

Lessard-Sams Outdoor Heritage Council

Metro Big Rivers Phase 15

Laws of Minnesota 2025 Accomplishment Plan

General Information

Date: 12/23/2024

Project Title: Metro Big Rivers Phase 15

Funds Recommended: \$6,949,000

Legislative Citation: ML 2025, Ch. XXX, Art. 1, Sec. 2, subd. 5(i)

Appropriation Language:

Manager Information

Manager's Name: Deborah Loon

Title: Executive Director

Organization: MN Valley Trust (Metro Big Rivers)

Address: 3815 East American Boulevard

City: Bloomington, MN 55425

Email: DLoon@mnvalleytrust.org

Office Number: 612-801-1935

Mobile Number: 612-801-1935

Fax Number:

Website: www.mnvalleytrust.org

Location Information

County Location(s): Washington, Wright, Anoka, Dakota, Hennepin, Carver, Scott, Sibley, Sherburne and Isanti.

Eco regions in which work will take place:

- Metro / Urban

Activity types:

- Protect in Easement
- Protect in Fee
- Restore
- Enhance

Priority resources addressed by activity:

- Wetlands
- Prairie
- Forest
- Habitat

Narrative**Abstract**

Metro Big Rivers Phase 15 will protect 240 acres in fee title and 121 acres in permanent conservation easement, restore 291 acres and enhance 194 acres of priority habitat in the big rivers corridors in the Metropolitan Urbanizing Area (846 acres total). Partners will leverage OHF grant at least 10% with partner funds, private donations, local government contributions, and landowner donations of easement value. Significant volunteer engagement will be invested in habitat enhancement activities. MBR projects benefit wildlife and species in greatest need of conservation (SGCN) and provide increased public access and nature connections for metro residents.

Design and Scope of Work

Metro Big Rivers Phase 15 will protect, restore and enhance prioritized wildlife habitat in the MUA, with an emphasis on the Mississippi, Minnesota and St. Croix Rivers and tributaries. Metro Big Rivers' work benefits wildlife and species in greatest need of conservation (SGCN), improves water quality and in-stream food availability, increases wildlife-based recreational opportunities, and connects metro residents with nature.

Friends of the Mississippi River (FMR) will enhance 109 acres at 3 sites to increase native plant diversity, improve pollinator and wildlife habitat, bolster water quality, and improve public access to natural spaces. Projects include invasive woody plant removal, seeding and planting native prairie and forest species, mowing, spot-spraying, and prescribed burning. 3 acres of enhancement occur on remnant native prairie.

- Highlands of Riverpointe: Enhance 31 acres prairie
- Cottage Grove Ravine Regional Park: Enhance 10 acres prairie, including 3 acres native prairie, and 58 acres forest
- Riverside Park: Enhance 10 acres forest

Great River Greening (GRG) will restore 71 acres of forest and prairie at 5 sites. Projects include invasive tree removal, tree stand thinning, onsite biochar processing, planting and seeding native grass and wildflowers, planting climate-resilient trees and shrubs, mowing, herbicide application and spot-spraying, and prescribed burning.

- Marsh East: Restore 8 acres oak savanna
- Innsbruck Park: Restore 22 acres forest
- Ritter Farm: Restore 20 acres prairie
- Bailey School Forest: Restore 10 acres oak forest
- Bass Lake Preserve Phase 2: Restore 11 acres woodland

Minnesota Land Trust (MLT) will protect 121 acres through perpetual conservation easement, restore 40 acres and enhance 25 acres of priority habitat on permanently-protected lands, including riparian lands, forests, wetlands and grasslands. Protection projects will be selected through a process that ranks proposals based on ecological significance and cost (criteria attached).

Minnesota Valley Trust (MVT) will protect through fee acquisition 100 acres of river frontage, floodplain forest, wetland and upland habitat to expand the Minnesota Valley National Wildlife Refuge. Prospective lands are prioritized by the USFWS and will be restored/enhanced, then open for wildlife-based recreation.

Trust for Public Land (TPL) will protect through fee acquisition 140 acres of priority habitat and restore/enhance 240 acres of prairie and forest habitat on a recently-acquired WMA complex. Prospective acquisitions are prioritized in state, regional, and local natural resource plans. Lands will be managed by public partners and open for wildlife-based recreation.

Explain how the plan addresses habitat protection, restoration, and/or enhancement for fish, game & wildlife, including threatened or endangered species conservation

Metro Big Rivers projects protect and improve habitats needed by wildlife species in greatest conservation need (SGCN) and other targeted species. Many of Minnesota's forest and grassland SGCNs are migratory. Improving habitat along and near the central flyway (the three big rivers) provides great benefits to all wildlife species, especially during critical migration periods.

Friends of the Mississippi River will conduct habitat enhancement at 3 sites located on or near the Mississippi River, within the Important Bird Area. This corridor provides critical habitat for neotropical migrant birds and numerous SGCN. FMR has been tracking breeding bird species at these sites, recording 11 SGCNs. The sites are also vital for many other species, especially native pollinators, and provide connectivity to other natural areas.

Great River Greening will also conduct significant habitat work on public conservation lands to improve habitat values for wildlife and SGCN, including birds using the Mississippi River migratory corridor and pollinators. Work will restore and enhance forest, woodlands, prairie, riverine, lakeshore, and wetland habitat at 5 conservation sites.

Minnesota Land Trust will target its protection and restoration/enhancement action to build high-quality habitat complexes that support SGCN and T&E species in the Metro area. Permanently-protected privately-owned lands will be prioritized to build the size of and connections between existing protected lands, enhancing the ability of these species to persist over the long term. Restoration and enhancement of habitat is proposed for lands already protected through easement.

Minnesota Valley Trust will acquire lands identified through the USFWS Comprehensive Conservation Plan for the Minnesota Valley National Wildlife Refuge. This plan prioritizes lands for high biodiversity, connectivity, and ability to preserve habitat for SGCN.

Trust for Public Land will acquire lands in fee identified and prioritized in state, regional, and local natural resource plans due to their high biodiversity significance, connectivity to existing public lands, and ability to preserve habitat for SGCN. Acquisitions and subsequent habitat work increase breeding and migratory habitat for waterfowl, shorebirds, neo-tropical migrants, and non-migratory resident species, protect the diversity of native ecosystems, and improve connectivity and resilience.

What are the elements of this plan that are critical from a timing perspective?

The three major rivers, which converge in the Metro Urbanizing Area (MUA), are of significant importance to a myriad of migrating species and SGCN. Four intersecting issues create urgency for Metro Big Rivers Partnerships' work in the MUA -- 1) continued decline of many wildlife species, most notably birds and pollinators, 2) declining

habitat these species need to rebound and thrive, 3) rising land values and development and 4) metro residents' need for nature nearby.

Protecting and enhancing habitat in the MUA is especially critical now, as land values and developments are both rising, placing renewed demand on lands throughout the area. Metro Big Rivers projects defend against rising land values (especially along lakes and rivers), add needed and significant wildlife habitat, improve connectivity and habitat values (especially for wildlife and SGCN) and increase much-needed public access to wildlife-based outdoor opportunities throughout the MUA, including hunting, fishing and wildlife observation.

Describe how the plan expands habitat corridors or complexes and/or addresses habitat fragmentation:

Protection partners prioritize work through science-based processes led by the public entities that own or will own interest in the properties (e.g., MN DNR, USFWS). Plans followed include MBS, RESA, Metropolitan Conservation Corridors, Minnesota State Wildlife Action Plan, and the Comprehensive Conservation Plan for the Minnesota Valley National Wildlife Refuge. Actions are targeted toward building conservation corridors and priority habitat complexes.

In addition, the easement partner's competitive RFP process includes a second analysis of all proposed projects submitted by landowners for protection. This assessment evaluates the ecological significance of the proposed parcel, which includes the following three factors:

- Quantity – the size of habitat and/or length of shoreline associated with a parcel, and abundance of Species in Greatest Conservation Need (SGCN) and Threatened & Endangered (T&E) species
- Quality – the condition of the associated habitat and populations of SGCN and T&E species
- Landscape Context – the extent and condition of natural habitat surrounding the parcel, and the degree to which adjacent property has been protected (building complexes and connections between existing protected lands).

Restoration and enhancement partners use science-based criteria to prioritize activities. This includes consideration of the highest quality natural areas (as determined by MBS), as well as prioritization of work within important ecological corridors identified by a coalition of conservation partners and based on rare species and sensitive landscape features. This prioritization ensures that projects reduce fragmentation and link natural areas within already-established corridors. All of the restoration and enhancement sites are located along or near the three big rivers and important tributaries - some of the most important ecological corridors for migrating and sedentary plant and animal life.

Which top 2 Conservation Plans referenced in MS97A.056, subd. 3a are most applicable to this project?

- Minnesota's Wildlife Action Plan 2015-2025
- Outdoor Heritage Fund: A 25 Year Framework

Explain how this plan will uniquely address habitat resilience to climate change and its anticipated effects on game, fish & wildlife species utilizing the protected or restored/enhanced habitat this proposal targets.

The Metropolitan Urbanizing Area is expected to be impacted by climate change at a disproportional rate over other areas of Minnesota due to impacts stemming from the "heat island effect" and other factors. Metro Big Rivers partners use The Nature Conservancy's climate resiliency data layer (Anderson, et. al. 2023), to inform land protection, restoration and enhancement. We work in climate-resilient areas, prioritize lands that increase

connectivity and build habitat complexes, and select vegetation for plantings taking into account current climate adaptation models. This approach provides the best opportunities to reverse the decline in biodiversity caused by habitat loss and degradation, maintain biodiversity over the long-term and provide high-quality natural areas that support the ability of wildlife to move and adapt to stressors, including those accelerated by a changing climate.

Which LSOHC section priorities are addressed in this program?

Metro / Urban

- Protect habitat corridors, with emphasis on the Minnesota, Mississippi, and St. Croix rivers (bluff to floodplain)

Outcomes

Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need ~ *Partners work together to identify priority lands using existing data and public plans, then coordinate protection, restoration and enhancement activities in those priority areas. Work builds upon prior phases and is intended to continue into the future for maximum impact. Mapping shows progress in connecting corridors. Species collections and counts measure impact of activities over time on wildlife and Species in Greatest Conservation Need.*

Per MS 97A.056, Subd. 24, Please explain whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose.

This request is not supplanting or substituting for any previous funding that was not from a legacy fund and was used for the same purpose.

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended?

All public partners have committed to maintaining the restoration / enhancement habitat improvements.

All MBR restore/enhance partners will raise funds and work with partners to ensure the project benefits are maintained. FMR and GRG will continue hosting volunteer events to maintain habitat investments.

Lands protected through easement by MLT will be sustained following best standards and practices. MLT is a nationally-accredited and insured land trust with a successful stewardship program that includes annual property monitoring, records management, addressing inquiries, tracking ownership changes, investigating potential violations and defending the easement in case of a true violation. MLT provides habitat management plans to landowners and helps them access resources and technical expertise to undertake restoration, enhancement and ongoing management.

Lands acquired in fee title by MVT for the Minnesota Valley National Wildlife Refuge will be sustained and maintained over the long-term by the USFWS. Habitat restoration / enhancement will be completed by MVT prior to transfer to the USFWS.

Lands acquired in fee title by TPL will be conveyed to the DNR or local units of government for permanent stewardship. Initial site development and restoration costs are included in this proposal. TPL will work with the steward to develop habitat plans.

Actions to Maintain Project Outcomes

Year	Source of Funds	Step 1	Step 2	Step 3
Post-Acquisition, Ongoing	MVT, TPL, Public Partners	Post acquired property	Develop & implement habitat restoration and enhancement plans	Transfer property to public partner, steward
Ongoing	MLT Stewardship & Enforcement Fund	Annual monitoring of completed easements	Enforcement actions as necessary	-
Ongoing	FMR, GRG, MLT, TPL, State & Local Partners, Private Landowners	Monitoring and assessment of restoration and enhancement projects	Target actions, engage local partners and landowners	Take restorative action to correct any damage

Provide an assessment of how your program celebrates cultural diversity or reaches diverse communities in Minnesota, including reaching low- and moderate-income households:

MBR partners have a shared objective of providing all metro residents with high-quality natural spaces nearby. We believe everyone should be able to easily connect with nature, enjoy high-quality wildlife habitat and engage in wildlife-dependent recreation, regardless of race, ethnicity, or socio-economic status. Our projects benefit a diversity of communities, from lower-income, densely-populated neighborhoods to urbanizing suburban/rural areas. Examples of how MBR engages and benefits diverse communities include:

Friends of the Mississippi River and Great River Greening actively engage residents in habitat work in their neighborhoods through targeted outreach for volunteer events. Their youth programming targets young people from diverse backgrounds for exploring environmental careers. FMR's Environmental Stewards Institute increases underrepresented youth participating in environmental career pathway programs; at least 65% of participants identify as black, indigenous, or a person of color.

Metro residents can step off the light rail and into the wilderness on the Minnesota Valley National Wildlife Refuge to connect with nature and wildlife at no cost. The Refuge and Minnesota Valley Trust provide free busing for schools with a high percentage of low-income students and have a free lending program (e.g. snowshoes, fishing poles, field backpacks, binoculars). Their internship and apprenticeship program recruits a diversity of youth to explore the outdoors and conservation careers.

Minnesota Land Trust's commitment includes numerous projects to protect camps. Recent protection of Camp Katherine Parsons enables the Phyllis Wheatley Community Center to expand programming for North Minneapolis residents at the camp, while protecting high-quality habitat. MLT's "Ambassador Lands Program" connects community groups with conservation landowners for youth mentor hunts, cultural or ceremonial use, conservation training and nature-based education.

Through its partnership with the MN Chapter of Backcountry Hunters and Anglers, Trust for Public Land facilitates mentored hunting and angling opportunities for diverse communities on public lands and waters across Minnesota, with a focus on ones protected by the OHF. Like mentee participants, the mentors come from historically marginalized communities with diverse ethnic and racial backgrounds. We know that seeing diversity in outdoor spaces helps foster a sense of representation, belonging and inclusion.

Activity Details

Requirements

If funded, this program will meet all applicable criteria set forth in MS 97A.056?

Yes

Will county board or other local government approval be formally sought prior to acquisition, per 97A.056 subd 13(j)?**

No

Describe any measures to inform local governments of land acquisition under their jurisdiction:

Local units of government will be notified of pending fee title acquisitions, as required by law.

Is the land you plan to acquire (fee title) free of any other permanent protection?

Yes

Is the land you plan to acquire (easement) free of any other permanent protection?

Yes

Who will manage the easement?

Minnesota Land Trust

Who will be the easement holder?

Minnesota Land Trust

What is the anticipated number of easements (range is fine) you plan to accomplish with this appropriation?

3 - 6

Will restoration and enhancement work follow best management practices including MS 84.973 Pollinator Habitat Program?

Yes

Is the restoration and enhancement activity on permanently protected land per 97A.056, Subd 13(f), tribal lands, and/or public waters per MS 103G.005, Subd. 15 or on lands to be acquired in this program?

Yes

Where does the activity take place?

- Permanently Protected Conservation Easements
- County/Municipal
- WMA

Land Use

Will there be planting of any crop on OHF land purchased or restored in this program, either by the proposer or the end owner of the property, outside of the initial restoration of the land?

Yes

Explain what will be planted and include the maximum percentage of any acquired parcel that would be planted into foodplots by the proposer or the end owner of the property:

Easement Acquisition:

The purpose of the Minnesota Land Trust's conservation easements is to protect existing high-quality natural habitat and to preserve opportunities for future restoration. As such, we restrict any agricultural lands and use on the properties. In cases in which there are agricultural lands associated with the larger property, we will either carve the agricultural area out of the conservation easement, or in some limited cases, we may include a small percentage of agricultural lands if it is not feasible to carve those areas out. In such cases, however, we will not use OHF funds to pay the landowners for that portion of the conservation easement.

Restoration/Enhancement:

Short-term use of agricultural crops is an accepted best practice for preparing a site for prairie restoration. For example, short-term use of soybeans could be used for restorations in order to control weed seedbeds prior to prairie planting. In some cases this necessitates the use of GMO treated products to facilitate herbicide use in order to control weeds present in the seedbank.

Will insecticides or fungicides (including neonicotinoid and fungicide treated seed) be used within any activities of this program either in the process of restoration or use as food plots?

No

Is this land currently open for hunting and fishing?

No

Will the land be open for hunting and fishing after completion?

Yes

Describe any variation from the State of Minnesota regulations:

Lands acquired for the Minnesota Valley National Wildlife Refuge will be open for public hunting and fishing according to the National Wildlife Refuge Improvement Act. The lands will be opened through a public process prescribed by the Act. We anticipate hunting and fishing opportunities will be like those already established for lands previously acquired for the Refuge. For specific information, refer to the Refuge's website - <https://www.fws.gov/refuge/minnesota-valley/visit-us/activities/hunting>

Lands acquired by Trust for Public Land will be open for fishing and hunting.

Who will eventually own the fee title land?

- State of MN
- Federal
- Local Unit of Government
- County

Land acquired in fee will be designated as a:

- WMA
- National Wildlife Refuge
- SNA
- Other
- AMA

What is the anticipated number of closed acquisitions (range is fine) you plan to accomplish with this appropriation?

3 - 4

Will the eased land be open for public use?

No

Are there currently trails or roads on any of the proposed acquisitions?

Yes

Describe the types of trails or roads and the allowable uses:

We are not aware of any trails or roads at this time, although some parcels acquired in fee title may have existing field roads or low maintenance trails. Properties identified and prioritized for protection through conservation easements often have trails and roads on them; private landowners typically will be allowed to use those trails/roads on their property.

Will the trails or roads remain and uses continue to be allowed after OHF acquisition?

Yes

How will maintenance and monitoring be accomplished?

Trails and roads on eased lands are identified in the project baseline report and will be monitored annually as part of MLT's stewardship and enforcement protocols. Maintenance of permitted roads or trails in line with the easement terms will be the responsibility of the landowner.

Any pre-existing low-maintenance roads and trails on properties acquired for the MN Valley National Wildlife Refuge (USFWS) may be continued under a plan developed for the purpose of property access for habitat maintenance and public use of the property for wildlife-dependent recreation (e.g., hunting and fishing).

TPL is not aware of any trails or roads on any of the acquisitions. If any are discovered on lands to be managed by the DNR, they will be managed per DNR policy for WMAs, AMAs, SNAs or State Forests. If they are discovered on lands to be managed by local units of government, they will be managed per a maintenance and monitoring plan developed in consultation with LSOHC staff.

Will new trails or roads be developed or improved as a result of the OHF acquisition?

No

Will the acquired parcels be restored or enhanced within this appropriation?

No

We are not budgeting for this at this time, but it is possible we will request an amendment if funds remain after acquisition that could be used for restoration and enhancement of the acquired parcel.

Will the land that you acquire (fee or easement) be restored or enhanced within this program's funding and availability?

No

Explain how, when, and source of the R/E work:

Restoration and enhancement needs associated with fee title and easement projects completed under this grant will be assessed. Needs identified will be addressed through private sources, Conservation Partners Legacy Grant proposals and/or future funding proposals to LSOHC. If funds remain in this grant, an amendment may be submitted to allow those funds to be reallocated to restoration and enhancement on lands protected by this grant.

For the restoration / enhancement on eased lands, MLT restoration personnel will conduct outreach with easement landowners to evaluate, scope, design and schedule additional restoration projects. These activities will improve the project selection, cost-estimates and outcomes for future OHF funding requests.

Timeline

Activity Name	Estimated Completion Date
TPL - Restore and enhance 240 acres	June 2030
MLT - Restore 40 acres and enhance 25 acres	June 2030
TPL - Protect 140 acres through fee title acquisition	June 2029
MVT - Protect 100 acres through fee title acquisition	June 2029
MLT - Protect 121 acres under conservation easement	June 2029
GRG - Restore 71 acres	June 2030
FMR - Enhance 109 acres	June 2030

Date of Final Report Submission: 11/01/2030

Availability of Appropriation: Subd. 7. Availability of Appropriation

(a) Money appropriated in this section may not be spent on activities unless they are directly related to and necessary for a specific appropriation and are specified in the accomplishment plan approved by the Lessard-Sams Outdoor Heritage Council. Money appropriated in this section must not be spent on indirect costs or other institutional overhead charges that are not directly related to and necessary for a specific appropriation. Money appropriated for fee title acquisition of land may be used to restore, enhance, and provide for public use of the land acquired with the appropriation. Public-use facilities must have a minimal impact on habitat in acquired lands.

(b) Money appropriated in this section is available as follows:

- (1) money appropriated for acquiring real property is available until June 30, 2029;
- (2) money appropriated for restoring and enhancing land acquired with an appropriation in this section is available for four years after the acquisition date with a maximum end date of June 30, 2033;
- (3) money appropriated for restoring or enhancing other land is available until June 30, 2030;
- (4) notwithstanding clauses (1) to (3), money appropriated for a project that receives at least 15 percent of its funding from federal funds is available until a date sufficient to match the availability of federal funding to a maximum of six years if the federal funding was confirmed and included in the original approved draft

accomplishment plan; and

(5) money appropriated for other projects is available until the end of the fiscal year in which it is appropriated.

Budget

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan.

Position	Annual FTE	Years Working	Funding Request	Leverage	Leverage Source	Total
FMR Staff (Ecologists, Conservation Director, Bookkeeper, Intern)	0.12	4.0	\$44,800	\$25,000	Cities, foundations	\$69,800

Amount of Request: \$6,949,000**Amount of Leverage:** \$769,100**Leverage as a percent of the Request:** 11.07%**DSS + Personnel:** \$981,700**As a % of the total request:** 14.13%**Easement Stewardship:** \$168,000**As a % of the Easement Acquisition:** 16.0%**How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount?**

Metro Big Rivers reduced the number of projects it will complete and acres impacted to accommodate the reduced appropriation recommendation.

Detail leverage sources and confirmation of funds:

Leverage includes anticipated donated easement value by landowners (MLT), committed partner and other private funds (FMR, GRG, MVT, TPL), committed and anticipated city funds (FMR, GRG).

Does this project have the ability to be scalable?

Yes

If the project received 50% of the requested funding**Describe how the scaling would affect acres/activities and if not proportionately reduced, why?**

A reduction in funding would reduce outputs (acres/activities). The reduction will not be exactly proportional, as partners have some fixed costs that do not change based on project size.

Describe how personnel and DSS expenses would be adjusted and if not proportionately reduced, why?

Personnel and DSS expenses are scalable, but not proportionately, due to grant management, landowner outreach and other fixed costs. Some easement and fee acquisitions fail to close, but still have costs. Landowner donation of easement value allows grant funds to go further, increasing personnel and DSS costs.

Personnel**Has funding for these positions been requested in the past?**

Yes

Contracts**What is included in the contracts line?**

FMR, GRG, MLT, TPL - Restoration / enhancement contracts with service providers.

MLT - Writing of habitat management plans, landowner outreach, restoration/enhancement contracts.

Professional Services**What is included in the Professional Services line?**

- Appraisals
- Design/Engineering
- Other : Phase 1 Environmental Assessments, Minerals Reports, Mapping
- Surveys
- Title Insurance and Legal Fees

Fee Acquisition**What is the anticipated number of fee title acquisition transactions?**

3 - 4

Easement Stewardship**What is the number of easements anticipated, cost per easement for stewardship, and explain how that amount is calculated?**

Minnesota Land Trust's budget is based on the closing of 3-6 conservation easements based on size and cost. The average cost per easement to fund the Minnesota Land Trust's perpetual monitoring and enforcement obligations is \$28,000. This figure is derived from MLT's detailed stewardship funding "cost analysis" which is consistent with Land Trust Accreditation standards. MLT shares periodic updates to this cost analysis with LSOHC staff.

Travel

Does the amount in the travel line include equipment/vehicle rental?

Yes

Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging

N/A

I understand and agree that lodging, meals, and mileage must comply with the current MMB Commissioner Plan:

Yes

Direct Support Services

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?

FMR – As of October 27, 2023, FMR's DSS rate has been approved by DNR staff. Our rate includes the allowable direct and necessary expenditures that are not captured in other line items in the budget. A portion not exceeding 50% of these costs are requested from the grant and the balance is contributed as leverage.

GRG – As approved by the DNR in 2023, GRG's DSS rate includes the allowable direct and necessary expenditures that are not captured in other line items in the budget. A portion not exceeding 50% of these costs are requested from the grant and the balance is contributed as leverage.

MLT - In a process approved by the DNR on March 17, 2017, MLT's DSS rate includes the allowable direct and necessary expenditures that are not captured in other line items in the budget. This is similar to the MLT's proposed federal indirect rate. MLT will apply this DNR-approved rate only to personnel expenses.

TPL - DSS rate is based upon our federal rate which has been approved by the DNR. 50% of these costs are requested from the grant, 50% is contributed as leverage.

Other Equipment/Tools

Give examples of the types of Equipment and Tools that will be purchased?

Hand tools, saws, brush cutters, GPS devices, safety gear and other necessary equipment to complete restoration and enhancement activities.

Federal Funds

Do you anticipate federal funds as a match for this program?

No

Parcels

Parcel Information

Sign-up Criteria?

[Yes - Sign up criteria is attached](#)

Explain the process used to identify, prioritize, and select the parcels on your list:

FMR and GRG work with their public partners and other interested stakeholders to identify priority projects and areas. Criteria includes ecological and habitat value and potential (biodiversity, size and location), congruence with existing plans and priority areas, adjacency and connectedness to other public and protected lands and complexes, willing and committed landowners and leveraged opportunities.

MLT's competitive RFP process for identifying, prioritizing and selecting parcels for the Metro Big Rivers easement program is attached. MLT prioritizes parcels for restoration and enhancement that are of high ecological significance, adjacent or close to public conservation investments and owned by landowners committed to conservation.

MVT seeks to acquire land within the boundaries established by the USFWS for the Minnesota Valley National Wildlife Refuge in its Comprehensive Conservation Plan. Within those boundaries, parcels are prioritized based on adjacency or proximity to lands already publicly-protected, the opportunity to protect lands from development and restore habitat to meet ecological and public use objectives, and the feasibility of completing large blocks of protected and publicly-managed lands over time.

TPL works with its public partners (Minnesota DNR and local units of government) to identify priority opportunities that expand on and create new public conservation investments that protect high-quality wetland, woodland, prairie and riparian habitat.

Restore / Enhance Parcels

Name	County	TRDS	Acres	Est Cost	Existing Protection	Description
GRG - Innsbruck Park	Anoka	03024224	22	\$220,400	Yes	Restore 22 acres of upland and lowland forest surrounding a wetland complex.
MLT - Oak Lake (Richter)	Carver	11725210	40	\$240,000	Yes	Restore prairie and wetland in ag fields.
GRG - Ritter Farm Park	Dakota	11421223	20	\$200,300	Yes	Restore 20 acres of prairie
MLT - Musser Park (City of Sunfish Lake)	Dakota	02822231	25	\$188,800	Yes	Enhance oak savanna and restore wetland
GRG - Bass Lake Preserve, Phase 2	Hennepin	02824206	11	\$121,900	Yes	Restore 11 acres of forest understory
GRG - Marsh East	Hennepin	02724217	8	\$172,800	Yes	Restore 8 acres of oak savanna

FMR - Cottage Grove Ravine Regional Park	Washington	02721214	68	\$220,800	Yes	Enhance 10 acres prairie, including 3 acres native prairie, and 58 acres forest
FMR - Riverside Park	Washington	02722212	10	\$81,500	Yes	Enhance 10 acres forest
GRG - Bailey School Forest	Washington	02822225	10	\$259,600	Yes	Restore 10 acres of oak forest.
TPL - Keystone Woods WMA	Washington	03121218	800	\$1,500,000	Yes	Restore 600 acres of prairie, enhance 200 acres of forest
FMR - Highlands of Riverpointe	Wright	12023212	31	\$185,700	Yes	Enhance 31 acres prairie

If the project received 70% of the requested funding

Describe how the scaling would affect acres/activities and if not proportionately reduced, why?

A reduction in funding would reduce outputs (acres/activities). The reduction will not be exactly proportional, as partners have some fixed costs that do not change based on project size.

Describe how personnel and DSS expenses would be adjusted and if not proportionately reduced, why?

Personnel and DSS expenses are scalable, but not proportionately, due to grant management, landowner outreach and other fixed costs. Some easement and fee acquisitions fail to close, but still have costs.

Landowner donation of easement value allows grant funds to go further, increasing personnel and DSS costs.
