

Lessard-Sams Outdoor Heritage Council

ML 2022 Request for Funding

General Information

Date: 06/02/2021

Proposal Title: Conservation Partners Legacy Grant Program Ph. 14: Statewide and Metro Habitat

Funds Requested: \$9,450,000

Manager Information

Manager's Name: Kathy Varble

Title: CPL Grant Coordinator

Organization: Minnesota Department of Natural Resources

Address: 500 Lafayette Rd.

City: St. Paul, MN 55155

Email: kathy.varble@state.mn.us

Office Number: 6512595216

Mobile Number:

Fax Number:

Website: www.dnr.state.mn.us/grants/habitat/cpl/index.html

Location Information

County Location(s):

Eco regions in which work will take place:

- Forest / Prairie Transition
- Northern Forest
- Southeast Forest
- Metro / Urban
- Prairie

Activity types:

- Enhance
- Protect in Fee
- Restore
- Protect in Easement

Priority resources addressed by activity:

- Forest

- Prairie
- Wetlands
- Habitat

Narrative

Abstract

Conservation Partners Legacy Grant Program is managed by the Department of Natural Resources to Provide competitive matching grants of up to \$500,000 to local, regional, state, and national non-profit organizations and government entities. In its first 11 years of funding the CPL program has provided over 800 grants, totaling over \$80 million to over 200 different grantee organizations, enhancing, restoring, or protecting over 350,000 acres of habitat. Demand continues as successful organizations return for additional grants and new organizations apply each year.

Design and Scope of Work

The CPL Program fulfills MS 97a.056 Subd. 3a, directing LSOHC to establish a conservation partner's grant program encouraging/supporting local conservation efforts. \$9,000,000 of the requested \$9,450,000 will be available for grants. Of this amount, at least \$2,500,000 will be used for projects in the 7-county metro area and in cities with a population of 50,000 people or greater. If funds remain from this \$2,500,000 after two grant rounds, they may be used for projects statewide. Statewide funds may be used in the metro area.

Grant activities include enhancement, restoration, and protection of forests, wetlands, prairies, and habitat for fish, game, or wildlife in Minnesota. A 10% match from non-state sources is required for all grants and may be in-kind or cash. Applicants must describe the project goals, methods, location, activity, habitat, urgency, and overall benefit. Staff works with applicants to submit applications, oversee grant selection, prepare/execute grant documents, review expenditures, approves payments/reports, monitor work, and assist recipients with close-out. Staff complies with Office of Grants Management policies. Grantees are required to submit annual and final accomplishment reports.

The CPL program has 3 annual grant cycles- Traditional, Metro, and Expedited Conservation Projects (ECP). The Traditional and Metro cycles will have one grant round beginning August 2022 and a second round if funds remain. Projects under \$25,000 will have a simplified application. The ECP grant cycle will be open continuously for eligible projects under \$50,000 beginning August 2022, and applications will be awarded up to 5 times through May 2023, depending on available funds. DNR may choose to make additional awards, consistent with DNR and OHF policy and guidance, if additional funding becomes available.

CPL staff provides an administrative review of applications. Technical Review Committees, comprised of habitat experts across the state, review and score Traditional and Metro applications based on evaluation criteria (attached). The DNR Directors of Fish and Wildlife, Ecological and Water Resources, and Forestry review the committees' recommendations and provide a ranking to the Commissioner. Final decisions are made by the Commissioner. ECP grants are reviewed by CPL staff and DNR habitat experts using established criteria. The Director of Fish and Wildlife makes final decisions for ECP. CPL staff conducts site visits for most projects over \$50,000 and smaller projects if needed. For projects over \$250,000, staff may conduct site visits annually for the duration of the grant to ensure that project objectives are being met. Administration costs of \$450,000 include salary/fringe, direct support services, travel, outreach, ongoing application system/database maintenance, and other professional services. 2.25 FTEs are needed to manage and promote the program, monitor grants, assist with applications and technical review meetings, and meet state requirements.

How does the proposal address habitats that have significant value for wildlife species of greatest conservation need, and/or threatened or endangered species, and list targeted species?

All CPL projects include a Natural Heritage Database Review, which addresses wildlife species of greatest conservation need, the MN County Biological Survey data, and/or rare, threatened and endangered species inventories. These results are incorporated into the requests, along with mitigation measures if needed. Habitat value/species benefits is also one of the evaluation criterion used to score applications. When the projects are reviewed by the technical habitat experts, wildlife species of greatest conservation need, targeted species, and threatened/endangered species are all discussed, and add to the overall habitat quality and urgency of applications which is reflected in the scoring and funding recommendations.

What is the degree of timing/opportunistic urgency and why it is necessary to spend public money for this work as soon as possible?

The CPL program will prioritize habitat projects of which applicants have demonstrated a conservation urgency. This may include protecting lands of high conservation value that are at immediate risk of development, preventing the spread of invasive species on public lands or waters, etc. Urgency is one of the six evaluation criterion used in the review process. CPL involvement continues to grow every year and supporting this appropriation will keep the momentum going with the local conservation culture.

Describe how the proposal uses science-based targeting that leverages or expands corridors and complexes, reduces fragmentation or protects areas identified in the MN County Biological Survey:

The CPL program has a Technical Review Committee that reviews and scores projects based on evaluation criteria. One of the evaluation criterion addresses the overall project value, and includes the habitat quality and quantity of the site, whether or not it is part of a habitat corridor, and the use of currently accepted practices based on sound conservation science. A second evaluation criterion addresses the habitat benefits of the proposal, such as protecting areas identified in the MN County Biological Survey. A third evaluation criterion addresses public use and access, and the project's proximity to other protected lands. The technical experts ensure that CPL proposals recommended for funding are using current conservation science and best management practices.

Which two sections of the Minnesota Statewide Conservation and Preservation Plan are most applicable to this project?

- H1 Protect priority land habitats
- H5 Restore land, wetlands and wetland-associated watersheds

Which two other plans are addressed in this proposal?

- Minnesota DNR Strategic Conservation Agenda

Describe how your program will advance the indicators identified in the plans selected:

In general, the CPL program's advancement of these plans' indicators will depend upon the applications received and funded. However, because an effort is made to fund projects in each ecological planning section of the state, any or all key indicators could potentially advance through the CPL program. Most of the above plans are addressed through the CPL program, with nearly 100 projects funded throughout the state of Minnesota every year.

Which LSOHC section priorities are addressed in this proposal?

Forest / Prairie Transition

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife

Metro / Urban

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna with an emphasis on areas with high biological diversity

Northern Forest

- Protect shoreland and restore or enhance critical habitat on wild rice lakes, shallow lakes, cold water lakes, streams and rivers, and spawning areas

Prairie

- Restore or enhance habitat on public lands

Southeast Forest

- Protect, enhance, and restore habitat for fish, game, and nongame wildlife in rivers, cold-water streams, and associated upland habitat

Describe how your program will produce and demonstrate a significant and permanent conservation legacy and/or outcomes for fish, game, and wildlife as indicated in the LSOHC priorities:

The CPL program encourages a culture of conservation and habitat protection at a local level. By providing grants to local organizations throughout the entire state and encouraging partnerships, habitat is improved and protected for nearly all of Minnesota's fish, game, and wildlife. Over time involvement in the CPL program has grown exponentially, helping to increase conservation awareness in local communities, which demonstrates, promotes, and produces a significant and permanent conservation legacy for the state of Minnesota.

What other fund may contribute to this proposal?

- N/A

Does this proposal include leveraged funding?

Yes

Explain the leverage:

Leverage will be provided through local match of a minimum of 10% of each grant awarded. CPL grantees contribute cash, in-kind contributions, and donations as leverage to grants.

Per MS 97A.056, Subd. 24, Please explain whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose.

This request is for the continuation of a program that did not exist prior to the legacy fund and would not continue to exist without an OHF appropriation.

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended?

Applicants are asked to describe or submit their long-term management plans when submitting a project proposal, and the Technical Review Committee considers these plans when scoring proposals and making funding recommendations. The sustainability of the project is also addressed through one of the evaluation criterion. Long

term maintenance commitment from the applicant is crucial to a successful proposal. The CPL program has a monitoring process to ensure that funds are being used to complete work as described in the grantee's work plans. The CPL program manager and natural resource specialist conducts site visits for projects that are over \$50,000 and smaller projects as needed. When conducting site visits, CPL staff meets with the project manager and land manager to discuss and evaluate the work, and to address any issues that may have come up during the grant period, as well as discuss long-term management goals.

Identify indicator species and associated quantities this habitat will typically support:

Species and associated quantities will depend upon the applications received and funded. However, because an effort is made to fund projects across the entire state and in all habitat types, theoretically any or all relevant indicator species could potentially benefit from the CPL program, including but not limited to prairie chickens, pheasants, monarch butterfly, rusty patched bumble bee, golden-winged warblers, white-tailed deer, mallards, trumpeter swans, brook trout, and topeka shiner.

How will the program directly involve, engage, and benefit BIPOC (Black, Indigenous, People of Color) and diverse communities:

The Conservation Partners Legacy Grant Program has the following specific ties to BIPOC and diverse communities:

- Tribes have been grantees or partners for CPL projects
- Many metro grantees and partners have CPL projects that restore or enhance public land in diverse communities
- Staff members will be providing outreach to BIPOC and diverse communities- informing them of the project and funding opportunities with CPL

The Minnesota DNR has adopted advancing diversity, equity and inclusion (DEI) as a key priority in its 2020-22 strategic plan. The plan focuses on increasing the cultural competence of our staff, creating a workforce that is reflective of Minnesota, continuing to strengthen tribal consultation and building partnerships with diverse communities.

DNR's OHF projects aim to serve all Minnesotans. At the same time, we are bringing more focus in all our work to BIPOC and diverse communities. OHF achieves high quality habitat that provides ecosystem services like clean water and carbon sequestration that support environmental justice. OHF also supports public access and recreational opportunities on these lands. Project scoring and implementation benefit BIPOC and diverse communities through recreational opportunities that are close-to-home, culturally responsive and accessible to Minnesotans with disabilities.

The DNR has diversity, equity and inclusion strategies that benefit all OHF projects:

- Multilingual and culturally specific hunting and fishing education programs take place on public lands.
- All hiring is equal opportunity, affirmative action, and veteran-friendly. Contracting seeks out Targeted Group, Economically Disadvantaged and Veteran-Owned businesses.
- Public engagement seeks out BIPOC voices and involves diverse communities. Outreach and marketing of projects has this focus as well.
- Partnerships are at the center of all projects. Tribes in particular are consulted in all pertinent areas of the DNR's work, under EO 19-24.

Activity Details

Requirements

If funded, this proposal will meet all applicable criteria set forth in MS 97A.056?

Yes

Will county board or other local government approval be formally sought prior to acquisition, per 97A.056 subd 13(j)?**

No

Describe any measures to inform local governments of land acquisition under their jurisdiction:

County board approval will be formally sought for Wildlife Management Areas and Scientific and Natural Areas. For all other land acquisitions, partners will formally notify the county board.

Is the land you plan to acquire (fee title) free of any other permanent protection?

Yes

Is the land you plan to acquire (easement) free of any other permanent protection?

Yes

Will restoration and enhancement work follow best management practices including MS 84.973 Pollinator Habitat Program?

Yes

Is the restoration and enhancement activity on permanently protected land per 97A.056, Subd 13(f), tribal lands, and/or public waters per MS 103G.005, Subd. 15?

Yes

Where does the activity take place?

- State Forests
- State Wilderness Areas
- Refuge Lands
- Permanently Protected Conservation Easements
- SNA
- WMA
- WPA
- AMA
- County/Municipal
- Public Waters
- State Recreation Areas

Land Use

Will there be planting of any crop on OHF land purchased or restored in this program?

No

Is this land currently open for hunting and fishing?

Yes

Describe any variation from the State of Minnesota regulations:

The land may be open for hunting and fishing, depending on individual project applications. For acquisitions, the land will be open to hunting and fishing unless otherwise provided by law

Will the land be open for hunting and fishing after completion?

Yes

Describe any variation from the State of Minnesota regulations:

All lands acquired with CPL funds will be open for hunting and fishing unless otherwise required by law.

Will the eased land be open for public use?

Yes

Describe the expected public use:

Public use will depend on the conditions of the easement. Most but not all CPL projects are on public lands/waters open for public use.

Are there currently trails or roads on any of the proposed acquisitions?

No

Will new trails or roads be developed or improved as a result of the OHF acquisition?

No

Will the land that you acquire (fee or easement) be restored or enhanced within this proposal's funding and availability?

Yes

Other OHF Appropriation Awards**Have you received OHF dollars in the past through LSOHC?**

Yes

Approp Year	Approp Amount Received	Amount Spent to Date	Leverage Reported in AP	Leverage Realized to Date	Acres Affected in AP	Acres Affected to Date	Complete/Final Report Approved?

As a % of the total request: 4.05%

Easement Stewardship: -

As a % of the Easement Acquisition: -

Describe and explain leverage source and confirmation of funds:

Leverage will be provided through local match of a minimum of 10% of each grant awarded. CPL grantees contribute cash, in-kind contributions, and donations as leverage to grants.

Does this proposal have the ability to be scalable?

Yes

If the project received 70% of the requested funding

Describe how the scaling would affect acres/activities and if not proportionately reduced, why?

If the program receives less funding, less projects will be awarded and funded. Acres will be somewhat proportionally reduced, but this is unknown until applications are submitted.

Describe how personnel and DSS expenses would be adjusted and if not proportionately reduced, why?

No, personnel and DSS expenses will not be proportionally reduced. In order to operate the CPL program, two staff are needed to work with applicants and grantees.

If the project received 50% of the requested funding

Describe how the scaling would affect acres/activities and if not proportionately reduced, why?

If the program receives less funding, less projects will be awarded and funded. Acres will be somewhat proportionally reduced, but this is unknown until applications are submitted.

Describe how personnel and DSS expenses would be adjusted and if not proportionately reduced, why?

No, personnel and DSS expenses will not be proportionally reduced. In order to operate the CPL program, 2.25 staff are needed to work with applicants and grantees.

Personnel

Has funding for these positions been requested in the past?

Yes

Please explain the overlap of past and future staffing and position levels previously received and how that is coordinated over multiple years?

Each year the appropriation funds one year of personnel time for CPL. Two years of personnel funding has been requested in case CPL does not get funded for a year, there will still be personnel funding available to work with grantees to complete projects.

Contracts

What is included in the contracts line?

All partner grants.

Travel

Does the amount in the travel line include equipment/vehicle rental?

No

Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging

I understand and agree that lodging, meals, and mileage must comply with the current MMB Commissioner Plan:

Yes

Direct Support Services

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?

DNR Direct and Necessary Calculator

Federal Funds

Do you anticipate federal funds as a match for this program?

No

Conservation Partners Legacy Grant Program

Evaluation Criteria Table

Applications are scored based on the 6 criteria listed below, using only the information provided within the application. Applicants should be sure their applications contain enough information for reviewers to consider all 6 criteria. Information may be provided on the Project Summary page of the application, or specifically requested on the Project Information page.

1	Overall Project Value	
	Critical habitat corridor; habitat quality/quantity	Amount, quality, and/or connectivity of habitat restored, protected and/or enhanced
	Consistent with current conservation science	Project use of currently accepted science and methods, increased efficiency and life expectancy of work completed
	Sustainability	Overall life expectancy of project
	Use of native plants	Use of local ecotype, native vegetation in form of seed, seedlings, root stock, etc.
2	Applicant Performance	
	Encouragement of local conservation culture	Applicant's past activities with local community in regards to conservation
	Collaboration and local support	Applicant's current interaction with other groups or agencies; current application support by multiple entities
	Capacity to successfully complete work	Applicant's history of receiving and successfully completing conservation work and grants
3	Project Benefits	
	Multiple benefits	Multiple or diverse species benefits; project directly improves intended species, indirect benefit to others
	Habitat benefits	Multiple or diverse habitat benefits; project directly improves intended habitat, indirect benefit to others
4	Public Benefits	
	Adjacent to protected lands	Project site(s) proximity to current protected land (public or private)
	Public access	Project site(s) availability for hunting, fishing, and other wildlife-based recreation
5	Financial Assessment	
	Full funding of project	All costs are identified and accounted for; all partners have submitted letters committing funds
	Supplements existing funding	Project would not be completed without CPL funding; CPL does not replace traditional sources of funding
	Budget and cost effectiveness	Project is succinct- no unnecessary costs or work has been added; costs are relative to location of project
6	Urgency	
	Urgency	Funding importance at this time: species or opportunity potentially lost
