Lower Wild Rice River Corridor Habitat Restoration - Phase III
Laws of Minnesota 2020 Accomplishment Plan

General Information

Date: 08/04/2023

Project Title: Lower Wild Rice River Corridor Habitat Restoration - Phase III

Funds Recommended: \$1,888,000

Legislative Citation: ML 2020, Ch. 104, Art. 1, Sec. 2, subd 2(e)

Appropriation Language: \$1,888,000 the second year is to acquire land in permanent conservation easement and to restore river and related habitat in the Wild Rice River corridor. Of this amount, \$148,000 is to the commissioner of natural resources for an agreement with the Wild Rice Watershed District and \$1,740,000 is to the Board of Water and Soil Resources. The Board of Water and Soil Resources may use up to \$78,000 for establishing a monitoring and enforcement fund as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. A list of proposed acquisitions must be included as part of the required accomplishment plan.

Manager Information

Manager's Name: Tara Jensen

Title: District Administrator

Organization: Wild Rice Watershed District

Address: 11 East 5th Avenue

City: Ada, MN 56510

Email: tara@wildricewatershed.org

Office Number: 218-784-5502

Mobile Number: 218-784-8463

Fax Number:

Website: www.wildricewatershed.org/

Location Information

County Location(s): Norman.

Eco regions in which work will take place:

- Prairie

Activity types:

- Protect in Easement

Priority resources addressed by activity:

- Wetlands
- Prairie
- Forest
- Habitat

Narrative

Abstract

Channelization of the Lower Wild Rice River in the early 1900s converted 50 miles of sinuous river channel to 23 miles of straight channel and resulted in the loss of several thousand acres of wetland and grassland habitat within the river's corridor. Through a partnership between the Wild Rice Watershed District and the Minnesota Board of Water and Soil Resources, this proposal will permanently protect 430 acres of private lands in easements. This phase represents a model approach to river corridor acquisition and is critical to advancing the largest river restoration project ever proposed in Minnesota.

Design and Scope of Work

Rivers and streams in the Red River Basin were straightened, ditched, cleared, and snagged with a goal of improving drainage. These activities destroyed hundreds of miles of aquatic habitat and eliminated thousands of acres of riparian forest, wetland and grassland. These habitat losses continue and have directly resulted in reduced fish and wildlife populations within the channelized reaches of rivers.

The Red River Drainage Commission channelized the Lower Wild Rice River in the late 1800's with further channel "improvement" completed by the U.S. Army Corps of Engineers in the 1950's. The channelized reach of the Wild Rice River currently provides little functional aquatic or riparian corridor habitat and reduces connectivity between the lower 49 miles of the river to the upstream 130 miles. The vision for the project includes establishment of a ½-mile wide protected corridor along the river channel, setting back existing spoil banks, reconnecting oxbows, construction of a natural meandering river channel, and restoration of riparian wetland and prairie plant communities.

The Wild Rice Watershed District (WRWD) and the MN Board of Water and Soil Resources (BWSR) have approved a Memorandum of Understanding which details responsibilities for easement acquisition. The partnership between the WRWD and BWSR will use the Reinvest In Minnesota (RIM) Program to secure, maintain, and monitor easements within the corridor.

Since this is a large project the river has been divided into Reaches A to F (attached illustration). This funding request will target acquisition to Reach C, D and E of the corridor. These reaches were selected due to expressed landowner interest and the high percentage of cultivated land. While land acquisition will be targeted to Reach C, D and E, other opportunities to protect lands within or adjacent to the main corridor (A-F) will also be considered. A

total of 430 acres of land is targeted for acquisition with this proposal. The previous proposals (M.L. 2015/2019) targeted acquisition to the lands within Reach C.

Once acquisition is complete, future channel rehabilitation phases of the project will be completed with the assistance of MN DNR and U.S. Army Corps of Engineers (USACE). The WRWD will be the local sponsor responsible for final design, engineering, and construction of the project.

With the funding allocation from 2015, WRWD has coordinated with BWSR to develop and sign a Memorandum of Understanding for the use of the RIM Outside Easement Program. WRWD has received applications and is processing RIM easements for approximately 450 acres out of the 480 acres that received funding from the 2015 accomplishment plan. WRWD has developed marketing materials to utilize in soliciting additional applications. Additionally, WRWD has requested Section 1135 assistance from the USACE to begin a feasibility evaluation of the channel restoration and setback levees alignment proposed in Phase 2 and Phase 3 of the project.

How does the plan address habitats that have significant value for wildlife species of greatest conservation need, and/or threatened or endangered species, and list targeted species?

This project is the land acquisition phase of a long term project that will restore 50 miles of river and over 6,500 acres of habitat for associated fish and wildlife communities. In addition to the direct habitat benefits within the project area, fish and wildlife populations downstream of the project will benefit through water quality improvements. The Wild Rice River and associated prairie and forest lowland habitats were identified as key habitats for species of greatest conservation need in the Red River Prairie ecoregion. Key among aquatic species is the Lake Sturgeon, a species of special concern. The Wild Rice River provides critical sturgeon habitat and is a primary reintroduction waterbody where Lake Sturgeon have been stocked. Restoration of Wild Rice River habitat will help ensure successful reestablishment of Lake Sturgeon populations in the Red River basin.

This project will also likely benefit mussel and insect populations in the Wild Rice River. Two species of caddisfly and two species of mussels, black sandshell and fluted-shell are listed as species of special concern and known to be present in the upstream reaches of the Wild Rice River. Acquisition and restoration of the stream and associated riparian wetlands will also improve habitat for gamefish and more than 50 other fish species present in other reaches of the Wild Rice River watershed.

Describe how the plan uses science-based targeting that leverages or expands corridors and complexes, reduces fragmentation or protects areas identified in the MN County Biological Survey:

Restoration of the Lower Wild Rice River Corridor is listed as a high priority project on the MN DNR state river restoration priority list. The Minnesota Prairie Plan also lists restoration of channelized prairie river segments of cultivated lands immediately adjacent to streams and ditches as critical challenges. One Minnesota County Biological Survey site of moderate biodiversity significance is located within the Lower Wild Rice River Corridor.

Reference stream reaches established by the MN DNR will be used to set the geometry of the restored stream channels.

Which two sections of the Minnesota Statewide Conservation and Preservation Plan are most applicable to this project?

- H2 Protect critical shoreland of streams and lakes
- H6 Protect and restore critical in-water habitat of lakes and streams

Which two other plans are addressed in this program?

- Minnesota Prairie Conservation Plan
- Red River of the North Fisheries Management Plan

Which LSOHC section priorities are addressed in this program?

Prairie

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes

Outcomes

Programs in prairie region:

- Key core parcels are protected for fish, game and other wildlife ~ *The outcomes of the Lower Wild Rice River corridor project will be a stable stream with permanently protected and restored riparian corridor. This will significantly improve upland and aquatic habitat for fish and wildlife within the immediate corridor. Also, this project will improve water quality and provide substantial benefits extending to the entire watershed.*

Does this program include leveraged funding?

Yes

Explain the leverage:

The WRWD has agreed to contribute an amount equal to 20% of the offered RIM payments to match the LSOHC funding. This amounts to an approximately 15% match to the LSOHC funds.

Per MS 97A.056, Subd. 24, Please explain whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose.

This funding request is not supplanting existing funding or a substitution for any previous funding.

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended?

Once a RIM easement is acquired, BWSR is responsible for monitoring and enforcement into perpetuity. The BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements. Easements are inspected for the first five consecutive years beginning in the year after the easement is recorded. Thereafter, on-site inspections are performed every three years and compliance checks are performed in the other two years. SWCDs report to BWSR on each site inspection conducted and partners' staff document findings. A non-compliance procedure is implemented when potential violations or problems are identified.

Perpetual monitoring and enforcement costs have been calculated at \$6,500 per easement. This value is based on using local SWCD staff for monitoring and landowner relations and existing enforcement authorities. The amount listed for Easement Stewardship cover costs of the SWCD regular monitoring, BWSR oversight, and any enforcement necessary.

Actions to Maintain Project Outcomes

Year	Source of Funds	Step 1	Step 2	Step 3
2020 - Ongoing	Stewardship Account	Inspection first 5 years; then every 3rd year	Corrective actions on any violations	Enforcement action taken by MN Attorney General Office
2020 - Ongoing	Landowner Responsibility	Maintain compliance with easement terms	-	-

Activity Details

Requirements

If funded, this program will meet all applicable criteria set forth in MS 97A.056?

Yes

Is the land you plan to acquire (easement) free of any other permanent protection?

Yes

Who will manage the easement?

BWSR will be the responsible party for monitoring and enforcing easements.

Who will be the easement holder?

BWSR will be the easement holder.

What is the anticipated number of easements (range is fine) you plan to accomplish with this appropriation?

Approximately 12 easements are planned to be acquired.

Land Use

Will there be planting of any crop on OHF land purchased or restored in this program?

Yes

Explain what will be planted:

In certain circumstances food plots for wildlife are an allowable use on RIM easements and must be part of an approved Conservation Plan. Food plots on narrow buffers, steep slopes and wet areas are not allowed. RIM policy limits food plots to 10% of the total easement area or 5 acres whichever is smaller. There is no cost share for establishment of food plots and upon termination the landowners must reestablish the vegetation as prescribed in the Conservation Plan at their own expense. Food plots are a rarely selected option by landowners, to date only 2.2% of RIM easements have food plots.

Are any of the crop types planted GMO treated?

False

Will the eased land be open for public use?

No

Are there currently trails or roads on any of the proposed acquisitions?

Yes

Describe the types of trails or roads and the allowable uses:

This appropriation is funding a program that will have a parcel list identified at a later time. Roads or trails are typically excluded from the easement area if they serve no beneficial purpose to easement maintenance, monitoring, or enforcement. Existing trails and roads are identified during the easement acquisition process. Some roads and trails, such as agricultural field accesses, are allowed to remain.

Will the trails or roads remain and uses continue to be allowed after OHF acquisition?

Yes

How will maintenance and monitoring be accomplished?

The easements secured under this project will be managed as part of the MN Board of Water and Soil Resources (BWSR) RIM Reserve Program that has over 7,000 easements currently in place. Easements are monitored annually for each of the first 5 years and then every 3rd year after that. BWSR, in cooperation with Soil and Water Conservation Districts (SWCD), implements a stewardship process to track, monitor quality and assure compliance with easement terms.

Under the terms of the Reinvest In Minnesota (RIM) Easement Program, landowners are required to maintain compliance with the easement. A conservation plan is developed with the landowner and maintained as part of the easement. Basic easement compliance costs are borne by the landowner, periodic enhancements may be cost shared from a variety of sources.

Will new trails or roads be developed or improved as a result of the OHF acquisition?

Yes

Describe the types of trails or roads and the allowable uses:

This appropriation is funding a program that will have a parcel list identified at a later time. Roads or trails are typically excluded from the easement area if they serve no beneficial purpose to easement maintenance, monitoring, or enforcement. Existing trails and roads are identified during the easement acquisition process. Some roads and trails, such as agricultural field accesses, are allowed to remain.

How will maintenance and monitoring be accomplished?

The easements secured under this project will be managed as part of the MN Board of Water and Soil Resources (BWSR) RIM Reserve

Program that has over 7,000 easements currently in place. Easements are monitored annually for each of the first 5 years and then every 3rd year after that. BWSR, in cooperation with Soil and Water Conservation Districts (SWCD), implement a stewardship process to track, monitor quality and assure compliance with easement terms.

Under the terms of the Reinvest In Minnesota (RIM) Easement Program, landowners are required to maintain compliance with the easement. A conservation plan is developed with the landowner and

maintained as part of each easement. Basic easement compliance costs are borne by the landowner, periodic enhancements may be cost shared from a variety of sources.

Will the acquired parcels be restored or enhanced within this appropriation?

Yes

Vegetative restoration is planned to occur and these restoration costs are included in the easement acquisition amount.

Timeline

Activity Name	Estimated Completion Date
Obtain applications from eligible landowners	June 30, 2021
Allocation to specific parcels	July 30, 2021
Easements recorded	June 30, 2024
Restorations completed and final report submitted	November 1, 2025

Date of Final Report Submission: 11/01/2025

Availability of Appropriation: Subd. 7. Availability of Appropriation

Money appropriated in this section may not be spent on activities unless they are directly related to and necessary for a specific appropriation and are specified in the accomplishment plan approved by the Lessard-Sams Outdoor Heritage Council. Money appropriated in this section must not be spent on indirect costs or other institutional overhead charges that are not directly related to and necessary for a specific appropriation. Unless otherwise provided, the amounts in this section are available until June 30, 2023. For acquisition of real property, the amounts in this section are available until June 30, 2024, if a binding agreement with a landowner or purchase agreement is entered into by June 30, 2023, and closed no later than June 30, 2024. Funds for restoration or enhancement are available until June 30, 2025, or five years after acquisition, whichever is later, in order to complete initial restoration or enhancement work. If a project receives at least 15 percent of its funding from federal funds, the time of the appropriation may be extended to equal the availability of federal funding to a maximum of six years if the federal funding was confirmed and included in the original approved draft accomplishment plan. Funds appropriated for fee title acquisition of land may be used to restore, enhance, and provide for public use of the land acquired with the appropriation. Public-use facilities must have a minimal impact on habitat in acquired lands.

Budget

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan.

As a % of the Easement Acquisition: 5.05%

How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount?

The Lower Wild Rice River corridor habitat restoration project is a long term project. The reduced level of funding was accommodated by adjusting the expected number of acquired acres down to 430 acres

Describe and explain leverage source and confirmation of funds:

The WRWD has agreed to contribute an amount equal to 20% of the offered RIM payments to match the LSOHC funding. This amounts to an approximately 15% match to the LSOHC funds.

Contracts

What is included in the contracts line?

The contract line amount will be used for payments to SWCD staff for easement implementation.

Easement Stewardship

What is the number of easements anticipated, cost per easement for stewardship, and explain how that amount is calculated?

Perpetual monitoring and enforcement costs have been calculated at \$6,500 per easement. This value is based on using local SWCD staff for monitoring and landowner relations and existing enforcement authorities. The amount listed for Easement Stewardship covers costs of the SWCD regular monitoring, BWSR oversight and any enforcement necessary.

Travel

Does the amount in the travel line include equipment/vehicle rental?

No

Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging

The travel line will only be used for traditional travel costs.

I understand and agree that lodging, meals, and mileage must comply with the current MMB Commissioner Plan:

No

Direct Support Services

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?

BWSR Calculates direct support services costs that are directly related to and necessary for each request based on the type of work being done.

Federal Funds

Do you anticipate federal funds as a match for this program?

No
