

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2017 Accomplishment Plan

General Information

Date: 12/07/2021

Project Title: Southeast Minnesota Protection and Restoration - Phase V

Funds Recommended: \$2,375,000

Legislative Citation: ML 2017, Ch. 91, Art. 1, Sec. 2, subd. 3(c)

Appropriation Language: \$2,375,000 in the first year is to the commissioner of natural resources to acquire lands in fee for wildlife management purposes under Minnesota Statutes 86A.05, subdivision 8; to acquire land in fee for scientific and natural areas under Minnesota Statutes, sections 86A.05, subdivision 5; to acquire land in fee for state forest purposes under 86A.05, subdivision 7; to acquire permanent conservation easements; and to restore and enhance prairie, grasslands, forest, and savanna for agreements, as follows: \$1,000,000 to The Nature Conservancy; \$675,000 to The Trust for Public Land; \$700,000 to Minnesota Land Trust, of which up to \$80,000 is to Minnesota Land Trust for establishing a monitoring and enforcement fund, as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. Annual income statements and balance sheets for income and expenses from land acquired in fee with this appropriation and not transferred to the State of Minnesota or local government unit must be submitted to the Lessard-Sams Outdoor Heritage Council. A list of proposed land acquisitions must be provided as part of the required accomplishment plan.

Manager Information

Manager's Name: Richard Biske

Title: Freshwater Program Director

Organization: The Nature Conservancy

Address: 1101 West River Parkway Suite 200

City: Minneapolis, MN 55415

Email: rbiske@tnc.org

Office Number: 612-331-0766

Mobile Number: 651-564-0591

Fax Number:

Website: nature.org

Location Information

County Location(s): Winona, Wabasha, Houston, Fillmore and Goodhue.

Eco regions in which work will take place:

- Southeast Forest

Activity types:

- Protect in Easement
- Protect in Fee
- Restore
- Enhance

Priority resources addressed by activity:

- Prairie
- Forest
- Habitat

Narrative

Abstract

This project will protect approximately 680 acres and restore and enhance approximately 70 acres of declining habitat for species of greatest conservation need in strategically targeted areas of biodiversity significance in the Blufflands resulting in increased public access and habitat.

Design and Scope of Work

Investment in habitat protection and restoration in the Blufflands with use of Outdoor Heritage Funds in partnership with The Nature Conservancy (TNC), Minnesota Land Trust (MLT) and The Trust for Public Land (TPL) would expand and connect larger contiguous blocks of protected lands, allowing land managers to restore and maintain native habitats at a scale difficult to accomplish with a fragmented ownership. Benefits of this program include the increased effectiveness of frequent prescribed fire necessary to reclaim "goat prairies", oak savanna and regenerate oak hardwood forests at a larger scale. This proposal will enhance prior conservation investments and ensure that the legacy of the Blufflands is preserved for future generations.

Within the program area there are 86 different native plant community types mapped by the Minnesota Biological Survey (MBS), covering nearly 149,670 acres. There are 183 species of state listed rare plants and animals, many of which are concentrated on 749 sites of biodiversity significance. Despite this high demand for outdoor recreation only 5% of the region is open to the public. Since 2008, approximately 7% of the grasslands in the focus area of this program have been converted to cropland threatening the coldwater trout streams that make the region unique.

Fee Acquisition:

The Nature Conservancy and The Trust for Public Land will coordinate with MN DNR on all potential fee-title acquisitions. TNC and TPL will assist the participating DNR Divisions by conducting all or some of the following activities: initial site reviews, negotiations with sellers, appraisals, environmental reviews and acquisition of fee title. TNC and TPL will transfer lands to the DNR except when TNC ownership is appropriate. Fee Acquisition of

approximately 214 acres of forest and 66 acres of prairie along 1/2 mile of coldwater trout streams.

Conservation Easements:

Minnesota Land Trust will acquire approximately 360 acres of conservation easements and develop restoration and management plans for eased acres. MLT will use a competitive bidding and ranking system to prioritize the best projects and secure them at the lowest cost to the State.

Restoration and Enhancement:

Ecological restoration enhancement management plans will be developed in coordination with DNR Forestry, Fisheries and Wildlife and Ecological and Water Resources.

Enhancement and/or restoration of approximately 70 acres of bluff prairie and/or forest.

The Nature Conservancy (the Conservancy) may be reimbursed for salary and fringe benefits based on a provisional fringe benefits rate consistent with federal regulations and negotiated annually with the Conservancy's cognizant agency. Within 180 days of the end of each Nature Conservancy fiscal year, the Conservancy will provide MN DNR with the actual fringe benefits rate for the prior year and reconcile any overpayment made by the State. This approach is consistent with ML 2016, Ch. 172, Art. 1, Sec. 2, Subd. 8 (Payment Conditions and Capital Equipment Expenditures).

How does the plan address habitats that have significant value for wildlife species of greatest conservation need, and/or threatened or endangered species, and list targeted species?

Of the completed projects 70% of the acres are within an identified Wildlife Action Network corridor and over half the the acres protected are medium or high priority. Acquisition projects have protected habitat necessary for 39 documented occurrences of Species of Greatest Conservation Need. Projects in this proposal will continue to support SGCN and targeted species by working within complexes identified by the Minnesota Biological Survey and include a mix of mesic hardwood forests, large fire dependent communities including oak/hickory woodlands, oak forests, savannas with bluff and ridgetop prairie. These complexes and the coldwaters streams they support are habitat for a variety of species of greatest conservation need, including the state threatened timber rattlesnake, other snakes and songbirds. One recent project protected 10% of the watershed home to heritage brook trout, a rare native strain of native trout nearly extirpated from the state.

Describe how the plan uses science-based targeting that leverages or expands corridors and complexes, reduces fragmentation or protects areas identified in the MN County Biological Survey:

The program prioritizes protection, restoration and enhancement projects within Conservation Opportunity Areas identified by a diverse group of local resource managers. Conservation Opportunity Areas were identified based on the most viable large units identified by the Minnesota Biological Survey containing existing conservation lands that can be expanded and connected to other complexes while also protecting and improving stream habitat. We

continue to procure protection projects within the highest priority complexes that are within the Wildlife Action Network and improve habitat conditions within these priority areas at a large functioning scale not possible with individual projects.

Which two sections of the Minnesota Statewide Conservation and Preservation Plan are most applicable to this project?

- H3 Improve connectivity and access to recreation
- LU8 Protect large blocks of forest land

Which two other plans are addressed in this program?

- Minnesota's Wildlife Action Plan 2015-2025
- Outdoor Heritage Fund: A 25 Year Framework

Which LSOHC section priorities are addressed in this program?

Southeast Forest

- Protect forest habitat through acquisition in fee or easement to prevent parcelization and fragmentation and to provide the ability to access and manage landlocked public properties

Does this program include leveraged funding?

-

Non-OHF Appropriations

Year	Source	Amount
2013	Private The Nature Conservancy	\$50,112
2014	Private The Nature Conservancy	\$2,125,000
2015	Private The Nature Conservancy	\$3,282

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended?

Acquisition projects will be adjacent or within close proximity to existing protected lands, including state-owned lands and lands under conservation easement. This will allow for the expansion of maintenance and restoration activities that are currently taking place on those protected lands and adjacent private lands. Habitats cleared of invasive species will be maintained with prescribed fire. Protection and restoration projects will improve future prescribed fire and maintenance activities through economies of scale. The tracts protected and enhanced as part of this proposal also meet the prioritization for the State Wildlife Action Plan and the MN DNR has been successful in securing federal habitat enhancement funding for Southeast Minnesota. Each project is within a Conservation Opportunity Area that receives a higher level of coordination and resource priority by many partners for maintaining and enhancing protected habitats. Tracts acquired will be transferred to the state for ongoing management.

MLT - The land protected through conservation easements will be sustained through the state-of-the-art easement stewardship standards and practices. MLT is a nationally-accredited and insured land trust with a successful easement stewardship program that includes annual property monitoring and defending the easements as necessary.

Actions to Maintain Project Outcomes

Year	Source of Funds	Step 1	Step 2	Step 3
------	-----------------	--------	--------	--------

Every 4 to 6 years	US Fish and Wildlife Service	Prescribed Fire	-	-
Every 4 to 6 years	DNR Game and Fish Fund	Prescribed Fire	-	-
2020 and perpetually	MLT Easement Stewardship and Enforcement Fund	Annual Monitoring in perpetuity	-	-

Activity Details

Requirements

If funded, this program will meet all applicable criteria set forth in MS 97A.056?

Yes

Will local government approval be sought prior to acquisition?

No

Describe any measures to inform local governments of land acquisition under their jurisdiction:

Local governments will be informed of the project and project managers made available for questions.

Is the land you plan to acquire (fee title) free of any other permanent protection?

No

Describe the permanent protection and justification for additional protection:

Some potential projects include DNR held trout stream easements.

Is the land you plan to acquire (easement) free of any other permanent protection?

Yes

Who will manage the easement?

Minnesota Land Trust

Who will be the easement holder?

Minnesota Land Trust

Will restoration and enhancement work follow best management practices including MS 84.973 Pollinator Habitat Program?

Yes

Is the restoration and enhancement activity on permanently protected land per 97A.056, Subd 13(f), tribal lands, and/or public waters per MS 103G.005, Subd. 15?

Yes

Where does the activity take place?

- WMA
- SNA
- AMA
- Permanently Protected Conservation Easements
- County/Municipal
- State Forests

Land Use

Will there be planting of any crop on OHF land purchased or restored in this program?

Yes

Explain what will be planted:

Short-term use of agricultural crops is an accepted best practice for preparing a site for prairie restoration. For example, short-term use of soybeans could be used for restorations in order to control weed seedbeds prior to prairie planting. In some cases this necessitates the use of GMO treated products to facilitate herbicide use in order to control weeds present in the seedbank.

MLT - The purpose of the Minnesota Land Trust's conservation easements is to protect existing high quality natural habitat and to preserve opportunities for future restoration. As such, we restrict any agricultural lands and use on the properties. In cases in which there are agricultural lands associated with the larger property, we will either carve the agricultural area out of the conservation easement, or in some limited cases, we may include a small percentage of agricultural lands if it is not feasible to carve those areas out. In such cases, however, we will not use OHF funds to pay the landowners for that portion of the conservation easement.

Are any of the crop types planted GMO treated?

True

Is this land currently open for hunting and fishing?

No

Will the land be open for hunting and fishing after completion?

Yes

Describe any variation from the State of Minnesota regulations:

NA

Who will eventually own the fee title land?

MN DNR except when TNC decides to retain ownership.

Will the eased land be open for public use?

No

Are there currently trails or roads on any of the proposed acquisitions?

No

Will new trails or roads be developed or improved as a result of the OHF acquisition?

No

Timeline

Activity Name	Estimated Completion Date
Purchase agreements or options for acquisition of fee land	June 30, 2020
Purchase agreements or options on conservation easements	June 30, 2020
Floodplain and stream corridor restoration/enhancement	October 15, 2022
Bluff prairie and oak savanna restoration/enhancement on newly acquired tracts	June 30, 2024

Date of Final Report Submission: 11/01/2024

Budget

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan.

As a % of the total request: 13.01%

Easement Stewardship: \$20,000

As a % of the Easement Acquisition: 4.57%

How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount?

Reduced acreage of fee acquisition, conservation easement and restoration and enhancement. No restoration and enhancement on easement lands due to reduced appropriation.

Describe and explain leverage source and confirmation of funds:

Private funds.

Contracts

What is included in the contracts line?

Contracts for restoration and/or enhancement.

Easement Stewardship

What is the number of easements anticipated, cost per easement for stewardship, and explain how that amount is calculated?

Travel

Does the amount in the travel line include equipment/vehicle rental?

-

Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging

I understand and agree that lodging, meals, and mileage must comply with the current MMB Commissioner Plan:

No

Direct Support Services

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?

TNC: DSS is based on The Nature Conservancy's Federally Negotiated rate as proposed and subsequently approved by the US Dept. of Interior. The proportion requested from the grant represents 50% with the other 50% contributed as leverage.

MLT: The Minnesota Land Trust has budgeted direct support expenses line with its current application for a federal indirect expense rate; we will seek reimbursement for half of allowed expenses, with the other 50% shown as leverage.

TPL: The Trust for Public Land's DSS request is based upon our federally approved indirect rate, which has been approved by the DNR. 50% of these costs are requested from the grant, 50% is contributed as leverage.

Federal Funds

Do you anticipate federal funds as a match for this program?

Yes

Are the funds confirmed?

No

What is the approximate date you anticipate receiving confirmation of the federal funds?

October 2018

1.5 miles

Outcomes

Programs in southeast forest region:

- Large corridors and complexes of biologically diverse wildlife habitat typical of the unglaciated region are restored and protected ~ *We will track the acres of priority parcels protected within the Conservation Opportunity Areas identified in regional planning. Success within each Conservation Opportunity Area will be determined based on the percentage of area protected restored and/or enhanced.*

Parcels

For restoration and enhancement programs ONLY: Managers may add, delete, and substitute projects on this parcel list based upon need, readiness, cost, opportunity, and/or urgency so long as the substitute parcel/project forwards the constitutional objectives of this program in the Project Scope table of this accomplishment plan. The final accomplishment plan report will include the final parcel list.
