available resources are sufficient to have a functioning project. Shallow Lake Specialists are available for shallow lake projects to undertake standardized assessments to document project success, problems, or management issues over time.

## Outcomes:

*The original accomplishment plan stated the program would*

### Programs in the northern forest region:

- Not Listed

#### How will the outcomes be measured and evaluated?

Intensive wetland management and habitat infrastructure maintenance will provide the wetland base called for in numerous prairie, shallow lake and waterfowl plans. Area wildlife staff and/or shallow lakes staff will monitor completed projects to determine success of implementation and to assess the need for future management and/or maintenance.

### Programs in forest-prairie transition region:

- Not Listed

#### How will the outcomes be measured and evaluated?

Intensive wetland management and habitat infrastructure maintenance will provide the wetland base called for in numerous prairie, shallow lake and waterfowl plans. Area wildlife staff and/or shallow lakes staff will monitor completed projects to determine success of implementation and to assess the need for future management and/or maintenance.

### Programs in prairie region:

- Reducing invasive species will increase the occurrence of aquatic vegetation and improve the production of invertebrates in wetlands and shallow lakes. This will lead to the ecological functional integrity of wetland complexes. Waterfowl, shorebird and other wetland wildlife use of these wetland and shallow lakes will increase, especially during migration. Improved hunting and viewing opportunities will follow the increased wildlife use.

#### How will the outcomes be measured and evaluated?

Intensive wetland management and habitat infrastructure maintenance will provide the wetland base called for in numerous prairie, shallow lake and waterfowl plans. Area wildlife staff and/or shallow lakes staff will monitor completed projects to determine success of implementation and to assess the need for future management and/or maintenance.

# Budget Spreadsheet

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$3,870,000

## Budget and Cash Leverage

0

## Target Lake/Stream/River Feet or Miles (final)

0

### Explain the success/shortage of acre goals:

Our ability to exceed goals was in large part to (1) our conservative estimate regarding how many wetland acres our Roving Habitat Crews would be able to enhance in our first effort to use them for this type of work and (2) the inclusion of large acreages, especially in northwest Minnesota. I anticipate that given that our parcel list changes dramatically over the life of the appropriation, often due to forces outside our control, there will be years we exceed acreage goals and there will be years we undershoot.

# Parcel List
