**INITIAL DEVELOPMENT PROPOSAL (IDP), page 2**

Designed to meet LSOH Project and Acquisition Requirements

To the extent possible, only vegetation or seed or ecotypes native to Minnesota, and preferably of the local ecotype, using a high diversity of species originating from as close to the restoration site as possible were used in this project, protecting existing native prairies from genetic contamination.

Yes  No  N/A  If "No" please explain:

For all new lands acquired, this document will meet the requirements for an **Ecological Restoration and Management Plan** by identifying: 1, 2, 3, 4, and 5 below:

1) To the degree practicable, this plan is consistent with the highest quality conservation and ecological goals for the restoration site: YES  NO .

2) Consideration was given to soil, geology, topography, and other relevant factors that would provide the best chance for long-term success of the restoration projects: YES  NO .

3) The plan shall include the proposed timetable for implementing the restoration, including, but not limited to, site preparation, establishment of diverse plant species, maintenance, and additional enhancement to establish the restoration; 6) including (for new acquisitions) identification of sufficient funding for implementation. (Use information on page 1.)

Implementation Timetable				Financial source
Activity	Timeline (month/year)	Describe specific work activities		Financial source
Site prep	Summer 2018	Site farmed to soybeans		PF OHF
Plant native mix	Fall 2018	Plant diverse native grass/forb mix		PF OHF
Grassland maintenance	Summer 2019	Weed control/clipping native fields 1-2x		PF OHF
Wetland restoration	Fall 2018	Restore wetlands		PF OHF
Build parking lot & posting	Spring-Summer 2019	Post boundaries, develop facilities		PF OHF

4) The plan shall identify long-term maintenance and management needs of the restoration and how the maintenance, management, and enhancement will be financed;

Long-term Needs				Financial source
Need	Timeframe	Funding amount needed		Financial source
Weed control	June 2019-August 2020	\$1,500.00	per year	DNR O & M
Rx burning	Continuous 3-7 year rotation	\$1,000	every 7 years	PHIP, Heritage
Tree removal	Continuous	\$500	every 5 years	PHIP, Heritage
Boundary/Parking maintenance	Continuous	\$500	every 5 years	DNR O & M

5) The plan uses the best available science to achieve the best restoration: YES  NO .

Attach maps, species lists and additional pages as needed. Include any other comments here too.  
Aerial map, native species mixes included
