

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2015 Accomplishment Plan

Date: May 18, 2020

Program or Project Title: MN Prairie Recovery Project - Phase VI

Funds Recommended: \$ 4,032,000

Manager's Name: Neal Feeken
Title: Prairie Recovery Project Coordinator
Organization: The Nature Conservancy
Address: 1101 W River Parkway
Address 2: Suite 200
City: Minneapolis, MN 55415
Office Number: 612-331-0738
Email: nfeeken@tnc.org
Website: nature.org

Legislative Citation: ML 2015, First Sp. Session, Ch. 2, Art. 1, Sec. 2, Subd. 2(c)

Appropriation Language: \$4,032,000 in the first year is to the commissioner of natural resources for an agreement with The Nature Conservancy to acquire native prairie, wetlands, and savanna and restore and enhance grasslands, wetlands, and savanna. Subject to evaluation criteria in Minnesota Rules, part 6136.0900, priority must be given to acquisition of lands that are eligible for the native prairie bank under Minnesota Statutes, section 84.96, or lands adjacent to protected native prairie. Annual income statements and balance sheets for income and expenses from land acquired with this appropriation must be submitted to the Lessard-Sams Outdoor Heritage Council no later than 180 days following the close of The Nature Conservancys fiscal year. A list of proposed land acquisitions must be provided as part of the required accomplishment plan and must be consistent with the priorities identified in the Minnesota Prairie Conservation Plan.

County Locations: Becker, Big Stone, Chippewa, Clay, Cottonwood, Grant, Kandiyohi, Kittson, Lac qui Parle, Lincoln, Lyon, Mahnomon, Marshall, Murray, Nobles, Norman, Pennington, Pipestone, Polk, Pope, Red Lake, Rock, Roseau, Stearns, Stevens, Swift, Traverse, Wilkin, and Yellow Medicine.

Eco regions in which work will take place:

- Forest / Prairie Transition
- Prairie

Activity types:

- Enhance
- Protect in Fee
- Restore

Priority resources addressed by activity:

- Prairie
- Wetlands

Abstract:

This project contributes to the goals of the MN Prairie Conservation Plan by protecting 800 acres of prairie/wetland/savanna habitat; restoring 150 acres prairie/wetland; and enhancing 6,000 acres of prairies, wetlands, grasslands and savanna.

Design and scope of work:

Within the prairie landscape The Nature Conservancy, in conjunction with our partners, is striving to conserve sustainable populations

of native animals, diverse native plant communities with low levels of invasive plant species, functioning grassland ecosystem processes (eg. fire, grazing, flood control), and healthy wetland and riparian communities. Accomplishing this task requires rapid protection of our increasingly rare native prairie tracts, restoration of degraded sites, and long-term management of those sites. The Prairie Recovery Project will build on the success of previously funded Phases by continuing to Protect, Enhance and Restore native prairie habitats in select Prairie Core and Corridor geographies.

Protect - An estimated 800 acres of prairie, wetlands, grasslands, and savanna will be permanently protected through fee-title acquisition from willing sellers in 5 prairie core/corridor landscapes as identified in the MN Prairie Conservation Plan. Acquired lands will be prioritized according to a matrix using criteria that include: amount of native prairie on the parcel, proximity to other permanently protected areas, quality of habitat and species diversity, and suitability for public recreation. Of these protected acres approximately 500 will be held by The Nature Conservancy subject to a recorded notice of funding restrictions pursuant to a grant agreement with MN DNR. The remaining approximate 300 acres will be transferred to the MN DNR as part of the Wildlife Management Area or Scientific Natural Area program. All lands will be open to public hunting and fishing as provided in the Constitution.

Enhance - An estimated 6,000 acres of grassland/wetland complex will be enhanced on permanently protected lands, including lands purchased with OHF funds and held by the Conservancy, MN DNR Management Units, US Fish and Wildlife Service lands, and private lands subject to perpetual conservation easements. The primary objectives of our enhancement activities will be to increase native species diversity and improve critical wildlife habitat. A variety of practices and techniques will be implemented to accomplish our objectives including: prescribed fire; removal of trees and woody species; invasive species control including mechanical, biological, and chemical control; overseeding with native seed; and conservation grazing, mowing, or haying. The work will be conducted via contracts with private local vendors, Conservation Corps of Minnesota crews and Nature Conservancy seasonal and permanent staff. Prairie Recovery Biologists are stationed in the primary landscapes and are responsible for identifying and prioritizing projects in cooperation with our agency partners, selecting and overseeing private vendor work and leading and directing seasonal staff. The Biologists are also responsible for participating in and leading Local Technical Team efforts to increase efficiency and effectiveness of program delivery by multiple partners at the landscape scale. Finally, the Biologists provide a critical link with the local governments and communities in which they live and work. This local connection provides an opportunity for us to quickly respond to questions or concerns as a result of our activities.

Restoration - Approximately 150 acres of cropland will be restored to diverse local-ecotype grassland and grassland/wetland complex (part of the above protected acres). Practices to be implemented includes those listed above in addition to re-seeding with native species and restoration of original wetland hydrology.

Results to date - Through Phases 1-4 we have protected 2,750 acres of prairies, wetlands, and grasslands and have enhanced more than 27,000 acres of permanently protected grasslands. The protected acres span our priority geographies. In all cases parcels were purchased that were directly adjacent to, or contributed to, the functional integrity of existing habitat complexes. Average per acre costs for acquired properties have risen over the course of the program and has averaged around \$1,550 per acre. Costs vary widely across the program area with land in southern and central Minnesota costing substantially more than in the Northwest. Our enhancement projects have focused on accelerating the implementation of prescribed fire, extensive woody vegetation removal, building the infrastructure for conservation grazing systems and mechanical and chemical treatment of invasive species. Costs for enhancement and restoration work also vary depending on the practices being implemented but have averaged around \$105 per acre.

At their October 7, 2014 meeting, the Council requested that The Nature Conservancy add the following language about salary and fringe benefit reimbursement to the Accomplishment Plan:

As provided under the subdivisions titled "Payment Conditions and Capital Equipment Expenditures" (ML 2015, First Special Session, Ch. 2, Art. 1, Sec. 2, Subd. 8) The Nature Conservancy (the Conservancy) may be reimbursed for salary and fringe benefits based on a provisional fringe benefits rate consistent with Appendix IV to 2 CFR Part 200 - Indirect (F&A) Costs Identification and Assignment, and Rate Determination for Nonprofit Organizations and negotiated annually with the Conservancy's cognizant agency. Within 180 days of the end of each Nature Conservancy fiscal year, the Conservancy will provide MN DNR with the actual fringe benefits rate for the prior year and reconcile any overpayment made by the State.

How does the request address MN habitats that have: historical value to fish and wildlife, wildlife species of greatest conservation need, MN County Biological Survey data, and/or rare, threatened and endangered species inventories:

Temperate grasslands are the most endangered and least protected habitat type on earth. Activities identified in this project directly reflect implementation strategies identified in the MN Prairie Conservation Plan. Properties for acquisition are identified and prioritized using MN County Biological Survey Rare Element Occurrences and Biodiversity Significance. The geographies we have chosen to focus on, in addition to being Prairie Plan core areas, reflect the areas with the highest density and highest quality remaining prairie systems left in the state. By focusing our work in these particular landscapes we increase the functionality of the overall prairie/grassland systems, including increasing water retention, improving breeding and nesting habitat and augmenting migratory corridors.

Describe the science based planning and evaluation model used:

Our work is prioritized according to the goals and associated core and corridor geographies as identified in the MN Prairie Conservation Plan. The Prairie Plan was the product of refining and consolidating multiple plans including the state's Pheasant, Duck, and Nongame Wildlife Plans along with Agency and NGO Operational Plans.

Which sections of the Minnesota Statewide Conservation and Preservation Plan are applicable to this program:

- H1 Protect priority land habitats
- H5 Restore land, wetlands and wetland-associated watersheds

Which other plans are addressed in this program:

- Minnesota Prairie Conservation Plan
- Minnesota's Wildlife Action Plan 2015-2025

Which LSOHC section priorities are addressed in this program:

Forest / Prairie Transition:

- Protect, enhance, and restore rare native remnant prairie

Prairie:

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna

Relationship to other funds:

- Not Listed

How does this program accelerate or supplement your current efforts in this area:

The Nature Conservancy has been actively protecting and managing prairies in Minnesota for more than 50 years. Funds available through this program provide critical resources for protecting the 1% of prairie remaining in the state. Given the continued pressure to convert prairie lands it is imperative that willing sellers of native prairie be given the chance to protect these increasingly rare systems. The Prairie Recovery Project represents one of the best tools the Conservancy has to afford such protection. Further, many of the lands in public ownership are in need of increased management to ensure healthy grassland systems. Investment in removing woody species, controlling invasives and implementing prescribed fire regimes is akin to infrastructure development in that upfront costs are high but ongoing maintenance becomes more sustainable once those investments have been made. This project, and others that support the goals of the MN Prairie Conservation Plan are critical to ensuring the long-term health and viability of Minnesota's prairie landscapes.

Per MS 97A.056, Subd. 24, Any state agency or organization requesting a direct appropriation from the OHF must inform the LSOHC at the time of the request for funding is made, whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose:

Not Listed

Describe the source and amount of non-OHF money spent for this work in the past:

Appropriation Year	Source	Amount
2010	TNC Private Funds	713326
2011	TNC Private Funds	769600
2012	TNC Private Funds	184358

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Protection, restoration, and enhancement are all critical tools for the long-term viability of Minnesota's prairie/wetland systems. The prairie pothole landscape can only be sustained through the regular application of disturbance, including fire, grazing and haying. A primary purpose of this proposal is to continue a highly successful collaborative and coordinated partnership that accelerates the use of these practices across multiple landscapes. In many cases requested funds will develop infrastructure and enable completion of one-time large expenses such as woody species removal and installation of fencing for conservation grazing. Once those activities are complete we expect long-term maintenance costs to moderate. The Nature Conservancy will continue to seek mechanisms that derive revenue from grazing, haying and seed production consistent with our conservation goals. In addition to the conservation value of planned haying and grazing, the income generated by these agricultural leases can help pay for management activities and property taxes. Our past efforts show that revenue generation is insufficient to pay for all associated expenses therefore we plan to seek future funding from the Outdoor Heritage Fund along with private contributions for long-term stewardship needs.

Explain the things you will do in the future to maintain project outcomes:

Year	Source of Funds	Step 1	Step 2	Step 3
Once every 3-5 years	OHF, TNC Private funds	Prescribed Fire		
Annually	OHF, TNC Private funds	Invasive species search and treatment		
As needed	TNC Private funds, lease fees	Conservation grazing		

Activity Details:

If funded, this program will meet all applicable criteria set forth in MS 97A.056 - **Yes**

Will there be planting of corn or any crop on OHF land purchased or restored in this program - **Yes**

Explain

No food plots will be established on OHF acquired properties. Short-term use of agricultural crops is an accepted Best Practice for preparing a site for prairie restoration. Short-term use of corn or soybeans could be used for restorations in order to control weed seedbeds prior to prairie planting. We would not expect agricultural crop use to exceed 3 years on any given OHF acquired property.

Will local government approval be sought prior to acquisition - **No**

The Nature Conservancy will retain and manage acquired properties in nongovernmental ownership. We are committed to paying property taxes on all properties that we retain ownership of. We work closely with local officials to ensure knowledge of our activities but do not ask for local approval.

For lands intended to be acquired and subsequently donated to MN DNR we will notify county boards of the acquisition before closing on the property.

Is the land you plan to acquire (fee title) free of any other permanent protection - **Yes**

Is this land currently open for hunting and fishing - **No**

Will the land be open for hunting and fishing after completion - **Yes**

No variation from MN regulations

Will restoration and enhancement work follow best management practices including MS 84.973 Pollinator Habitat Program - **Yes**

Is the activity on permanently protected land per 97A.056, subd 13(f), tribal lands, and/or public waters per MS 103G.005, Subd. 15 - **Yes (WMA, WPA, SNA, Private Land with a Conservation Easement, County/Municipal, Refuge Lands, State Recreation Areas)**

Accomplishment Timeline:

Activity	Approximate Date Completed
Protect first 200 acres	April 2016
Protect second 200 acres	December 2016
Protect third 200 acres	June 2017
Enhance first 2000 acres	June 2017
Enhance second 2000 acres	December 2017
Enhance third 2000 acres	June 2018
Restore 150 acres	December 2018
Protect fourth 200 acres	December 2017

Date of Final Report Submission: 9/30/2019

Federal Funding:

Do you anticipate federal funds as a match for this program - **No**

Outcomes:

Programs in forest-prairie transition region:

- Remnant native prairies are part of large complexes of restored prairies, grasslands, and large and small wetlands *Protection results will be measured against MN Prairie Conservation Plan goals for protected acres of native prairie and associated grassland for each geography. Enhancement results will be measured using protocols developed for the multi-agency Grassland Monitoring Network*

Programs in prairie region:

- Remnant native prairies are part of large complexes of restored prairies, grasslands, and large and small wetlands *Protection results will be measured against MN Prairie Conservation Plan goals for protected acres of native prairie and associated grassland for each geography. Enhancement results will be measured using protocols developed for the multi-agency Grassland Monitoring Network*

Budget Spreadsheet

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan

How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount

Because this Phase is part of a larger programmatic effort the reduction in the appropriation recommendation should not result in any significant change to the originally proposed deliverables. We will strive to achieve the original objectives with the recommended allocation.
