

## Lessard-Sams Outdoor Heritage Council

Minnesota Forest Recovery Project: Phase II  
Laws of Minnesota 2022 Accomplishment Plan

---

### General Information

**Date:** 02/10/2025

**Project Title:** Minnesota Forest Recovery Project: Phase II

**Funds Recommended:** \$4,585,000

**Legislative Citation:** ML 2022, Ch. 77, Art. 1, Sec. 2, subd. 3(a)

**Appropriation Language:** \$4,585,000 the second year is to the commissioner of natural resources for an agreement with The Nature Conservancy in cooperation with the Department of Natural Resources and Minnesota Land Trust to acquire permanent conservation easements and restore and enhance degraded forests in Beltrami, Cass, Cook, Itasca, Lake, Koochiching, and St. Louis Counties. Of this amount, up to \$179,000 is to the easement holder to establish a monitoring and enforcement fund as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. A list of proposed permanent conservation easements, restorations, and enhancements must be provided as part of the required accomplishment plan.

### Manager Information

**Manager's Name:** Jim Manolis

**Title:** Forest Conservation Program Director

**Organization:** The Nature Conservancy

**Address:** 1101 West River Parkway

**City:** Minneapolis, MN 55415

**Email:** jim.manolis@tnc.org

**Office Number:** 612-331-0796

**Mobile Number:** 612-810-5400

**Fax Number:** 612-331-0770

**Website:** nature.org/minnesota

### Location Information

**County Location(s):** Lake, St. Louis, Cook, Itasca and Koochiching.

**Eco regions in which work will take place:**

Northern Forest

**Activity types:**

Enhance

Protect in Easement

**Priority resources addressed by activity:**

Forest

**Narrative****Abstract**

Northern Minnesota's forests are increasingly challenged by invasive species, insect pests, a changing climate, and fragmentation. Some habitats have declined substantially, including long-lived-conifers, young-forest, and large-patch habitats. These habitats are critical for numerous game and non-game species of concern. This project seeks to protect 3,445 acres of intact forest habitat through conservation easements and enhance 11,555 acres of degraded forests. The enhancements will increase long-lived conifers, young forest gaps, riparian forest complexity, and patch-size diversity. By acting today, we can improve the connectivity, health, and resilience of our forests for all the benefits they provide.

**Design and Scope of Work**

In northern Minnesota, vast expanses of forest are now in poor condition with diminished value for wildlife. Large tracts of private lands remain vulnerable to development. Long-lived conifers and diverse young forest habitats have declined. Threats such as invasive species, a warming climate, fragmentation, and habitat loss pose great challenges for forest and wildlife managers. Over time, forest health issues tend to become more difficult and expensive to reverse. Significant investments in Minnesota's forests are urgently needed now to improve forest health for wildlife, clean water, cultural values, and local economies.

Goals of this project are to:

- Protect large tracts of contiguous forest through conservation easements
- Enhance forest productivity in degraded stands to benefit wildlife
- Enhance riparian forests to improve water quality and fish habitat
- Enhance tree species, age-class, and patch size diversity to improve habitat and increase forest resilience

Phase I of the project built on a long history of enhancement and protection partnerships in northern Minnesota. Prior to Phase I, TNC led over 12,000 acres of enhancements and worked with partners to conserve over 300,000 acres of forests with conservation easements.

Since Phase I of this project began in 2019, we completed 2100 enhancement acres and will exceed enhancement goals by the closing date in 2022.

Phase II seeks to enhance 11,555 acres and will add an easement component that will protect 3,445 acres.

Enhancements will include:

- Site preparation including shearing, brush cutting, and removal of trees damaged by spruce budworm
- Tree planting and tending
- Coordinating across multiple landowners to maintain or increase young and mature forest patch size

- Prescribed burning
- Black Ash stand diversification

We used a collaborative approach to identify enhancement sites across DNR, Leech Lake Band of Ojibwe, US Forest Service, and Beltrami, Lake, and St. Louis County lands, and we will seek additional landowner partners. Advisory partners include the American Bird Conservancy, the 1854 Treaty Authority, The Minnesota Land Trust, and the Ruffed Grouse Society. We also partner with groups including the Arrowhead, North Shore, and Manitou collaboratives and Minnesota Forest Resource Council Landscape Committees.

Conservation easements will be acquired from willing sellers. In collaboration with the MN DNR Forests for the Future Program and Minnesota Land Trust, we are purposefully keeping options open to match the top landowners and properties to the conservation easement option that works best for them. We will work closely with MN DNR and MLT to prioritize properties for outreach, rank opportunities, and find the best conservation easement solution on a property-by-property basis (DNR, MLT, or TNC).

Properties will be prioritized based on factors including tract size, Minnesota Biological Survey data, aquatic features, contribution to larger complexes of protected forest land, forest condition, and relevance to the Resilient and Connected Network data (developed by TNC scientists and partners). We seek to conserve the largest and most important gaps in the Resilient and Connected Network.

During implementation, TNC will strengthen local partnerships, seek and coordinate easement acquisitions, coordinate habitat enhancements with landowners, and supervise contractors.

### **How does the plan address habitats that have significant value for wildlife species of greatest conservation need, and/or threatened or endangered species, and list targeted species?**

This proposal addresses Species of Greatest Conservation Need in two main ways. First, it clearly addresses Objective 1 of the State Wildlife Action Plan: “Within the Wildlife Action Network, maintain and enhance the resilience of the habitats upon which Species in Greatest Conservation Need (SGCN) and other wildlife depend.” The proposed habitat projects increase forest diversity and thus maintain or enhance resilience. The majority of proposed sites fall within higher ranking areas of the Wildlife Action Network. Second, specific treatments carried out by this project will benefit at least 20 SGCNs. For example, treatments that increase long-lived conifer abundance will benefit:

- Evening Grosbeak
- Olive-sided Flycatcher
- Spruce Grouse
- Purple Finch
- Connecticut Warbler
- Black-backed Woodpecker
- Winter Wren
- Moose
- Boreal Owl
- Canada Lynx

Treatments that create young forest conditions will benefit:

- Veery

- Wood Thrush
- Golden-winged Warbler
- American Woodcock
- Moose

Gap creation and planting in riparian areas will benefit:

- Veery
- Black-billed Cuckoo
- Olive-sided Flycatcher
- Common Merganser
- Winter Wren
- Four-toed salamander
- Eastern red-backed salamander
- Coaster Brook Trout
- Lake Sturgeon

**Describe how the plan uses science-based targeting that leverages or expands corridors and complexes, reduces fragmentation or protects areas identified in the MN County Biological Survey:**

For prioritizing lands for conservation easements, we are explicitly seeking to build conservation complexes and protect habitat corridors. We are targeting some of the larger private holdings in otherwise conserved areas to help ensure landscape contiguity and prevent habitat fragmentation. We are using The Nature Conservancy's Resilient and Connected Network data, developed in collaboration with 100's of state, federal, and academic scientists to create a continental network of lands and waters that are resilient and will allow nature to adapt to a changing climate. Northern Minnesota, and Great Lakes forests in general, are a key continental priority in that network. We will prioritize among those parcels with the other data mentioned above including MN Biological Survey data.

For our enhancement work, we drew from a pool of over 70,000 acres of sites that partners identified as in need of habitat enhancement. To narrow this pool to the set of submitted parcels, we used a coarse-filter approach that considered partner priorities, geographic distribution across landscapes, distribution across partners, and overlap with the Resilient and Connected Network (which incorporates MN Biological Survey Data and the Minnesota Wildlife Action Network). Upon initiation of Phase II of this project assuming funding in July 2022, we will revisit the parcel list to take a more refined GIS approach and consider new, pertinent information. This information will include GIS Lidar-based data on forest complexity, information on insect damage, and analysis of corridors. It will also allow substitution of sites to adjust for environmental change or new opportunities (e.g., changes in site conditions from natural disturbance, parcels submitted by new partners to create larger, cross-ownership management units).

**Which two sections of the Minnesota Statewide Conservation and Preservation Plan are most applicable to this project?**

LU10 Support and expand sustainable practices on working forested lands

LU8 Protect large blocks of forest land

**Which two other plans are addressed in this program?**

Minnesota Forest Resource Council Landscape Plans

Minnesota's Wildlife Action Plan 2015-2025

**Which LSOHC section priorities are addressed in this program?****Northern Forest**

Restore forest-based wildlife habitat that has experienced substantial decline in area in recent decades

**Outcomes****Programs in the northern forest region:**

Improved availability and improved condition of habitats that have experienced substantial decline ~ *We will seek and leverage funds to measure regeneration success, structural variables, and other measures of stand condition of treated sites. We will encourage landowner partners to do the same.*

**Does this program include leveraged funding?**

Yes

**Explain the leverage:**

To support our ongoing forest enhancement work, we continually seek and acquire private foundation grants, public funds, and donations from corporations and individuals. Leverage sources and amounts for this proposal include:

- TNC Private Donations
- In-kind labor provided by National Forests

For our conservation easement work, we will seek 'bargain sales' wherever possible where landowners reduce a portion of the purchase price as a charitable donation.

**Per MS 97A.056, Subd. 24, Please explain whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose.**

This proposal does not substitute or supplant previous funding that was not from a legacy fund.

**Non-OHF Appropriations**

Year	Source	Amount
2020	TNC Private Donations	\$33,000

**How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended?**

This project will strengthen and support the many collaborative efforts across the forested region by mobilizing efforts to increase the pace and scale of forest protection, restoration and enhancement. Through this effort, we are developing consistent methodologies and approaches that can be institutionalized through a collaborative process, thus ensuring a long-term commitment that follows ecological need and urgency. When possible, Outdoor Heritage funds will be used to leverage federal and private funds to expand restoration and enhancement efforts to the most critically needed locations.

## Actions to Maintain Project Outcomes

Year	Source of Funds	Step 1	Step 2	Step 3
20, 40, 60	Landowner responsibility	Check stand condition	Treat as appropriate	-
7, 10	We will seek a mix of private and public funds	Check sapling condition, repeat burns on appropriate sites	Prune white pines for blister rust	-
5	We will seek a mix of private and public funds	Release/cut competing brush around seedlings	-	-
1-7	We will seek a mix of private and public funds	Install browse protection on planted seedlings, remove fuel loads or burn on appropriate sites	Monitor seedling survival, fuel, burn success	-

### Provide an assessment of how your program celebrates cultural diversity or reaches diverse communities in Minnesota, including reaching low- and moderate-income households:

Phase I of the project already includes the Leech Lake Band of the Ojibwe as a partner through their Division of Resource Management (DRM), with several projects emphasizing interests of the band within the Leech Lake Reservation and its overlap with the Chippewa National Forest. These include prescribed fire to enhance pine woodland systems, blueberry regeneration and associated open habitats, and enhancing diversity in black ash stands. These are reservation interests that were initiated by the Leech Lake DRM. The Nature Conservancy is also beginning a partnership with the Leech Lake Tribal College, with Tribal interns gaining natural resource field experience jointly with TNC, Leech Lake Band of Ojibwe, The Chippewa National Forest, and other organizations. Interns will help conduct site-level reconnaissance, project planning, and monitoring on a range of project sites, including those funded by OHF.

In Northeast Minnesota, 1854 Treaty Authority staff will serve as an advisory partner, to refine how the natural resource and cultural interests of their member bands can be enhanced through engagement with the project. Initial conversations suggest substantial common ground on interests and goals of this proposal, and we will deepen this conversation over the next year before Phase II begins, also including specific input from Fon du Lac, Grant Portage, and Bois Forte members and natural resource staff.

These efforts aim to benefit Indigenous nations through enhancing wildlife habitats that are culturally important to them, and by increasing training and education opportunities that could lead to natural resource employment for Indigenous people.

The Nature Conservancy is also initiating a new program to increase diversity, equity, and inclusion in all of our work, and we will look for ways to engage and benefit other BIPOC communities in aspects of this project.

## Activity Details

### Requirements

**If funded, this program will meet all applicable criteria set forth in MS 97A.056?**

Yes

**Is the land you plan to acquire (easement) free of any other permanent protection?**

Yes

**Who will manage the easement?**

This will be determined based on consultation with the landowner and partners involved, but could be TNC, MLT, or DNR. Factors considered in this decision include landowner preferences, geographic location, and the size (acreage) of the property. Funds budgeted within this project for easement stewardship, monitoring, and enforcement will be provided to the easement holder.

**Who will be the easement holder?**

This will be determined based on consultation with the landowner and partners involved, but could be TNC, MLT, or DNR. Factors considered in this decision include landowner preferences, geographic location, and the size (acreage) of the property. Funds budgeted within this project for easement stewardship, monitoring, and enforcement will be provided to the easement holder.

**What is the anticipated number of easements (range is fine) you plan to accomplish with this appropriation?**

1-5, with 5 the most likely maximum.

**Will restoration and enhancement work follow best management practices including MS 84.973 Pollinator Habitat Program?**

Yes

**Is the restoration and enhancement activity on permanently protected land per 97A.056, Subd 13(f), tribal lands, and/or public waters per MS 103G.005, Subd. 15 or on lands to be acquired in this program?**

Yes

**Where does the activity take place?**

WMA

Permanently Protected Conservation Easements

County/Municipal

State Forests

Other : US Forest Service Lands, Tribal Lands

AMA

**Land Use**

**Will there be planting of any crop on OHF land purchased or restored in this program, either by the proposer or the end owner of the property, outside of the initial restoration of the land?**

No

**Will the eased land be open for public use?**

No

**Are there currently trails or roads on any of the proposed acquisitions?**

No

**Will new trails or roads be developed or improved as a result of the OHF acquisition?**

No

**Will the acquired parcels be restored or enhanced within this appropriation?**

No

Enhancement work in this project emphasizes lands that are already protected. Restoration and enhancement on acquired conservation easements may be considered in future phases of this project, if needed.

**Will the land that you acquire (fee or easement) be restored or enhanced within this program's funding and availability?**

No

**Explain how, when, and source of the R/E work:**

Enhancement work in this project emphasizes lands that are already protected. Restoration and enhancement on acquired conservation easements may be considered in future phases of this project, if needed.

**Timeline**

Activity Name	Estimated Completion Date
Acquire conservation easements	June 2026
Conservation easements: Landowner outreach and due diligence	July 2022-June 2026
Complete final prescribed burns	June 2027
Complete third season of planting	May 2025
Complete third season of site preparation	July-December 2024
Complete second season of browse protection	November 2024
Complete second season of planting	May 2024
Complete second season of site preparation	July-December 2023
Complete first season of browse protection	November 2023
Complete first season of planting	May 2023
Complete first season of site preparation	July-December 2022

**Date of Final Report Submission:** 11/01/2027

**Availability of Appropriation:** Subd. 7. Availability of Appropriation

(a) Money appropriated in this section may not be spent on activities unless they are directly related to and necessary for a specific appropriation and are specified in the accomplishment plan approved by the Lessard-Sams Outdoor Heritage Council. Money appropriated in this section must not be spent on indirect costs or other institutional overhead charges that are not directly related to and necessary for a specific appropriation. Money appropriated to acquire land in fee may be used to restore, enhance, and provide for public use of the land acquired with the appropriation. Public-use facilities must have a minimal impact on habitat in acquired lands.

(b) Money appropriated in this section is available as follows:

(1) money appropriated for acquiring real property is available until June 30, 2026;

(2) money appropriated for restoring and enhancing land acquired with an appropriation in this act is available for four years after the acquisition date with a maximum end date of June 30, 2030;

(3) money appropriated for restoring or enhancing other land is available until June 30, 2027;

(4) notwithstanding clauses (1) to (3), money appropriated for a project that receives at least 15 percent of its funding from federal funds is available until a date sufficient to match the availability of federal funding to a maximum of six years if the federal funding was confirmed and included in the original approved draft accomplishment plan; and

(5) money appropriated for other projects is available until the end of the fiscal year in which it is appropriated.

## Budget

*Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan.*

### Totals

Item	Funding Request	Leverage	Leverage Source	Total
Personnel	\$472,600	\$18,000	TNC Private Donations	\$490,600
Contracts	\$1,678,000	\$113,000	USFS in-kind labor	\$1,791,000
Fee Acquisition w/ PILT	-	-	-	-
Fee Acquisition w/o PILT	-	-	-	-
Easement Acquisition	\$1,068,800	-	-	\$1,068,800
Easement Stewardship	\$179,000	-	-	\$179,000
Travel	\$37,500	-	-	\$37,500
Professional Services	\$125,000	-	-	\$125,000
Direct Support Services	\$225,100	-	-	\$225,100
DNR Land Acquisition Costs	-	-	-	-
Capital Equipment	-	-	-	-
Other Equipment/Tools	-	-	-	-
Supplies/Materials	\$799,000	\$40,000	TNC private donations	\$839,000
DNR IDP	-	-	-	-
<b>Grand Total</b>	<b>\$4,585,000</b>	<b>\$171,000</b>	-	<b>\$4,756,000</b>

### Personnel

Position	Annual FTE	Years Working	Funding Request	Leverage	Leverage Source	Total
Forester, Coordination Support, Protection, Grants Admin	1.7	3.0	\$472,600	\$18,000	TNC Private Donations	\$490,600

**Amount of Request:** \$4,585,000

**Amount of Leverage:** \$171,000

**Leverage as a percent of the Request:** 3.73%

**DSS + Personnel:** \$697,700

**As a % of the total request:** 15.22%

**Easement Stewardship:** \$179,000

**As a % of the Easement Acquisition:** 16.75%

**How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount?**

The overall appropriation will be 48% of that originally proposed. We scaled back AP conservation easement acres to 44% of those originally proposed (3,445/7830), and scaled back enhancement acres to 49% of those originally proposed (11,555/23,780).

**Describe and explain leverage source and confirmation of funds:**

Leverage sources include conservative estimates of US Forest Service in-kind labor and TNC private donations that contribute to supplies and staff time.

**Does this project have the ability to be scalable?**

Yes

**If the project received 50% of the requested funding**

**Describe how the scaling would affect acres/activities and if not proportionately reduced, why?**

For the easement portion, we estimate that 70% of requested funding would result in 69% of original results (5,405 vs. 7,830 acres) due to fixed project management costs. For the enhancement portion, we estimate that 70% of requested funding would result in 69% of enhancements (16,408 acres).

**Describe how personnel and DSS expenses would be adjusted and if not proportionately reduced, why?**

Staff costs are estimated to be reduced to 80% with 70% funding due to some fixed costs of managing the project. This would increase the proportion of DSS + Personnel/out of total request slightly, by about 1% over the fully funded request.

**Personnel**

**Has funding for these positions been requested in the past?**

Yes

**Contracts**

**What is included in the contracts line?**

The entire contract line item is dedicated to on-the-ground enhancement work.

**Easement Stewardship**

**What is the number of easements anticipated, cost per easement for stewardship, and explain how that amount is calculated?**

We anticipate 1-5 conservation easements. The number will depend on size of properties of interested landowners. We budgeted for easement stewardship using the high estimate used by the Minnesota Land Trust for more complex projects (\$35,000 per conservation easement for 5 easements).

**Travel**

**Does the amount in the travel line include equipment/vehicle rental?**

Yes

**Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging**

Where it is more cost-effective than paying mileage reimbursement, we have budgeted for car rental and fuel reimbursement.

**I understand and agree that lodging, meals, and mileage must comply with the current MMB Commissioner Plan:**

Yes

## Direct Support Services

### **How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?**

DSS is based on The Nature Conservancy's Federal Negotiated Rate (FNR) as proposed and approved by the US Dept. of Interior on an annual basis. In this proposal we are requesting reimbursement of 7.5% of eligible base costs as determined by our annual FNR and based on suggestions from the Council in prior years' hearings. The amount requested for reimbursement represents less than one-third of the total reimbursable costs allowed under the FNR. Examples of expenses included in the FNR include services from in-house legal counsel; finance, human resources; and information technology support, all of which contribute directly to the implementation of the project. The FNR is not applied to capital equipment over \$50,000 or land acquisition.

## Federal Funds

### **Do you anticipate federal funds as a match for this program?**

No

## Parcels

### Parcel Information

#### Sign-up Criteria?

No

#### Explain the process used to identify, prioritize, and select the parcels on your list:

For prioritizing lands for conservation easements, we are targeting some of the larger private holdings in otherwise conserved areas to help ensure landscape contiguity and prevent habitat fragmentation. We are using The Nature Conservancy's Resilient and Connected Network data, developed in collaboration with hundreds of state, federal, and academic scientists to create a continental network of lands and waters that are resilient and will allow nature to adapt to a changing climate. We will prioritize among those parcels with the other data mentioned above including MN Biological Survey data.

For our enhancement work, we drew from a pool of over 70,000 acres of sites that partners identified as in need of habitat enhancement. To narrow this pool to the set of submitted parcels, we used a coarse-filter approach that considered partner priorities, geographic distribution across landscapes, distribution across partners, and overlap with the Resilient and Connected Network (which incorporates MN Biological Survey Data and the Minnesota Wildlife Action Network). Upon initiation of Phase II of this project assuming funding in July 2022, we will revisit the parcel list to take a more refined GIS approach and consider new, pertinent information. This information will include GIS Lidar-based data on forest complexity, information on insect damage, and analysis of corridors. It will also allow substitution of sites to adjust for environmental change or new opportunities (e.g., changes in site conditions from natural disturbance, parcels submitted by new partners to create larger, cross-ownership management units).
