

## Lessard-Sams Outdoor Heritage Council

RIM Wetlands - Restoring the most productive habitat in Minnesota  
Laws of Minnesota 2025 Accomplishment Plan

---

### General Information

**Date:** 06/17/2025

**Project Title:** RIM Wetlands - Restoring the most productive habitat in Minnesota

**Funds Recommended:** \$4,291,000

**Legislative Citation:** ML 2025, Ch. 36, Art. 1, Sec. 2, subd. 4(c)

**Appropriation Language:** \$4,291,000 the first year is to the Board of Water and Soil Resources to acquire permanent conservation easements and to restore wetlands and native grassland habitat under Minnesota Statutes, section 103F.515. Of this amount, up to \$70,000 is for establishing a monitoring and enforcement fund as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. Subdivision 8, paragraph (b), does not apply to this project. A list of permanent conservation easements must be provided as part of the final report.

### Manager Information

**Manager's Name:** John Voz

**Title:** RIM Easement Program Coordinator

**Organization:** MNBWSR

**Address:** 1732 North Tower Road

**City:** Detroit Lakes, MN 56501

**Email:** john.voz@state.mn.us

**Office Number:** 218-846-8426

**Mobile Number:** 218-849-1603

**Fax Number:**

**Website:** www.bwsr.state.mn.us

### Location Information

**County Location(s):**

**Eco regions in which work will take place:**

Forest / Prairie Transition

Prairie

Metro / Urban

**Activity types:**

Protect in Easement

Restore

**Priority resources addressed by activity:**

Wetlands

Prairie

**Narrative****Abstract**

RIM Wetlands - Restoring the most productive habitat in Minnesota will protect and restore approximately 525 acres of previously drained wetlands and adjacent native grasslands on approximately 7 easements across the State to restore wetlands and associated uplands for habitat and associated benefits. The Board of Water and Soil Resources (BWSR) will utilize the Reinvest in Minnesota (RIM) easement program in partnership with local Soil and Water Conservation District (SWCDs) to target, protect and restore high priority habitat. The program will utilize a ranking and selection process and be implemented locally by SWCD staff.

**Design and Scope of Work**

Wetlands are among the world's most productive environments with high biodiversity (a large variety of life forms). Only rain forests and coral reefs have more biodiversity. Wetlands are a home to many species of migratory and resident birds, reptiles and amphibians, fish, insects, and plants. They also benefit society by storing floodwaters, filtering pollutants, serving as a carbon sink, and providing recreation sites for boating and fishing. Minnesota has lost an estimated 42% of its original 16 million acres of wetlands to drainage or fill activities. The loss of wetlands is most severe in the prairie regions of the state (approximately 90% loss).

Nearly 75 percent of all wetlands are privately owned, making it imperative that the public participate in wetland management and protection.

Up to one-half of North American bird species nest or feed in wetlands and provide a home to at least one third of all threatened and endangered species. "Prairie potholes are highly productive ecosystems of unparalleled importance to breeding waterfowl and many other species of wetland wildlife. Moreover, they are important nutrient sinks, store runoff that reduces flooding, sequester carbon, and provide other environmental and socioeconomic values" The past, present, and future of prairie potholes in the United States. May 2008 Journal of Soil and Water Conservation 63(3).

The typical sites this program prioritizes and targets are privately drained and farmed wetlands and associated uplands that offer little habitat or ecological benefits in their current state. Through a combination of eligibility screening and a scoring and ranking process, the program evaluates and selects applications that provide the greatest habitat and environmental benefit after restoration and protection via a BWSR RIM easement.

RIM Wetlands is a local-state partnership delivered by SWCDs and BWSR. BWSR staff provide program oversight and manage the easement acquisition process and restoration design. Local staff promote RIM easements, assist with easement processing and provide technical assistance and project management services.

## **Explain how the plan addresses habitat protection, restoration, and/or enhancement for fish, game & wildlife, including threatened or endangered species conservation**

Tomorrow's Habitat for the Rare and Wild (MN DNR) states "A statewide look at the species-habitat relationships show that prairies, rivers, and wetlands are the three habitats used by the most Species of Greatest Conservation Need." This proposal targets wetlands and prairies, two of the three most important habitats used by the Species of Greatest Conservation Need (SGCN). An expansion of wetland and prairie habitat through this program will alleviate pressure on those species that are most sensitive to habitat changes occurring on the landscape.

SGCN in the proposal areas include the Five-lined Skink, Two-spotted Skipper, Northern Pintail, American Black Duck, Grasshopper Sparrow, Upland Sandpiper, Sedge Wren, Dickcissel, and Western Grebe. In addition to the SGCN, the threatened or endangered species targeted in this proposal include the Blanding's Turtle, Dakota Skipper, Poweshiek Skipperling, and Rusty Patched Bumble Bee.

Prairie wetlands are particularly important for migratory waterfowl. Although the North American prairie pothole region contains only about 10% of the waterfowl nesting habitat on the continent, it produces 70% of all North American waterfowl. The extensive loss of Minnesota's prairie and wetland habitat has led to the decline of many wildlife and plant species. The RIM Wetlands program continues to restore this habitat and protect it through perpetual easements.

Diverse vegetation, access to water, and protection from pesticides are important to Minnesota's native pollinator species. BWSR's native vegetation guidelines and pollinator initiative demonstrate a commitment to protecting native pollinators. Complexes and corridors targeted through RIM Wetlands provide natural passageways and habitat for pollinators. Targeted pollinator species include the Monarch Butterfly and several solitary bee species.

## **What are the elements of this plan that are critical from a timing perspective?**

In 2023 throughout Minnesota an additional 65,999 acres of the USDA Conservation Reserve Program (CRP) expired in Minnesota. RIM Wetlands program scoring and ranking criteria will include expiring CRP land and prioritization of restoration and protection of wetlands in comprehensive water plans, including One Watershed One Plans. "We must, collectively, bend the curve of bird population declines by working together across the western hemisphere." - National Audubon Society. More than half of U.S Birds are in decline - 2022 U.S State of the Birds report.

## **Describe how the plan expands habitat corridors or complexes and/or addresses habitat fragmentation:**

Science-based considerations historically used by the RIM Wetlands program will continue to be used. Through a combination of targeted outreach, eligibility screening, and a scoring and ranking process, the RIM Wetlands program evaluates each application on its potential to restore wetland/upland functions and values to optimize wildlife habitat and provide other benefits, including water quality. Each site is evaluated on its benefits to the surrounding landscape, ability to build upon existing corridors and complexes, and site-specific features that highlight the benefits of selection for permanent protection and habitat and associated environmental benefits.

During the application process, a review of adjacent permanent habitat and easement size is conducted to determine a site's importance as a corridor or as an extension to existing habitat complexes. Other examples of the science-based targeting used include proximity to threatened and endangered species, contributing watershed

area, proximity to DNR Protected Waters, and the USFWS Habitat and Population Evaluation Team's (HAPET) Wildlife Habitat Potential Model. The HAPET model is a consolidation of models representing an array of migratory birds that use the Minnesota Prairie Pothole Region for breeding or migration.

### **Which top 2 Conservation Plans referenced in MS97A.056, subd. 3a are most applicable to this project?**

Long Range Duck Recovery Plan

Outdoor Heritage Fund: A 25 Year Framework

### **Explain how this plan will uniquely address habitat resilience to climate change and its anticipated effects on game, fish & wildlife species utilizing the protected or restored/enhanced habitat this proposal targets.**

This proposal directly relates to four priority actions in the MN Climate Action Framework: 1) accelerate forest, grassland and wetland restoration, 2) Store more carbon, 3) restore and expand habitat complexes and corridors, and 4). increase water storage and infiltration and manage drainage. Restoring and protecting habitat with RIM easements. Other examples of the science-based targeting used include proximity to threatened and endangered species, contributing watershed area, proximity to DNR Protected Waters, and the USFWS Habitat and Population Evaluation Team's (HAPET) Wildlife Habitat Potential Model. The HAPET model is a consolidation of models representing an array of migratory birds that use the Minnesota Prairie Pothole Region for breeding or migration.

### **Which LSOHC section priorities are addressed in this program?**

#### **Forest / Prairie Transition**

Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife

#### **Metro / Urban**

Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna with an emphasis on areas with high biological diversity

#### **Prairie**

Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes

### **Outcomes**

#### **Programs in forest-prairie transition region:**

Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands ~ *A summary of wetland acres and associated native grasslands acquired through this appropriation will be reported. On-site inspections are performed every three years and compliance checks are performed in the other two years to ensure outcomes are maintained. An increase of wetland and associated grassland habitat are expected to increase the carrying capacity of wetland and grassland dependent wildlife. This has a positive impact on both game and non-game species. We expect more abundant populations of endangered, threatened, special concern and game species as complexes are restored.*

### Programs in metropolitan urbanizing region:

Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna ~ *A summary of wetland acres and associated native grasslands acquired through this appropriation will be reported. On-site inspections are performed every three years and compliance checks are performed in the other two years to ensure outcomes are maintained. An increase of wetland and associated grassland habitat are expected to increase the carrying capacity of wetland and grassland dependent wildlife. This has a positive impact on both game and non-game species. We expect more abundant populations of endangered, threatened, special concern and game species as complexes are restored.*

### Programs in prairie region:

Protected, restored, and enhanced shallow lakes and wetlands ~ *A summary of wetland acres and associated native grasslands acquired through this appropriation will be reported. On-site inspections are performed every three years and compliance checks are performed in the other two years to ensure outcomes are maintained. An increase of wetland and associated grassland habitat are expected to increase the carrying capacity of wetland and grassland dependent wildlife. This has a positive impact on both game and non-game species. We expect more abundant populations of endangered, threatened, special concern and game species as complexes are restored.*

### Per MS 97A.056, Subd. 24, Please explain whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose.

This funding request is not supplanting existing funding or a substitution for any previous funding.

### How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended?

BWSR is responsible for monitoring and enforcement of RIM easements. BWSR partners with local SWCDs to carry out oversight, monitoring and inspection of conservation easements. Easements are inspected every year for the first five years beginning the year after the easement is recorded. Thereafter, on-site inspections are performed every three years and compliance checks are performed in the other two years. SWCDs document findings and report to BWSR on each site inspection conducted. A non-compliance procedure is implemented when potential violations are identified.

Perpetual monitoring and enforcement costs have been calculated at \$10,000 per easement. This value is based on using local SWCD staff for monitoring and existing enforcement authorities. The amount listed for Easement Stewardship includes costs of SWCD regular monitoring, BWSR oversight and any enforcement necessary.

### Actions to Maintain Project Outcomes

| Year         | Source of Funds          | Step 1   | Step 2                               | Step 3   |
|--------------|--------------------------|--|--------------------------------------|--|
| 2021-Ongoing | Landowner Responsibility | Maintain compliance with easement terms                          | -                                    | -  |
| 2021-Ongoing | Stewardship Account      | Inspection every year for the first 5 years; then every 3rd year | Corrective actions on any violations | Enforcement action taken by MN Attorney General office |

**Provide an assessment of how your program celebrates cultural diversity or reaches diverse communities in Minnesota, including reaching low- and moderate-income households:**

For our statewide programs, BWSR will pilot designating a percentage of the easement acquisition budget line for applicants who self-certify as emerging farmers or from underserved populations, including Black, Indigenous, or People of Color (BIPOC). If funds remain at the end of a predetermined number of scoring/ranking periods and there are no additional applicants, the remaining funds would be added to the larger easement acquisition pool of funding.

### Activity Details

#### **Requirements**

**If funded, this program will meet all applicable criteria set forth in MS 97A.056?**

Yes

**Is the land you plan to acquire (easement) free of any other permanent protection?**

Yes

**Who will manage the easement?**

The easements secured under this project will be managed as part of BWSR's RIM Reserve Program that has over 7,500 easements currently in place. Easements are monitored annually for each of the first five years and then every third year after that. BWSR, in cooperation with SWCDs, implement a stewardship process to track, monitor quality and assure compliance with easement terms. Under the terms of the Reinvest In Minnesota (RIM) Easement Program, landowners are required to maintain compliance with the easement. A conservation plan is developed with the landowner and maintained as part of each easement. Basic easement compliance costs are borne by the landowner, periodic enhancements may be cost shared from a variety of sources.

**Who will be the easement holder?**

The state of Minnesota through the Minnesota Board of Water and Soil Resources (BWSR)

**What is the anticipated number of easements (range is fine) you plan to accomplish with this appropriation?**

The Minnesota Board of Water and Soil Resources (BWSR) will protect and restore approximately 525 acres of previously drained wetlands and adjacent native grasslands on approximately 7 easements across the State to restore wetlands and associated uplands for habitat and associated benefits.

**Will restoration and enhancement work follow best management practices including MS 84.973 Pollinator Habitat Program?**

Yes

**Is the restoration and enhancement activity on permanently protected land per 97A.056, Subd 13(f), tribal lands, and/or public waters per MS 103G.005, Subd. 15 or on lands to be acquired in this program?**

Yes

**Where does the activity take place?**

Other : RIM Perpetual Easements

## Land Use

**Will there be planting of any crop on OHF land purchased or restored in this program, either by the proposer or the end owner of the property, outside of the initial restoration of the land?**

Yes

**Explain what will be planted and include the maximum percentage of any acquired parcel that would be planted into foodplots by the proposer or the end owner of the property:**

In certain circumstances, wildlife food plots are an allowable use on RIM easements as part of an approved Conservation Plan. Food plots on narrow buffers, steep slopes and wet areas are not allowed. RIM policy limits food plots to 10% of the total easement area or 5 acres, whichever is smaller. There is no cost share for establishment of food plots and upon termination the landowners must re-establish vegetation as prescribed in the Conservation Plan at their expense. Food plots are infrequently used by landowners, to date less than 3% of RIM easements have food plots.

**Will insecticides or fungicides (including neonicotinoid and fungicide treated seed) be used within any activities of this program either in the process of restoration or use as food plots?**

No

**Will the eased land be open for public use?**

No

**Are there currently trails or roads on any of the proposed acquisitions?**

Yes

**Describe the types of trails or roads and the allowable uses:**

Existing trails and roads are identified during the easement acquisition process and are often excluded from the easement area if they serve no purpose to easement maintenance, monitoring or enforcement. Some roads and trails, such as agricultural field accesses, are allowed to remain.

**Will the trails or roads remain and uses continue to be allowed after OHF acquisition?**

Yes

**How will maintenance and monitoring be accomplished?**

Under the terms of the RIM Easement, landowners are required to maintain compliance with the easement. Easements are monitored annually by SWCDs in cooperation with BWSR for the first five years and then every third year after easement acquisition to assure compliance with easement terms.

A conservation plan is developed with the landowner and maintained as part of each easement. Basic easement compliance costs are borne by the landowner, periodic enhancements may be cost shared from a variety of sources.

**Will new trails or roads be developed or improved as a result of the OHF acquisition?**

Yes

**Describe the types of trails or roads and the allowable uses:**

Though uncommon, new trails could be developed if they contribute to easement maintenance or benefit the easement site (e.g. fire breaks, berm maintenance). Unauthorized trails are in violation of the easement.

**How will maintenance and monitoring be accomplished?**

The easements secured under this project will be managed as part of BWSR's RIM Reserve Program that has over 7,500 easements currently in place. Easements are monitored annually for each of the first five years and then every third year after that. BWSR, in cooperation with SWCDs, implement a stewardship process to track, monitor quality and assure compliance with easement terms.

Under the terms of the Reinvest In Minnesota (RIM) Easement Program, landowners are required to maintain compliance with the easement. A conservation plan is developed with the landowner and maintained as part of each easement. Basic easement compliance costs are borne by the landowner, periodic enhancements may be cost shared from a variety of sources.

**Will the acquired parcels be restored or enhanced within this appropriation?**

Yes

Through a combination of targeted outreach, eligibility screening, and a scoring and ranking process, the RIM Wetlands program evaluates each application on its potential to restore wetland/upland functions and values to optimize wildlife habitat and provide other benefits, including water quality. Each site is evaluated on its benefits to the surrounding landscape, ability to build upon existing corridors and complexes, and site-specific features that highlight the benefits of selection for permanent protection and habitat and associated environmental benefits.

**Will the land that you acquire (fee or easement) be restored or enhanced within this program's funding and availability?**

Yes

**Timeline**

| Activity Name                                | Estimated Completion Date |
|--|---------------------------|
| Restorations complete                        | June 30, 2032             |
| Easements recorded                           | June 30, 2029             |
| Obtain applications from eligible landowners | June 30, 2026             |

**Date of Final Report Submission:** 06/30/2032

**Availability of Appropriation:** Subd. 7. Availability of Appropriation

(a) Money appropriated in this section may not be spent on activities unless they are directly related to and necessary for a specific appropriation and are specified in the accomplishment plan approved by the Lessard-Sams Outdoor Heritage Council. Money appropriated in this section must not be spent on indirect costs or other institutional overhead charges that are not directly related to and necessary for a specific appropriation. Money appropriated for fee title acquisition of land may be used to restore, enhance, and provide for public use of the land acquired with the appropriation. Public-use facilities must have a minimal impact on habitat in acquired lands.

(b) Money appropriated in this section is available as follows:

- (1) money appropriated for acquiring real property is available until June 30, 2029;
- (2) money appropriated for restoring and enhancing land acquired with an appropriation in this section is available for four years after the acquisition date with a maximum end date of June 30, 2033;
- (3) money appropriated for restoring or enhancing other land is available until June 30, 2030;
- (4) notwithstanding clauses (1) to (3), money appropriated for a project that receives at least 15 percent of its funding from federal funds is available until a date sufficient to match the availability of federal funding to a maximum of six years if the federal funding was confirmed and included in the original approved draft accomplishment plan; and
- (5) money appropriated for other projects is available until the end of the fiscal year in which it is appropriated.

**Budget**

*Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan.*

**Totals**

| Item                          | Funding Request    | Leverage | Leverage Source | Total              |

|-------------------------------------|------------|------------------|--------------------|----------|--------------------|-----------|
| Easement Mgt.<br>and<br>Engineering | 1.75       | 4.0              | \$231,700          | -        | -                  | \$231,700 |

**Amount of Request:** \$4,291,000

**Amount of Leverage:** -

**Leverage as a percent of the Request:** 0.0%

**DSS + Personnel:** \$304,400

**As a % of the total request:** 7.09%

**Easement Stewardship:** \$70,000

**As a % of the Easement Acquisition:** 1.81%

**How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount?**

A reduction in funding would reduce outputs proportionally. Program management costs are the exception, due to program management & oversight remaining consistent regardless of appropriation amount.

**Does this project have the ability to be scalable?**

Yes

### **If the project received 50% of the requested funding**

**Describe how the scaling would affect acres/activities and if not proportionately reduced, why?**

A 30% reduction in funding would reduce outputs proportionally. Program management costs are the exception, due to program management & oversight remaining consistent regardless of appropriation amount.

**Describe how personnel and DSS expenses would be adjusted and if not proportionately reduced, why?**

Personnel and DSS costs would be scaled accordingly.

### **Personnel**

**Has funding for these positions been requested in the past?**

Yes

### **Contracts**

**What is included in the contracts line?**

The contract line amount will be used for payments to SWCD staff for easement implementation. Estimated restoration costs are included in the easements acquisition line.

### **Easement Stewardship**

**What is the number of easements anticipated, cost per easement for stewardship, and explain how that amount is calculated?**

Perpetual monitoring and enforcement costs have been calculated at \$10,000 per easement and 7 easements are anticipated to be completed. This value is based on using local SWCD staff for monitoring and landowner relations and existing enforcement authorities. The amount listed for Easement Stewardship covers costs of the SWCD regular monitoring, BWSR oversight, and enforcement.

### **Travel**

**Does the amount in the travel line include equipment/vehicle rental?**

No

**Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging**

The travel line only includes traditional travel costs of mileage, food and lodging.

**I understand and agree that lodging, meals, and mileage must comply with the current MMB Commissioner Plan:**

Yes

### **Direct Support Services**

**How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?**

BWSR calculates direct support services costs that are directly related to and necessary for each request based on the type of work being done.

## **Other Equipment/Tools**

### **Give examples of the types of Equipment and Tools that will be purchased?**

None anticipated at this time but we keep a small amount in this budget line for contingencies. Examples may be signs, posts, hand held field equipment, etc.

## **Federal Funds**

### **Do you anticipate federal funds as a match for this program?**

No

Output Tables**Acres by Resource Type (Table 1)**

| Type                                     | Wetland    | Prairie    | Forest   | Habitat  | Total Acres |

**Target Lake/Stream/River Feet or Miles**

## Parcels

### Parcel Information

#### Sign-up Criteria?

[Yes - Sign up criteria is attached](#)

#### **Explain the process used to identify, prioritize, and select the parcels on your list:**

Through a combination of targeted outreach and eligibility screening followed by a scoring and ranking process, the RIM Wetlands program evaluates each application on the potential to restore wetland/upland functions and values; optimizing wildlife habitat benefits and providing other benefits including water quality. Each site is evaluated on its benefits to the surrounding landscape, ability to build upon existing corridors and complexes, and site-specific features that highlight the benefits of permanent protection and habitat.

During the application process, a review of adjacent permanent habitat and easement size is conducted to indicate a site's usefulness as a corridor or extension to an existing habitat complex. Other examples of the science-based targeting used include proximity to threatened and endangered species, contributing watershed area, proximity to DNR Protected Waters, and use of the USFWS Habitat and Population Evaluation Team's (HAPET) Wildlife Habitat Potential Model for environmental evaluation.

BWSR will continue to utilize similar science-based considerations that have been historically used by the RIM Wetlands program. The current scoring and ranking criteria for CREP wetland practices is attached as an example of the score sheet and criteria that will be used.
