

Lessard-Sams Outdoor Heritage Council

DNR Forest Enhancement Phase 2 Laws of Minnesota 2022 Accomplishment Plan

General Information

Date: 06/20/2022

Project Title: DNR Forest Enhancement Phase 2

Funds Recommended: \$2,172,000

Legislative Citation: ML 2022, Ch. 77, Art. 1, Sec. 2, subd. 3(e)

Appropriation Language: \$2,172,000 the second year is to the commissioner of natural resources to restore and enhance wildlife habitat within the northern forest region in wildlife management areas, scientific and natural areas, aquatic management areas, and state forests. A list of proposed land restorations and enhancements must be provided as part of the required accomplishment plan.

Manager Information

Manager's Name: Greg Hoch

Title: Prairie Habitat Supervisor

Organization: DNR

Address: 500 Lafayette Rd

City: St Paul, MN 55055

Email: greg.hoch@state.mn.us

Office Number: 651-259-5230

Mobile Number: 651-259-5230

Fax Number:

Website: www.dnr.state.mn.us

Location Information

County Location(s): Anoka, Dakota, Hennepin, Houston, Fillmore, Wabasha, Aitkin, Cass, Crow Wing, Lake, Mille Lacs, Winona, Todd, Pine, Wadena, Pennington, Meeker, Le Sueur, Sibley, Polk, Beltrami, Dodge, Lake of the Woods, Morrison, St. Louis, Chisago, Cook, Goodhue, Itasca, Kanabec, Hubbard, Becker, Carlton and Isanti.

Eco regions in which work will take place:

- Northern Forest
- Forest / Prairie Transition
- Metro / Urban
- Southeast Forest
- Prairie

Activity types:

- Restore
- Enhance

Priority resources addressed by activity:

- Wetlands
- Forest
- Habitat

Narrative**Abstract**

Minnesota's iconic northern forests, wetlands, and brushland habitats require management beyond basic forestry practices or at smaller scales than commercial operations work. Other enhancements, such as brushland shearing or mowing have low commercial value but high wildlife value. These additional habitat enhancements improve the quality of the forests for both wildlife and outdoor recreation. DNR's Conservation Agenda, Wildlife Action, Forest Action, SNA Strategic Land Protection and SFRMP Plans, will guide habitat enhancements in this proposal to see that all activities meet these objectives.

Design and Scope of Work

Northern Minnesota's forest habitats include pines, maple and basswood, aspen, oak forests and savannas, as well as different age classes of forests. The region also includes rivers, lakes, sedge meadows, bogs, and brushland. Each of these habitats are home to a wide array with game and non-game species, and multiple Species of Greatest Conservation Need (SGCN). They provide outdoor recreation, timber products, and support local communities. They also clean and absorb water and sequester carbon. However, these forests face increasing stress from invasive species, climate change, forest loss, and fragmentation. While forest harvest is an important tool in management of our forests, we can do additional or different enhancements to maximize the diversity and productivity of these habitats for both wildlife and people. For example, timber harvest can create a wildlife opening. However other management such as periodic mowing is needed to maintain the opening.

We will accomplish strategic and targeted enhancements through contractors to conduct activities which support healthy, diverse and resilient habitats. Activities may include 1) invasive species control, 2) firebreak development and maintenance as well as prescribed burns in fire-dependent forests, brushlands and wetlands, 3) maintaining wildlife openings 4) tree removal, girdling, brush mowing/shearing, 5) infrastructure for conservation grazing in openland and brushland habitats, 6) tree release, such as enhancing oak management for mast production, 7) forest regeneration site prep, 8) seed and acorn collection followed by broadcasting and/or drilling of seed, and 8) tree planting and protection to reforest and restore habitats, add conifer to the landscape, provide thermal cover, diversify forests, and address ash stand management.

Forest managers in Minnesota regularly work across agencies and NGOs to take a landscape view of forests. For instance, there is currently an NRCS RCPP (Regional Conservation Partnership Program) that promotes young forests for golden-winged warblers and other species that use these habitats. The people involved with this program regularly talk to DNR staff and those working for other agencies in northern Minnesota to coordinate efforts.

How does the plan address habitats that have significant value for wildlife species of greatest conservation need, and/or threatened or endangered species, and list targeted species?

Both young forests and mature forests require disturbances beyond standard timber harvest methods to maximize their benefits for wildlife. Prescribed fire in mature forests helps clear underbrush and open up the understory. Fire is especially important in oak and pine forests. Shearing brushlands maintains the low structure that species prefer in this habitat. In other cases, areas can be seeded with acorns or other seeds after a harvest to stimulate regrowth. Young forests and small forest openings are critical to many species of birds and mammals and need frequent, repeated enhancements to retain their habitat quality.

Each of the practices mentioned in the design and scope will benefit a wide range of game and non-game species, including mammals, birds, reptiles and amphibians, as well as pollinating insects.

In many cases, small-scale projects, such as forest openings, diversify the larger forest landscape and increase the abundance of wildlife well beyond the small footprint of the project.

Describe how the plan uses science-based targeting that leverages or expands corridors and complexes, reduces fragmentation or protects areas identified in the MN County Biological Survey:

DNR's Conservation Agenda, Wildlife Action Plan, Forest Action Plan, SNA Strategic Land Protection Plan (along with specific site management plans), and Section Forest Resource Management Plans, which will guide activities, were developed using the best information and science to identify goals and strategies.

We know quite a bit about the habitat needs of many forest species, including mature forest species such as marten and fisher, and young forest species like woodcock and golden-winged warblers. We have also learned that many of the 'young forest' birds require mature forests during some parts of their life. In some cases, mature forests need enhancements such as prescribed fire to stay productive. Likewise, larger species such as deer and moose need a wide range of habitat types during the different seasons. Researchers across the eastern US have been discussing the loss of oaks from forests since the early 1990s. Lack of prescribed fire is the most often cited reason for declines in oaks in many areas. It's not enough to just have acres of forest on the landscape. The forest habitat type, age, patch size, and pattern on the landscape is probably far more important. We have the science to know what we need to do for habitat enhancement. It's usually the ability to implement that science that is the limiting factor. These dollars would allow us to apply the science to the landscape for the benefit of a wide range of wildlife species.

Which two sections of the Minnesota Statewide Conservation and Preservation Plan are most applicable to this project?

- H1 Protect priority land habitats
- LU10 Support and expand sustainable practices on working forested lands

Which two other plans are addressed in this program?

- Minnesota's Wildlife Action Plan 2015-2025
- Other : Forest Action Plan

Which LSOHC section priorities are addressed in this program?

Forest / Prairie Transition

- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

Metro / Urban

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna with an emphasis on areas with high biological diversity

Northern Forest

- Restore forest-based wildlife habitat that has experienced substantial decline in area in recent decades

Prairie

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna

Southeast Forest

- Restore forest-based wildlife habitat that has experienced substantial decline in area in recent decades

Does this program include leveraged funding?

No

Per MS 97A.056, Subd. 24, Please explain whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose.

These funds are for additional enhance/restoration work beyond what the DNR is already conducting. These funds are not supplanting or substituting any funds.

Non-OHF Appropriations

Year	Source	Amount
2020	Game and Fish	24607000
2020	Heritage Enhancement	3499000
2020	Dedicated Accounts	2900000

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended?

We will select and implement projects to achieve high quality and enduring benefits. Projects have variable lifespans depending on project type, weather and other environmental conditions. Many of the projects are meant to endure for decades, at which point, regular forest management activity through harvest. DNR staff and staff from partner agencies/NGOs will monitor them to if and when additional enhancement are needed. Work will be sustained through internal DNR funds, commercial forest practices, and future requests from the OHF and related external funding.

Actions to Maintain Project Outcomes

Year	Source of Funds	Step 1	Step 2	Step 3
2027 and beyond	listed above and future OHF requests	continue monitoring	adapt results	seek additional funding
2025	listed above and future OHF requests	monitor results	document results	develop budget for additional work with internal and external funds

How will the program directly involve, engage, and benefit BIPOC (Black, Indigenous, People of Color) and diverse communities:

DNR’s OHF projects aim to serve all Minnesotans. At the same time, we are bringing more focus in all our work to BIPOC and diverse communities. The Minnesota DNR has adopted advancing diversity, equity and inclusion (DEI) as a key priority in its 2020-22 strategic plan. The plan focuses on increasing the cultural competence of our staff, creating a workforce that is reflective of Minnesota, continuing to strengthen tribal consultation and building partnerships with diverse communities.

The OHF funds high quality habitat projects that provide ecosystem services like clean water and carbon sequestration that support environmental justice. OHF also supports public access and recreational opportunities on these lands. OHF projects and outcomes benefit BIPOC and diverse communities through recreational opportunities that are close-to-home, culturally responsive and accessible to Minnesotans with disabilities.

Activity Details

Requirements

If funded, this program will meet all applicable criteria set forth in MS 97A.056?

Yes

Will restoration and enhancement work follow best management practices including MS 84.973 Pollinator Habitat Program?

Yes

Is the restoration and enhancement activity on permanently protected land per 97A.056, Subd 13(f), tribal lands, and/or public waters per MS 103G.005, Subd. 15?

Yes

Where does the activity take place?

- WMA
- WPA
- SNA
- AMA
- Permanently Protected Conservation Easements
- County/Municipal
- Refuge Lands
- State Wilderness Areas
- State Forests
- Other : national forest, Con-Con lands

Land Use

Will there be planting of any crop on OHF land purchased or restored in this program?

No

Timeline

Activity Name	Estimated Completion Date
continued monitoring and follow-up management and enhancements	ongoing
implement enhancements	summer 2027

Date of Final Report Submission: 10/31/2027

Availability of Appropriation: Subd. 7. Availability of Appropriation

(a) Money appropriated in this section may not be spent on activities unless they are directly related to and necessary for a specific appropriation and are specified in the accomplishment plan approved by the Lessard-Sams Outdoor Heritage Council. Money appropriated in this section must not be spent on indirect costs or other institutional overhead charges that are not directly related to and necessary for a specific appropriation. Money appropriated to acquire land in fee may be used to restore, enhance, and provide for public use of the land acquired with the appropriation. Public-use facilities must have a minimal impact on habitat in acquired lands.

(b) Money appropriated in this section is available as follows:

- (1) money appropriated for acquiring real property is available until June 30, 2026;
- (2) money appropriated for restoring and enhancing land acquired with an appropriation in this act is available for four years after the acquisition date with a maximum end date of June 30, 2030;
- (3) money appropriated for restoring or enhancing other land is available until June 30, 2027;
- (4) notwithstanding clauses (1) to (3), money appropriated for a project that receives at least 15 percent of its funding from federal funds is available until a date sufficient to match the availability of federal funding to a maximum of six years if the federal funding was confirmed and included in the original approved draft accomplishment plan; and
- (5) money appropriated for other projects is available until the end of the fiscal year in which it is appropriated.

Budget

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan.

Totals

Item	Funding Request	Antic. Leverage	Leverage Source	Total

Amount of Request: \$2,172,000

Amount of Leverage: -

Leverage as a percent of the Request: 0.0%

DSS + Personnel: \$371,600

As a % of the total request: 17.11%

Easement Stewardship: -

As a % of the Easement Acquisition: -

How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount?

We reduced staffing and scaled down the contract and supply lines. This is possible because the proposal is made of many small projects that we can select from.

Personnel

Has funding for these positions been requested in the past?

No

Contracts

What is included in the contracts line?

Contract include funds to hire small businesses that have equipment the DNR doesn't have or where it's more efficient to hire local businesses instead of using DNR staff.

Travel

Does the amount in the travel line include equipment/vehicle rental?

Yes

Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging

There is the potential for some equipment rental, but it's a low probability. Most equipment will belong to the contractor who is doing the work.

I understand and agree that lodging, meals, and mileage must comply with the current MMB Commissioner Plan:

Yes

Direct Support Services

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?

We used the standard DNR Direct and Necessary calculator.

Other Equipment/Tools

Give examples of the types of Equipment and Tools that will be purchased?

Hand saws, chainsaws, etc.

Federal Funds

Do you anticipate federal funds as a match for this program?

Yes

Are the funds confirmed?

No

What is the approximate date you anticipate receiving confirmation of the federal funds?

We will match these funds with P-R dollars per standard DNR process.

Target Lake/Stream/River Feet or Miles

Outcomes

Programs in forest-prairie transition region:

- Protected, restored, and enhanced aspen parklands and riparian areas ~ *A number of species are tied to brushland and young aspen forests in these region, including moose, elk, golden-winged warblers, and sharp-tailed grouse. Ongoing surveys and research on these species will allow the DNR to track local and regional responses to these and related efforts.*

Programs in metropolitan urbanizing region:

- A forest land base that contributes to the habitat picture ~ *These efforts will help manage forests in this region to benefit a range of wildlife species, both game and non-game. Ongoing surveys, especially among songbirds, will track long-term changes in bird populations in this region.*

Programs in the northern forest region:

- Healthy populations of endangered, threatened, and special concern species as well as more common species ~ *The DNR and partner agencies conduct a number of wildlife surveys, including moose, deer, ruffed grouse, sharp-tailed grouse, woodcock, and songbird surveys.*

Programs in southeast forest region:

- Healthier populations of endangered, threatened, and special concern species as well as more common species ~ *The non-game program is very active in this region with projects assessing timber rattlesnake and other wildlife populations. And there are the same ongoing wildlife surveys as in the other regions of the state.*

Parcels

For restoration and enhancement programs ONLY: Managers may add, delete, and substitute projects on this parcel list based upon need, readiness, cost, opportunity, and/or urgency so long as the substitute parcel/project forwards the constitutional objectives of this program in the Project Scope table of this accomplishment plan. The final accomplishment plan report will include the final parcel list.

Parcel Information

Sign-up Criteria?

No

Explain the process used to identify, prioritize, and select the parcels on your list:

Projects are submitted by field staff, then ranked by regional staff.
